PREPAREDNESS

No man is prepared to properly cope with the social, mental, moral and physical encounters of life unless dressed to best advantage. And bear in mind "best advantage" doesn't imply extremely stylish clothes, nor extremely durable clothes, nor extremely expensive clothes—it stands for the most of the three that can be procured for a given price. DISTRESSING HEADACHES

Caused by Eye Strain

A very large percent of all headaches are due to defective vision caused by the excessive strain upon the nerves and muscles of the eye in trying to overcome a malformed lens so as to obtain a correct image upon the retina. This is the function of accommodation and often results in overtaxed muscles and acute eye-strain.

Astigmatism

This defect of vision is called astigmatism and is a refractive error of the eye which requires the utmost skill and experience to correct. Astigmatism is not a condition acquired by age nor is it brought on by excessive use of the eyes.

Requires Specially Ground Glasses

To overcome this trouble lenses must be ground to balance the sight and relieve the strain upon the delicate nerve-and-muscle machinery that controls the eyes. We have had excellent success in treating the most difficult cases of this kind.
