NEW SPRING MILLINERY AT A BIG SAVING

Owing to the demands made upon our sales force during our big stock reduction sale, we have therefore found it impossible to devote any time to the display of new spring merchandise. But so many of our customers have repeatedly asked that we supply their needs before Easter, we have secured a full line of the very newest Spring Hats by express direct from New York.

In appreciation of the continued patronage of our customers we will place these hats on special sale during the coming week and afford them an opportunity to effect savings up to forty per cent.

We want you to thoroughly understand that this event is for this week only and it is because of this fact that we are able to price such an exceptionally fine display of millinery on such a narrow margin of profit.

BY TAKING ADVANTAGE OF THIS SALE IT WILL BE POSSIBLE FOR YOU TO SAVE FROM \$5.00 TO \$7.50 AND EVEN \$10.00 ON YOUR SPRING AND SUMMER HATS.

They are alluringly picturesque and smartly trimmed. Shapes and trimmings are new and decidedly late. The complete line comprised the sample showing of one of New York's most exclusive stores and we were particularly fortunate in securing them in advance of other showings.

FARMERS AND LAND OWNERS

The "FORDSON" TRACTOR is the result of extensive trials and experiments conducted by Mr. Henry Ford, covering a period of many years. Before placing the tractor on the market, every detail has been thoroughly tried out under actual farming conditions in various parts of this country and abroad.

Experience has pointed to the small, light tractor as being the one machine which will fill all varying conditions satisfactorily.

In developing the "FORDSON" Tractor, the aim has been to produce a small tractor which will be low in first cost, reliable, and above all—efficient.

Being small, light and economical, the "FORDSON" Tractor is adapted for use on small farms as well as on the largest. It will pull all farm implements and do the work generally done by horses on the farm. In addition, by its belt pulley the tractor will drive farm machinery such as a thresher, ensilage cutter, etc., making the "FORDSON" a truly universal tractor.

In design and construction the "FORDSON" takes a long step in approaching the ideal tractor. The simplicity of its operation and construction will at once appeal to the farmer.

Special devices were perfected to keep out dust and dirt. All moving parts are enclosed and thoroughly lubricated. The number of lubricating points requiring attention are very few and easily gotten at.

The motor, transmission and rear axle are assembled together, forming one rigid unit, which, combined with the three-point suspension, relieves these parts of all strain.

The absence of any frame gives accessibility to all parts for making adjustments or repairs, and allows the tractor to be taken apart in a few minutes.

The motor is of substantial design and is capable of delivering its full power continuously. It embodies features which have been used with success in other fields for many years.

PERFORMANCE

The tractor is designed as a two-plow machine and will pull two 14-inch plows in the stiffest soil. It will maintain a drawbar pull of 1800 pounds at plowing speed. In low gear a drawbar pull of 2500 pounds is obtained.

The fuel consumption varies with conditions; two and one-half gallons of kerosene per acre being a fair average. The amount of ground plowed also depends on conditions; eight acres in ten hours would strike an average.

When used at stationary work and running at full power, at 1000 R. P. M., the fuel consumption does not exceed two and three-fourths gallons per hour.

The total weight of tractor is 1700 pounds, with water and fuel tanks filled. Overall length is 102 inches, height 55 inches and width 62 inches.

There won't be enough Fordson Tractors to go 'round!

THE demand for the Fordson tractor is so great that it will be a long time probably before everyone will be able to get one. Therefore, if you are looking for a tractor and wish a Fordson you should see us at once.

The Fordson has more than fulfilled expectations. With its economy—efficiency—durability—it is ideal for the average farm.

Burns kerosene—has special air washer—and all moving parts are enclosed—there is practically nothing to cause trouble.

Use it with the Oliver No. 7 Plow

Here are some of the big Oliver features: The combined rolling coulter and jointer buries all stalks, weeds and trash at the bottom of the furrow; and the stop device maintains an even depth of furrow. The best plow for your Fordson—that's the Oliver.

Come in and let us show them to you.
