

—is No Longer An Experiment

Cooking with kerosene has passed the experimental stage. It is economical, safe and satisfactory in every respect

If You Buy the Right Stove

There are many reasons why the

ALCAZAR Kerosene Gas Cook Stove

is the stove you should have in your home. The only polished blue steel stove and is easiest of all stoves to keep clean.

More than pays for itself in fuel consumption over your coal range in one season and does not overheat the kitchen. Let us show you.

Don't forget that Hagan, the tinner, is with us and takes care of all your tinner's troubles.

Full line of implements, vehicles, paints, etc.

IS WITNESS IN MURDER TRIAL

Capt. Hardy, Gun Expert, Called to Testify in Dickens Murder Trial at Boulder, Colo.

Capt. A. H. Hardy, of Denver, rifle expert and crack shot of Denver, who is well known in Box Butte county, was called to Boulder, Colo., Saturday to testify in the case in which Rienzi Dickens is charged with the murder of his father, William H. Dickens, a prominent banker of Longmont.

Soon after the murder detectives learned that the defendant had purchased a 250-3000 Savage rifle and a box of copper covered cartridges in Denver and a subsequent search revealed the fact that the gun had been taken apart and the pieces hid in various places at the Rienzi Dickens home. At the trial Saturday the bullet which caused the death of the banker was shown in court and Capt. Hardy was called as an expert to testify as to what make of gun would shoot that particular bullet.

His testimony showed his thorough knowledge of guns of all descriptions and proved valuable to the state in prosecuting the case.

He was handed the pieces and the copper butt of the bullet which ended the life of William H. Dickens. There came the voice of the district attorney in cold inquiry: "What kind of a rifle did that bullet come from?" There was a pause, then the answer: "From a 250-3000 Savage rifle."

It sounded impossible, almost weird, that a bullet should pass thru a double strength window pane, tear its way thru the body of a man, imbed itself in a wall and then remain to tell its story and its birthplace. But, apparently, it was simple for Captain Hardy.

In fact the whole testimony of the expert was toward the conclusion that the bullet which killed William H. Dickens could have come from no rifle in the world except a 250-3000 Savage.

"How long has this rifle been on the market?" District Attorney Fleming asked, as he began his questioning.

"About a year, it's a new gun." "And have you tested one of these guns?"

"I've tested six." "Are you acquainted with the ammunition for the gun? Please describe the gun," the district attorney ordered.

"It is a gun with a velocity of 300 feet a second. It has a bore of 250 thousandths of an inch, or a quarter of an inch. It is generally known as a .35 caliber gun. The bullet weighs 87-100ths of a grain and is covered with a jacket of pure copper. It is an expanding bullet, not a soft-nosed one, and its expansive power is far greater than that of a mushroom bullet. It is the greatest gun of its kind for killing purposes. The bullet has highly explosive powers after hitting animal tissue."

"Have you made any tests with the gun, regarding the action of the bullet after hitting a double strength pane of glass?"

"I have made many. I find that invariably the bullet turns sideways after hitting the glass."

It was here where the net began to tighten. For a description of the wound made in the body of William H. Dickens, according to the contentions of the state, show that the bullet which killed him entered his body sideways.

LIVESTOCK PRICES AT SOUTH OMAHA

Cattle Open a Shade Lower But Close Fully Steady

HOG TRADE A SHADE LOWER

Sheep Supplies Moderate and Trade Fairly Active at Prices Strong to a Dime Higher Than the Close of Last Week, Choice Light Mexican Lambs Sell at \$11.70.

Union Stock Yards, South Omaha, May 9, 1916.—Monday's run of cattle was of only moderate proportions, about 5,000 head but Eastern markets were liberally supplied and sharply lower so that opening bids here were weak to a dime lower. Later the trade in fat cattle was largely at steady figures and an early clearance was made. Best heavies brought \$9.35 and best yearlings \$9.30, the bulk of the fair to good cattle selling at \$5.70@9.00. Cows and heifers were fully steady and stockers and feeders steady to a dime lower.

Quotations on cattle: Prime yearlings, \$9.25@9.50; prime heaves, \$9.10@9.30; good to choice heaves, \$8.80@9.00; fair to good heaves, \$8.60@8.80; common to fair heaves, \$7.25@8.50; good to choice cows, \$7.25@8.00; fair to good cows, \$6.50@7.25; canners and cutters, \$5.00@6.25; veal calves, \$9.25@11.25; bulls, stags, etc., \$6.00@8.00; good to choice feeders, \$8.10@8.80; good to choice stockers, \$8.00@8.50; fair to good feeders, \$7.60@8.10; common to fair feeders, \$6.75@7.50; stock heifers, \$7.25@8.25; stock cows, \$6.50@7.75; stock calves, \$7.00@9.00.

