After a brief interim, during which the swimming pool had been undergoing some improvements, it was filled to overflowing with Alliance young people Sunday. About 150 enjoyed the pleasure of a refreshing plunge and came out better able to withstand the heat of the day. The entire inside of the plunge has been painted white, and a concrete rim has been built around all edges so that the scraping of the spectators' feet will not scale the cement into the water. The water is still changed two and three times a week, but on account of the paint and the rim it does not get riled as it did

**WHAT ABOUT IT?**

800,000 bushels of grain is the estimated crop of Box Butte county. What if it should burn? Do you want to work all summer in the hot sun, and then be cheated out of your year's income in a very few minutes? It never pays to take a chance. A trifle over two cents a day will pay for a policy for one year, covering \$1,000 on grain of all kinds, threshed or unthreshed, while in barns, granaries, cribs, dwellings, or stacks or ricks or shocks, on cultivated lands or in process of threshing.

Protect yourself—get it insured. See Snoddy & Mollring—they will explain.
