

# WHEN YOU DRIVE A CHANDLER to your Garage

You have been pleased with its performance.

**The Highest Quality Six of Today at the Lowest Price**  
SEE HOW CHANDLER CHECKS WITH HIGH PRICED CARS

WHEREIN and how does the Chandler Six excel other cars in its price field, you may ask. In many ways it excels and in all ways taken together it excels tremendously. No car should be selected because of its superiority in any one feature, for it is the unit performance by which the car will be measured. See how the Chandler checks with nine of the best known high-priced cars in eight features selected as being characteristic of high grade design and most excellent service.

**MOTOR**

The Chandler power plant is mounted on a large and substantial one-piece aluminum base which permanently holds each part in true relation to all other parts, preventing friction, loss of power, wear and engine trouble on the road. This form of base construction also protects the moving parts of the engine and accessories against water, dust, mud and other road drift coming from in under.

The solid cast aluminum motor base ties the frame sides most securely and provides a rigid engine mounting. This construction also provides an unusually solid foundation for the long, heavy crank shaft. The perfectly balanced crank shaft thus supported cannot "whip." This, in turn, eliminates unnecessary vibration and wear and adjustment.

The three large and rigid crank shaft bearing supports are heavily and solidly built to withstand the continuous shocks of the cylinder firing. The fact that we are willing to pay the price of this construction surely is evidence of our sincere intention of producing the best automobile in its field.

## Hupmobile

*The Comfort Car*

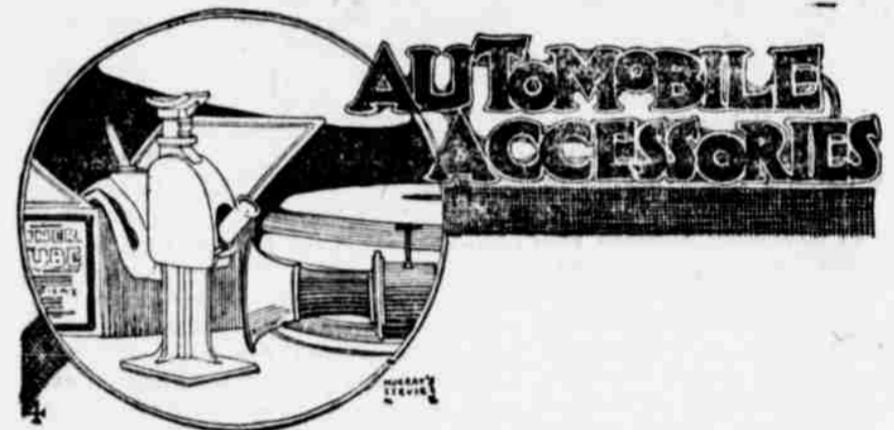

Ask any owner of a Hupp:

- Does it pull through sand?
- How many miles per gallon?
- How easy is it steered?
- Does it clear road ridges?
- Does it cost much in upkeep?

Their answers will assure you that we have

**H** Another Desirable Car

For Every Make of Car

**TIRES.** All kinds of Tools. The easiest kind of Chains to put on when you get unexpectedly stuck in a mud hole.

**VULCANIZING MATERIALS.** In fact every kind of an accessory that you need for your car.

**CANVAS COVERS**—Put one of our Canvas Covers on that extra tire. It will save the wear on the tire. Wind, rain and sun on the extra tire will wear it out quicker than road service. As tires are constantly increasing in price, the tire cover will save you money.

**SIDE LIGHTS,** easily attached to the arm of the windshield, are of the greatest value to you in locating cross roads, road instructions, or in fixing the car after dark. Put one on now. Prices \$7.50 and \$10.00.