Hogs Steady to 5c Lower. Receipts of hogs were not very heavy, 6,400 head, and although all classes of buyers started out to pay lower prices they were compelled to raise their hands and bulk of the trading was at prices anywhere from steady to a nickel lower than Saturday. Tops brought \$9.65 as against \$9.70 Saturday and the bulk of the trading was around \$9.45@9.60 as against \$9.45@9.65 Saturday. The market was not much different from one week ago.

Lambs Sell a Dime Higher. A very moderate supply of sheep and lambs showed up, about 5,500 head, and they were all wanted. Packers took everything readily at prices anywhere from steady to a dime higher than the close of last week. Best Mexican lambs sold at \$11.70 and an early clearance was made at the stronger prices.

Quotations on sheep and lambs: Lambs, good to choice handy, \$11.50@11.70; lambs, fair to good handy, \$11.25@11.50; lambs, fair to choice heavy, \$10.60@11.25; lambs, clipped, handy, \$9.00@9.75; lambs, clipped, heavy, \$8.60@9.40; yearlings, fair to choice light, \$9.25@10.50; yearlings, fair to choice heavy, \$8.50@9.25; wethers, fair to choice, \$8.25@9.40; ewes, good to choice, \$8.50@9.10; ewes, fair to good, \$7.75@8.50; ewes, clipped, \$6.00@7.50.

let which killed him entered his body sideways.

The questioning went on. "How is this bullet known among sportsmen?"

"As a killer." "Do you know any other shell that has this copper jacket?"

"Not any factory loaded shell of a caliber." "Have you made any comparisons with other guns?"

"It was tested against a 30-30 with a velocity of 2,000 feet a second. The 30-30 penetrated half way thru a half-inch piece of iron, the 250-3000 went right thru."

The district attorney walked forward. He picked a shell from the box bought by Rienzi C. Dickens at the Triton Hardware company in Denver, Nov. 30 last.

"What difference is there between this and any other shell of the same caliber?"

"This bullet has a jacket of pure copper," the expert answered. "All other bullets of the same caliber are coated in a mixture of copper and nickel. There is only one bullet that it anything like it. That is the Newton 256."

"And who is Newton?" "He is a small maker of firearms who is not able to fill orders at present."

"Therefore, this is the only .25 caliber copper jacketed bullet on the commercial market?"

"Yes, sir." A few moments of qualification regarding Captain Hardy's expert knowledge of pistols. Then the question:

"From your knowledge, would it be possible for a .25-caliber pistol to fire a shot which would penetrate a double-strength window pane, go thru a human body and imbed itself in the wall?"

The defense objected on the ground that Captain Hardy never had had any experience in firing pistol bullets thru human bodies. Moreover, Captain Hardy admitted the assertion. The objection was overruled. The question came again. "It is my opinion," answered the expert, "that the bullet of a .25-caliber pistol would do little more than penetrate the clothing of a person after it had gone thru a window of double strength glass."

Again the bits of the bullet and the jacket came forward. "Examine the rifling of that bullet," came the order of the district attorney.

The microscope came forth. There was a pause in the courtroom.

"Is the rifling that of a 250 Savage?"

"It is."

The gun was brought forth. And while Rienzi C. Dickens sat slouched in his chair the alleged weapon of death was passed from one to the other of the jurors.

"Look thru the barrel, gentlemen," cautioned the district attorney. And the jurors obeyed. The bits of cartridge went from one to the other. At the request of one of the jurors a fresh cartridge was opened and sent into the jury box, as its composition was explained by the expert. Following this came photographs of the five cartridges found by the officers at Longmont and the breech block of the rifle purchased by Rienzi C. Dickens.

"And were these cartridges fired from the rifle owned by Dickens?" asked the attorney for the state.

"They were."

"Explain, if you please, the reason you know this." "By the fact that every gun has its individuality just the same as a person has an individuality. There are little differences in the breech block of every gun, and when the gun is fired, the concussion causes this individuality to be marked on the shell, with the result that it can be later identified. These shells mark up in their marks with the marks on the breech block of the gun."

"Chamberlain's Tablets Have Done Wonders for Me"

"I have been a sufferer from stomach trouble for a number of years, and although I have used a great number of remedies recommended for this complaint, Chamberlain's Tablets is the first medicine that has given me positive and lasting relief," writes Mrs. Anna Kadin, Spencerport, N. Y. "Chamberlain's Tablets have done wonders for me and I value them very highly." Obtainable everywhere. Adv.—May

POTASH IN MUD LAKES OF WESTERN UTAH

Potash in surprisingly large proportions is present in the brines and muds of the Salduro Marsh, a sink in the Salt Lake Desert, about sixty miles west of the southwest edge of Great Salt Lake. From the clays underlying the salt body which covers the marsh the U. S. Geological Survey collected samples at depths of eight to twelve feet, in which the dissolved salts were found to contain from 2 to about 3 1/2 per cent of potash, and 2 1/4 per cent was found in the soluble salts at a depth of about four feet. Of the dissolved salts contained in the brines occupying the spaces between the salt crystals in the crust overlying these muds 3 to 4 per cent was found to be potash.

