

CANTON

James B. Curry has completed the sale of his two sections, Claude Farrell purchasing section 27, and Edward Leth section 23. Mr. Leth is a young man who will no doubt make a home for himself of his purchase and Mr. Farrell will add the other section to his present ranch.

We are pleased to announce that E. O. Duellin of Bridgeport who purchased the Ed Leathers and Dick Stanford sections, has commenced moving thereon. He arrived Sunday with a large truck load of household goods, believing it cheaper to truck them all the way rather than to Scottsbluff or Hemingford and then truck them thirty miles.

Mr. Davis, who purchased the Lewis ranch consisting of the J. W. Kelley, John Rambousek and Rolla Shetter sections, has arrived at Scottsbluff with a car of movables and will soon be located on the ranch.

Ivan Curry is home from Camp Grant, Rockford, on a twenty days' sick leave. Ivan has had more than his share of sickness, having had the flu twice and pneumonia the last time.

Clifford Whitaker received his discharge from Camp Funston last week arriving home Wednesday, after having been in the service of your Uncle Samuel nearly a year and a half. Clifford said he was so tickled when the glad news came that he could hardly eat his supper, but the same feeling pervades all the boys about the same way.

Mrs. Grace Flaherty was having some dental work done in Alliance last week.

Frank McCard added his name to the Canton newspaper list the past week. Several more in this vicinity should do likewise.

A meeting of the stockholders of the Snake Creek Tele'one Association was held Saturday to discuss the advisability of putting in a line to Hemingford but nothing decisive was done.

S. L. Wagner marketed a fine bunch of hogs at Hemingford last week. There were thirteen in the bunch and a smoother lot we have never seen. Sioux county can't be beat when it comes to producing fine stock, whether hogs or cattle.

Dr. Hurd was called to the Amos Meeker ranch last Saturday to prescribe for Mr. Meeker, who is somewhat better the first of the week.

There are just two good sections that we know of for sale right close in, so if any one is thinking of locating near here, they had better step lively. They are in first or second hands and you know every time they change, they get more valuable. Call on M. L. Whitaker, Canton.

Before this item has been read by the residents of this vicinity, J. C. Birkner's sale will have been held and a good industrious family will have severed the ties that have bound it to Sioux county for some six or seven years. Mr. Birkner has favored his place better than the general run and Mrs. Safford comes into possession thru the purchase of this place of a very comfortable home. Mr. Birkner and family expect to leave immediately for Moun-

tain Grove, Mo., the land of big red apples (?)

Frank Hookham of Johnstown is visiting with his brother Chas. Hookham. While Frank was available for doing the chores, Charles and family made a trip down to Sidney for a few days' visit with a brother-in-law.

Ralph Utter moved into Heming-

ford the fore part of the week from the Chas. Hiser place.

No Need to Be Afraid.

James brought his pet bulldog to the store. As the dog looked vicious, I moved away from him. James looked up quickly, then said: "Never mind him; he ain't biteous."—Exchange.

Difficult Men to Handle.

There is no class of men so difficult to be managed in a state as those whose intentions are honest, but whose consciences are bewitched.—Napoleon.

Daily Thought.

There is a great deal of unmapped country within us which would have to be taken into account in an explanation of our gusts and storms.—George Elliot.

Likes Hot Stuff.

The common green frog has been discovered to possess an insatiable greed for wasps. This extraordinary appetite does not seem to be in the least checked by an occasional sting. The protecting color of the frog, which sits motionless upon leaves, no doubt deceives the most wary of insects into a sense of security.

A PATRIOTIC DUTY

Almost as vital as that of protecting the honor of flag and country, is the duty of protecting and safe-guarding health. When strength is well-nigh exhausted and the resistive powers are reduced, then is the time disease germs are the most potent and when

SCOTT'S EMULSION

affords splendid and effectual means of offsetting the tendency toward weakness and protecting strength. The abundant tonic and unique nourishing properties of Scott's Emulsion make it a dependable agent that may be used everyday, by anyone, to protect strength.

WRIGLEY'S
Helps teeth, breath, appetite, digestion

HERMETICALLY sealed in its wax-wrapped package, airtight, impurity proof—WRIGLEY'S is hygienic and wholesome. The good that's good for young and old.

Farmers and Land Owners!

The "FORDSON" TRACTOR is the result of extensive trials and experiments conducted by Mr. Henry Ford, covering a period of many years. Before placing the tractor on the market, every detail has been thoroly tried out under actual farming conditions in various parts of this country and abroad.

Experience has pointed to the small, light tractor as being the one machine which will fill all varying conditions satisfactorily.

In developing the "FORDSON" Tractor, the aim has been to produce a small tractor which will be low in first cost, reliable, and above all—efficient.

