SPECIAL LIVE STOCK NEWS

SEPTEMBER GOVERNMENT BEEF PRICES ARE HIGH.

HOGS OVER THE TOP

Cattle Higher, "She" Stock and Feeders at the Top.

SHEEP AND LAMBS LOWER.

Latest Market Information by
C. A. MALLORY, Mgr.
BOWLES LIVE STOCK COMMISSION COMPANY
Omaha, Nebraska.

Union Stockyards, Omaha, Aug. 22
The cattle trade is gradually recovering from the severe break that occurred during the first week of this month, and the supply shows a fair increase all around over last week.

The food administration has published its maximum prices for September, beef ranging from \$21.90 to \$23.55, which should be satisfactory to the selling interests, but the public has been "weaned" away from weather, and high prices, has curtailed the home demand considerably.

We believe, however, this demand will increase with cooler weather, and if the local butchers will take more of the lighter weight beef the entire trade will be benefited.

War conditions, government control and the situations arising from present day operations will continue to keep the trade guessing, but these prices are good, and we still advise shipping all kinds of fat stock as soon as it is in proper condition and cars can be secured.

The demand for good weight fat steers continues good, although prices are 75c to \$1.50 under the "top." Butchers stock has recovered most of the recent decline, and is in good demand, but we expect somewhat lower prices during the season, and advise shipping the "she" stock regularly, or whenever it is ready for market.

Stockers and feeders are not coming very fast; the late rains have increased the demand, and prices are right close to the top of the season for practically all kinds of steers, cows and heifers. From our latest advices, the corn crop will be an average and of extra good quality, and there will be sufficient pastures and roughness to give us a broad demand throughout the season.

The financial branch of the government has issued orders for federal reserve banks to take care of the live stock people, and believe arrangements will be made to have year paper handled on the young and breeding stock, and we suggest holding

back these grades whenever conditions will permit.

We look for a fair increase in shipments of grass cattle during the season, and there will be times when prices will break again, but everything points to a good average market. These prices are good and the future is anybody's "guess."

Anyone interested in the live stock game should read the Bowles market information carefully and should write them for any special advice or information.

The trade is closing strong for beef steers; 25c to 50c higher for "she" stock, stockers and feeders, with fair prospects next week, but a little lower range in prices generally is liable to occur any time, especially for the beef cattle and those of poor quality.

We quote Nebraska grass cattle:

Good to choice heavy fat steers	\$12.50 to \$14.00
Fair to good fat steers	\$11 to \$12.50
Good to choice fat cows	\$9.50 to \$11.50
Heifers	\$8.50 to \$11.50
Fair to good	\$8.00 to \$9.50
Canners and cutters	\$6.50 to \$7.50
Good to choice feeders	\$11 to \$13.50
Fair to good feeders	\$9.00 to \$11.00
Light stock steers	\$8.50 to \$10.00
Stock cows and heifers	7.50 to \$9.00
Stock calves	\$8.50 to \$10.50

Common to fair grades at the usual discounts.

Wyoming, South Dakota and selected cattle selling generally 25c to 50c higher.

The Bowles Live Stock Commission company is in position to give any of our readers the best of service and has the facilities to take proper care of all kinds of shipments—none too small and none too large.

The hog trade continues active under moderate supplies with the bulk selling from \$18.50 to \$19.00, and favorable prospects for some weeks, at least.

Sheep and lambs are moving faster and prices are 25c to 50c lower all around. Fat and feeding lambs \$17.25 to \$18.00; fat ewes \$12 to \$13; feeding ewes \$8.50 to \$10.50. We expect still larger receipts and some further decline before long.

Demand good for feeders, but the old time large feeders are holding off and claim they will not feed unless prices are lower.

Write, wire or phone Bowles at South Omaha any time you need anything in their line, and let them know whenever your daily paper or the Herald fails to come on time.

We are still preaching at the same pulpit on Ninth and Box Butte each Lord's day. The morning subject is "The Kingdom of Heaven." The evening subject is: "The Remission of Sins." The Bible school's lessons are especially interesting. You are welcome and the class door is open. August 29 is the day for the big picnic at the park. It begins at 2 p. m. C. E. prayer meeting each Sunday evening at 7 o'clock. The midweek church meeting at Wednesday evening. Come to the church with a message and a welcome.—Stephen J. Epler, minister.

Hemingford

Miss Mae Haynes, who has been visiting with friends here for a while, returned to her home at St. Louis, Mo., last Saturday.

E. S. Wildy was looking after business matters in this vicinity the first of the week.

Mr. Zimmerman has been under the doctor's care for the past ten days, but at this time he is reported to be improving.

A. M. Miller left the middle of the week to attend the G. A. R. encampment at Seattle.

Mrs. Rupert Walker returned Thursday from Denver, where she purchased a fine line of millinery, ready made dresses, suits and cloaks.