Singularly enough the salt crust left at the surface of the desert through the evaporation of the brines contains little more than a trace of potash, most of the potash being confined to the brines and to the muds underlying the salt crust. The successful extraction of this potash is a fascinating as well as most pressing problem for the chemical engineer. According to analyses made by the Survey, the brines and muds from the Salduro Marsh contain considerable magnesium chloride and sodium, and so are somewhat similar in composition to the deposits from which potash is manufactured in Germany. Therefore, it appears that success in methods for manufacturing potash at the Salduro Marsh should prove comparatively easy.

While no extensive exploratory work has been done by the Survey to show the area of the deposit it is believed that the amount of potash present in the region, if it can be extracted with commercial success, is sufficient to provide a valuable source of supply to the country.

Whooping Cough One of the most successful preparations in use for this disease is Chamberlain's Cough Remedy. S. W. McClinton, Blandon Springs, Ala., writes, "Our baby had whooping cough as bad as most any baby could have it. I gave him Chamberlain's Cough Remedy and it soon got him well." Obtainable everywhere. Adv.—May

FAIRVIEW

(Written for last week)

J. B. Hadley and wife visited with the home folks Sunday.

Mrs. Chas. Trenkle visited with Mrs. Fred Nason Tuesday.

Grandma and Grandpa Lawrence were in town Thursday on business.

W. L. Lorance took his cattle and horses to the Hahn place for the summer.

Mrs. Fred Nason visited at the home of her brother Brown Griffith Monday.

Elmer Shanks is working for F. H. Nason this week building some porches on the house.

Lora Nason, bookkeeper for the Alliance Grocery Co., visited with the home folks Sunday.

Wm. Rust, Jr., and D. R. Lawrence sold a bunch of cattle to Harve Allison which they delivered Sunday.

The young people's meeting was well attended Sunday evening. Quite an interest seems to be taken in this work.

Jess Chilson branded thirty head of cattle the first of the week. He is going to send them to the hills for the summer.

Wm. Nye, Frank Trenkle, Herbert Nason and Wm. Rust, Jr., were some of those hauling hogs to town the past few days.

Wm. Rust, Jr., hauled twelve loads of potatoes to town the last of the week for which he received fifty cents per bushel.

Otto Mats moved his family out on his place the latter part of the week, they having spent three years holding down a Kinkaid in the hills.

Chas. Hanan will talk to the people at the church next Sunday evening, May 7, after the young people's meeting. Everyone is invited to attend. The district superintendent did not

preach here Sunday, on account of the storm. Mrs. Kendall preached both morning and evening to a large crowd.

Josephine and Marie Marcey, Belle Wiebling, Violet and Clare Osborne, Garnet and Alberta Lunsford of Lakeside visited at the home of Fred Nason Saturday and Sunday, also attending services at the church. They returned home Monday.

We have inquiries every day at The Herald office for houses and rooms. If you have any to rent it will pay you to place an advertisement in The Herald's Want Ad Department.

Two hundred dollars clear was the result of the bazaar held Friday and Saturday by the Ladies' Circle of the Christian church. A cafeteria lunch was conducted both days and the ladies met with a hearty response from the people of the community. A large assortment of merchandise including fancy work and wearing apparel made by members of a number of wholesale houses with whom the local merchants deal were offered for sale and nearly every article was disposed of at a fair price. The funds raised will be applied to the church building fund.

MOTHER'S DAY
Sunday, May 14th

Arrange to send your mother a box of flowers and wear a flower in her honor on Mother's Day.
ALLIANCE GREENHOUSE.

Prince Albert gives smokers such delight, because

- its flavor is so different and so delightfully good;
- it can't bite your tongue;
- it can't parch your throat;
- you can smoke it as long and as hard as you like without any comeback but real tobacco happiness!

On the reverse side of every Prince Albert package you will read:

"PROCESS PATENTED JULY 30th, 1907"

That means to you a lot of tobacco enjoyment. Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

PRINCE ALBERT

the national joy smoke

in goodness and in pipe satisfaction is all we or its enthusiastic friends ever claimed for it!

It answers every smoke desire you or any other man ever had! It is so cool and fragrant and appealing to your smoke appetite that you will get chummy with it in a mighty short time!

Will you invest 5c or 10c to prove out our say-so on the national joy smoke?

R. J. REYNOLDS TOBACCO CO., Winston-Salem, N. C.

This is the reverse side of the Prince Albert tin. Read this "Patented Process" message to you and realize what it means in making Prince Albert so much to your liking.
