**WOULD ESTABLISH AN
AUTO TRANSFER**

Deadwood Man Would Install Ford Passenger and Express Line Between Alliance and Antioch

John M. Black of Deadwood, South Dakota, met with a number of the retail merchants and other business men of Alliance Saturday afternoon at the Community Club office for the purpose of discussing his proposition to establish a Ford auto passenger and express line between Alliance and Antioch.

Mr. Black is engaged in this business at Deadwood and has used Ford cars three years, the average distance between points being sixteen miles, slightly farther than the distance between Alliance and Antioch.

Mr. Black's plan is to run cars between the towns at regular scheduled times, keeping cars at both points and making stops at Hoffland. Suit cases and light baggage would be carried free of charge for passengers. Trunks and other heavy baggage would be hauled by auto truck and there would be a slight additional charge. The charge established would probably be \$1.25 for one way per passenger or \$1.25 for one way on the regular trips. Regular passengers would travel by ticket at prices lower than these. A committee was appointed to interview the business men regarding the giving of a reasonable guarantee to Mr. Black in order to get him to make the installation of service. The out-

come of the negotiations depends upon the report made by this committee.

AN APPEAL FOR SPRING WHEAT

George Coupland, vice-chairman of the Nebraska State Council of Defense, has issued a statement saying that the survey made by the council as to the winter wheat acreage in Nebraska this fall indicates about 75 to 80 per cent of the normal planting. In order that the state may get back to its usual wheat production, the farmers of the state are called upon by the government to make up the deficiency by the sowing of spring wheat next year. Fortunately, the fact that so much extra land was planted to corn this year will make it easy for farmers to use their corn-stalk fields for this purpose. The State Council urges very strongly that the necessary seed supplies to do this be obtained as soon as possible. In localities where good spring wheat is being held, arrangements should be made at once by those who need it so that no good seed wheat will be shipped away for milling purposes until the local needs are provided for.

The State Council of Defense asks the loyal co-operation of the farmers, elevators and mills of Nebraska to help secure the seeding of the necessary acreage of spring wheat next year to make up the deficiency caused by the shortage of winter wheat sown this fall. The needs of the nation urgently demand that this be done.

Farmers needing spring wheat and those who have it for sale, should they need assistance, will be helped by the State Council of Defense to the utmost of its ability. Now is the time to get ready to seed next year's spring wheat crop.

**Wise Cattlemen Vaccinate Calves Against
BLACKLEG**

Stock owners cannot afford to experiment with unproved vaccines, it means money in your pocket to immunize calves right now with one dose of **Kansas Germ-Free Fluid Vaccine** (Made in Wichita, Kansas)

This is the only proved preventative on the market—approximately 250,000 calves have been immunized with it, and not one afterward died of Blackleg. It cannot give disease to a healthy animal or spread disease in pastures. This is the original germ-free vaccine. It is made by its originator and every dose sent out is up to standard and will do the work.

We state facts—we make no unproved claims.

E. A. HALL & SON, Distributing Agents, Alliance, Nebr.