Mrs. B. U. Shepherd and Mrs. McClung were Alliance visitors during the week. Mrs. Shepherd went down to consult a doctor in regard to her throat. At this writing she is able to be around again.

Uncle Grove Fosket is back again after a few days spent up in Wyoming.

Mrs. Ray Woods and little daughter left Friday for Sheridan, Wyoming, where Mr. Woods has a position.

F. L. Potmesil returned from Omaha Saturday where he spent the week attending to business.

Colonel and Mrs. Fosket are back in town again after a few days' absence spent with friends in the country.

T. J. O'Keefe and family, of Alliance, were in town for a short time Tuesday.

John Walger stepped on a nail Saturday which caused him some discomfort for a few days.

Miss West, who has been visiting at the Harvey home here for a couple of weeks, departed Sunday for her home at Sioux City, Iowa.

Mrs. A. S. Enyeart was down from Marsland Tuesday.

Mrs. George Wiltsey, who has been confined to her bed for the last two weeks, is reported to be improving.

Mr. and Mrs. Harry Pierce left here for Lincoln last week Thursday to consult a specialist. Mr. Pierce got a piece of steel in his eye, which our local doctor removed, but as the eye did not seem to be getting along as desired, it was thought best to see a specialist. We hope Mr.

Pierce will return all right and the eye none the worse for the accident.

Mr. and Mrs. Russell Miller came Tuesday from El Paso, Texas. Russell has been stationed at Kelly field since last December and Mrs. Miller has spent the last three months with him. Mr. Miller is in the aviation corps and has made a number of flights.

Miss Ruth Muirhead went to Hot Springs, S. D., Monday to join her mother and sister, who have been there for a week.

During the rain and electric storm Monday evening the Phillips hotel was struck by lightning, which tore up the shingles and put the lights out of commission, no further damage being done.

Mrs. Robert Wright returned from Wyoming Tuesday where she had been visiting her sister, Mrs. Guy Sprowles and family for a week.

Married, Wednesday morning, Aug. 21, at the Catholic church in this city, Miss Christine Gaseling and Will Elder, both of this place. Miss Gaseling was born and has grown to womanhood in this vicinity and is a young lady of sterling worth. Mr. Elder has resided here for the past two years and has made a host of friends. To these young people we extend our hearty congratulations.

POTATO BLIGHT MUST BE WATCHED

Excellent Potato Crops of Western Nebraska Must Be Carefully Watched.

Bordeaux Prevents Blight
Denver, Colorado.—Once started the ravages of blight cannot be checked, says Dr. H. E. Horton in Field and Farm.

A few days of blight and our already too small potato crop can be destroyed. Some may think of increased acreage of potatoes; it is sometimes said of men: "The heavier they are the harder they fall." The blight may in a way be insured against by spraying with Bordeaux mixture but such treatment is preventive only. Do not procrastinate. Save the potato crop by spraying now and every ten days or two weeks until all danger is past and the crop is made.

Bordeaux mixture is made by pouring together a solution of four pounds of quicklime in water and six pounds of sulphate of copper in water. The quantities of sulphate of copper, quicklime and water used may vary from a strong solution of copper to a very weak solution. To easily prepare mixture procure a 52-gallon barrel and cut it in two at the bung to make two tubs. Bore a hole in a stove, just above the bottom of the tub and fill it with a plug or better a wooden spigot. Place these tubs on something to elevate them three or four feet above the ground. Use these tubs to prepare the sulphate of copper solution and the lime solution.

To prepare the mixture, place a 52-gallon barrel on the ground, beneath the two other tubs, and pour into the barrel a bucket of water; then open the spigots of the two tubs and as the copper and lime solutions run together stir the mixture vigorously. Prepare the sulphate of copper solution by dissolving the crystals of sulphate of copper in warm water and stirring to hasten the solution. Cool the solution and strain thru cheesecloth. Prepare the quicklime solution by slaking in a small quantity of water, then add cold water and stir to form a thick milk or cream. Strain the mixture thru a cheesecloth strainer or fairly coarse wire strainer.

The mixture must never contain an excess of sulphate of copper and this can be determined by pouring about a teaspoonful of the mixture into a white saucer or plate and adding a few drops of a 10 per cent solution ferrocyanide potassium. If a reddish coloration results more milk of lime must be added. Add and test until the ferrocyanide solution shows yellow. There must be no excess of copper for this burns the leaves. There must be no excess of lime for this delays the action of the mixture. The precipitate must be finely divided and if possible, gelatinous. Properly prepared mixture will show scarcely any separation of liquid and solid in an hour's time.

