Dense Philippine Forests.
You may cut an entrance into a Philippine lowland forest and so dense and high is the overgrowth that you feel as though you might be in a vast cathedral with only subdued rays of light entering here and there through window panes of heavily stained glass. The sun is completely obscured and it is impossible to tell the points of the compass. A twilight gloom pervades everything and it is useless to even guess the time of day.

SAGE AND SULPHUR DARKENS GRAY HAIR

It's Grandmother's Recipe to Restore Color, Gloss and Attractiveness.

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded, streaked or gray. Years ago the only way to get this mixture was to make it at home, which is wussy and troublesome. Nowadays, by asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this famous old recipe, improved by the addition of other ingredients, for about 50 cents.

Don't stay gray! Try it! No one can possibly tell that you darkened your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, and after another application or two, your hair becomes beautifully dark, glossy and attractive.

Wyeth's Sage and Sulphur Compound is a delightful toilet requisite for those who desire dark hair and a youthful appearance. It is not intended for the cure, mitigation or prevention of disease.

Female Executioner.

According to the London Sunday Times of February 15, 1829, the hangman who executed Burke had a wife whom he had instructed in the art and mystery of hanging. Dressed in man's attire, while he was executing criminals in one part of the country, his lady was giving effect to the law in another. Burke, it may be recalled, was an Irishman, who was in the habit of suffocating his victims and selling their bodies to the anatomists. He was hanged at Edinburgh on January 28.

Explaining History of Dress.

If one could only know the origin of all the many words we use in our daily talk, one would know much of the history of dress. Many of our most recently adopted clothes words come from France, but five hundred years ago dress terms more usually came from Italy, then the mecca of fashion. Hence, velvet came from "velluto," the Italian word to indicate shaggy. And "cameole," which has recently been revived from an earlier English usage, came from the Italian diminutive of chemise.

Robinson Crusoe.

Defoe based his story, "Robinson Crusoe," which made him famous, on the experiences of Selkirk, who was put ashore on Juan Fernandez Island, at his own request, as he had quarreled with the captain of the Claque Ports, of which he was sailing master. Selkirk remained on the island more than four years, and in 1712 there appeared his book, "Cruising Voyage Around the World," and Captain Cooke's "Voyage to the South Sea," which Defoe used as his basis.

Began the Bastille.

April 21 is the anniversary of the beginning of the building of the bastille in 1370 by Charles V, who erected it as a protection against the English. The prison became famous in French history and was finally destroyed by the people in 1789. The key was sent by Thomas Paine to George Washington.

Our Country's Birth.

Our country's independence dates from July 4, 1776, because the United States then declared its independence, and from that day on has maintained it. Great Britain acknowledged the independence of the United States by a preliminary treaty of peace dated November 30, 1782, and by the final or definite treaty dated September 3, 1783. This treaty was ratified by the continental congress January 14, 1784.

Added Information.

Little Vivian was repeating the Lord's prayer after her mother one evening, and when she reached that part which relates to our daily bread she paused and said: "Mamma, 'ou might mention to Dod zat I like butter on it."

No More Rudders.

A British patent has been granted for apparatus to steer vessels by pumping jets of water out of either side of the stern, thus doing away with rudders.

Seemed in Distress.

One Saturday morning Kermit's mother was baking pies. She asked Kermit to go open the oven door and see if the pies were getting too brown. As it happened, the oven was quite hot, and the juice was bubbling out of the top of the pies while the crust was heaving up and down. Kermit opened the oven door and said: "No, they're not too brown, but they're breathin' awful hard."

Telegraphing Pictures.

A French inventor's process for telegraphing pictures uses a system of hollows and reliefs, the passage of a stylus over which determines the intensity of the current transmitted.

Must Have Olive Oil.

Although olive oil as a food and medicinal oil can be replaced very largely by other vegetable oils, there are one or two technical uses, wool-spinning, for instance, for which no entirely satisfactory substitute has yet been found.

ORDER NOW PREPARE for WINTER

Dr. Garfield, United States Fuel Administrator, says:

"I feel bound to say that, as I see the situation, we are likely to experience a coal famine in the early fall unless the larger users of coal begin buying—"

"I do not think I would be doing my duty if I did not let the public know the situation.

"My advice to the public is to BUY COAL RIGHT AWAY."

W. B. Wilson of the United States Department of Labor:

"Those who postpone buying now in the hope of lower prices are speculating in the future misfortune of the nation."

Harry N. Taylor, President of the National Coal Administration:

"Those who are delaying the purchase of their coal supply will find themselves unable to secure the same later, in the fall, owing to the car and labor shortage."
