

White People Live Longest.
A student who has been devoting his time to the study of longevity says that he has found that white people live longer than black ones. He bases his statement upon data obtained from the various insurance companies of this country.

Physical Exertion and Heart Trouble.
The only way of surely determining whether a sufferer from an irritable heart can bear extensive exertion is to put him through a series of gradually increasing exercises, states the British Medical Journal, with careful examination after each exercise.

How Mosquitoes Hatch.

We have all heard about the mosquito's habit of laying its eggs on the surface of still water in the form of a raft, which floats about until hatching time arrives. But it is only some species that do that. In the Catskill region, and elsewhere among the mountains of the North and East, there is a kind of mosquito that deposits its eggs during July in dry hollows in the ground. When the following spring arrives the snows melting from the hills fill the hollows with water, and in May the eggs hatch out.

Just ask Dad to stay at home one day and do the family wash.

Dad won't do it. He'll say there ought not to be a wash day at all—that the home isn't the place to do the wash.

Dad will say to send all the wash to the laundry.

And Dad will be right.

All things considered it costs less to have us do the washing than to do it at home.