Being small, light and economical, the "FORDSON" Tractor is adapted for use on small farms as well as on the largest. It will pull all farm implements and do the work generally done by horses on the farm. In addition, by its belt pulley the tractor will drive farm machinery such as a thresher, ensilage cutter, etc., making the "FORDSON" a truly universal tractor.

In design and construction the "FORDSON" takes a long step in approaching the ideal tractor. The simplicity of its operation and construction will at once appeal to the farmer.

Special devices were perfected to keep out dust and dirt. All moving parts are enclosed and thoroly lubricated. The number of lubricating points requiring attention are very few and easily gotten at.

The motor, transmission and rear axle are assembled together, forming one rigid unit, which, combined with the three-point suspension, relieves these parts of all strain.

The absence of any frame gives accessibility to all parts for making adjustments or repairs, and allows the tractor to be taken apart in a few minutes.

The motor is of substantial design and is capable of delivering its full power continuously. It embodies features which have been used with success in other fields for many years.

PERFORMANCE

The tractor is designed as a two-plow machine and will pull two 14-inch plows in the stiffest soil. It will maintain a drawbar pull of 1800 pounds at plowing speed. In low gear a drawbar pull of 2500 pounds is obtained.

The fuel consumption varies with conditions; two and one-half gallons of kerosene per acre being a fair average. The amount of ground plowed also depends on conditions; eight acres in ten hours would strike an average.

When used at stationary work and running at full power, at 1000 R. P. M., the fuel consumption does not exceed two and three-fourths gallons per hour.

The total weight of tractor is 2700 pounds, with water and fuel tanks filled. Overall length is 102 inches, height 55 inches and width 62 inches.

There won't be enough Fordson Tractors to go 'round!

THE demand for the Fordson tractor is so great that it will be a long time probably before everyone will be able to get one. Therefore, if you are looking for a tractor and wish a Fordson you should see us at once.

The Fordson has more than fulfilled expectations. With its economy—efficiency—durability—it is ideal for the average farm.

Burns kerosene—has special air washer—and all moving parts are enclosed—there is practically nothing to cause trouble.

Use it with the Oliver No. 7 Plow

Here are some of the big Oliver features: The combined rolling coupler and jointer buries all stalks, weeds and trash at the bottom of the furrow; and the stop device maintains an even depth of furrow. The best plow for your Fordson—that's the Oliver.

Come in and let us show them to you.

CORNER THIRD AND LARAMIE

How Great Organization Reduces Cost

ARMOUR and Company grew to be a great business institution by saving the things that formerly were thrown away on the farm.

Pig bristles on the farm are worthless. Through our methods they are utilized in brush-making. Certain glands in hogs, once thrown away when the farmer did his own killing, are now made into medicinal preparations of high value. Even the hoofs and bones are turned to commercial use.

Each of these products is useful, adds something to life, health or comfort.

Edible Pork Products

- | | |
|--------------|-------------|
| Loins | Tails |
| Shoulders | Kidneys |
| Tenderloins | Snouts |
| Fork Tips | Brains |
| Spare Ribs | Heads |
| Hocks | Slip Bones |
| Trimmed Neck | Sweetbreads |
| Bones | Feet |
| Boston Style | Ears |
| Butts | Livers |
| Cala Butts | Hearts |
| Blade Butts | Neck Fat |
| Neck Ribs | Melts |
| Ham Butts | Tongue |
| Rough Sides | Back Bones |
| Hams | Knuckles |

Inedible

- | | |
|-------------------|----------------------|
| Stearin | Blood Meal |
| Lard Oil | Meat Meal |
| Grease | Curled Hair |
| Glue | Bone Flour |
| Tankage | Covers for Glass |
| Leather | Stoppers |
| Bone Charcoal | Lard Containers |
| Phosphate of Lime | Sausage Casings |
| Granulated Bone | Bristles for Brushes |

The farmer shares in the returns from all these products. If it were not for the size of this organization and the facilities for transforming every

usable ounce of the hog, the packer would either have to charge the public more for pork or buy hogs from the grower at a lower figure.

The value of anything depends upon its ultimate usefulness. It is only because concerns like Armour have been developed to secure the utmost utility out of the livestock they buy that it is possible to pay farmers more for their animals and yet provide food for the public at true-value levels.

With large volume it becomes possible to make the heavy investments in machinery and equipment necessary to develop new processes and new products. Often it costs hundreds of thousands of dollars in research and experiment before a single pound of some new product can successfully be put upon the market. Such preliminary work is usually beyond the scope of institutions which lack these facilities.

It is in this way that the fundamental benefits of big business are made available to the public. It is a service that both saves for you and adds to your comfort and health.

You can continue to enjoy this service and aid in extending it still further by serving Armour Oval Label foods on your table.