A prolific cause of unsatisfactory spraying is clogging nozzles. Strain the solutions used thru fine mesh sieves, or cheesecloth, and to make doubly sure attach a fine mesh strainer to the suction pipe of the force pump. A watering pot may not be used to apply the Bordeaux mixture; a pump, with spraying nozzle, or an air atomizer, must be used. The solution must be applied in such a manner as to settle down and cover every part of the leaf or stem; it will not do to have small drops, which run off the sprayed surface. No one pattern nozzle will do all kinds of work. The Tizer produces with low pressure wide spray fans or cones, of high quality. These nozzles recommend themselves to amateur gardeners and potato growers.

When several nozzles are arranged on a boom, as in spraying potatoes, the spray cones must overlap before the mist strikes the plant part, for only in this way is a solid wall of fungicide applied. If it is not possible to elevate the spray boom high enough above the plants to secure the overlapping of the spray cones and the consequent solid wall, the wall may be obtained by elevating the spray boom as high as possible and pointing the nozzles to hit the ground four to six feet back of the

The Cause of Disease

Modern Science, which is always studying cause and effect, has demonstrated that disease in adults and improper development and sickness in children are the results of faulty nerve action due to spinal defects. The bones of the spine press on the nerves and interfere with the distribution of energy throughout the body. A correction of these defects restores uninterrupted nerve force and invariably results in the return of health.

Chiropractic

(KI-RO-PRAK-TIC)

is the science that has demonstrated this connection between disease and defective spines. For years, and in the face of bitter criticism and strong opposition, Chiropractors have been adjusting the defects in spines to remove the cause of disease. Wonderful results have been obtained, even in cases that were considered incurable. Everywhere there are people who have been greatly helped by

Those who are not in health, who are not strong and well; who are nervous; fagged out; inefficient; and who feel they need to be re-charged with vital energy, will no doubt find relief thru spinal adjustments. You owe it to yourself, your family and your friends to investigate Chiropractic.

Dr. Anna Graham Jeffrey

boom instead of pointing them straight down. Several sprayings with a weak solution are better than one spraying with a strong solution. As new growth brings forth new leaves, not protected by copper, it follows that plants must be sprayed several times during the growing season to secure protection.

Railroad Notes

Mr. and Mrs. K. E. Robinson and mother have gone to Billings, Montana, and other points in the northwest. They expect to be gone about two weeks.

Charles Widman expects to visit home folks in Colorado next week.

Mr. and Mrs. Harry Baird will visit in Billings, Montana, the next few days.

Miss Marie Nolan expects to leave in a few days for a visit in Helena and Great Falls, Montana.

Mr. and Mrs. Evan Lewis are going to Sidney for a short visit.

Mrs. John Parsons and daughter will make a trip to Omaha the fore part of next week.

Mrs. James Rust expects to leave next Monday for a visit in Kansas City.

Mrs. W. D. Johnson went to Denver on 304 Tuesday night.

Mrs. L. N. Potter is visiting at Thermopolis for a few days.

Mr. and Mrs. E. McGuire are going to Rosalie, Nebr., to visit Mr. McGuire's father, who is in very poor health.

Mr. and Mrs. R. E. Munger are enjoying a few days in the Black Hills.

Fireman J. A. Pirette was called to Lead, South Dakota, to report for Uncle Sam and has been ordered to go to Camp Funston. Joe says he will bring the Kaiser with him, when he returns.

Mrs. Carl Witham left for an extended visit at Sidney, and North Platte.

The Alliance division are receiving the new OIA engines every day for work on the east end of the division.

Engineer H. Nelson has bid in the eighth pool turn on the east end and is now on the job.

Mrs. H. A. Wilson has arrived from Denver and they are now making their home at Alliance in the McDonald apartments.

Mrs. Charles A. Rider and Mrs. Clarence McConnell, of Ravenna, were visitors at the homes of George Johns and Wes Swains.

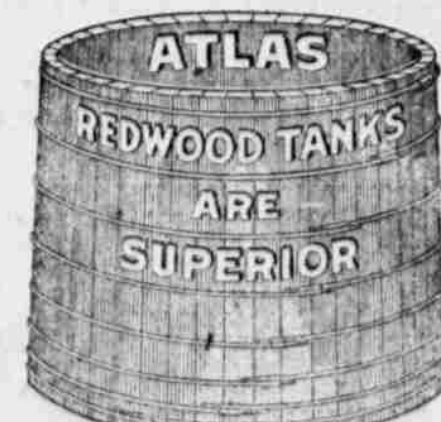

E. L. Routh is going to Sheridan to take up a homestead.

Fireman Walgren's little daughter left home Tuesday evening about 4:30 and they did not find her until about 9 o'clock. Mr. Walgren was called to go out on 46, but had to lay off to find the little girl.

Mrs. George Davis and son are going to Denver on a pleasure trip.

Two weed burners are working on the division this week burning the weeds along the track. One is working between Alliance and Edgemont, and the other between Seneca and Alliance.

ATLAS REDWOOD TANKS

Will outlast several steel tanks or several tanks made from other material, and cost less money. These tanks will keep the water cooler in summer and warmer in winter.

Send for price list today.
