

WHEAT CROP IS LIGHT IN EAST HALF OF STATE

RUST, PRE-MATURE RIPENING AND LODGING ARE GIVEN AS CAUSES.

Yield Fully Twenty Per Cent Less Than Before Harvest Forecast Say Experts.

The winter wheat crop will not meet expectations on yield and quality according to the July 1 crop report released today by A. E. Anderson and E. R. Danielson of the bureau of crop estimates and Nebraska board of agriculture. A few days before harvest winter wheat had every appearance of a record breaking crop and even now the shocked wheat has the same appearance to many who have not handled the sheaves. Special reports of over 200 grain dealers and farmers made July 7th and 8th give the information that the yield will not exceed the ten year average. While there is considerable excellent wheat, they reported fully 25 per cent less than expected. Practically all call attention to a large per cent of poorly filled grain and many are greatly disappointed. Theories advanced as to the cause of this unexpected development are as follows: premature ripening caused by a few days of high temperatures during the ripening period, weakened vitality due to rust, the peculiar situation in which wheat turned from green to white suddenly instead of assuming the golden yellow and ripening properly, lodging, stands too heavy and rank, insects and blight. The July 1 condition of 90 per cent, which is fully 20 per cent less than expected prior to harvest, forecasts a production of 67,725,000 bushels compared to 82,478,000 bushels last year.

According to the reports received the damage seems to be confined largely to eastern and southern counties. The average yield from the counties reporting the greatest damage and from which an average of six special reports have been received from farmers and grain dealers based upon condition and not threshing returns are as follows: Adams 13 bu., Webster 16 bu., Phelps 17 bu., Clay 14 bu., Hamilton 16 bu., Polk 18 bu., York 16 bu., Butler 15 bu., Fillmore 14 bu., Thayer 15 bu., Jefferson 15 bu., Saline 18 bu., Gage 17 bu., Pawnee 13 bu., Johnson 18 bu., Nemaha 17 bu., and Richardson 17 bu.

The acreage of corn is estimated to be 6,745,000 acres compared to 6,954,000 acres last year. The condition last year. The condition is 88 per cent. Corn is very uneven both in size and stand, but is improving. There was considerable replanting due to insects and heavy rain. Cultivation was delayed by the frequent rains early in June.

Some of the spring wheat is badly damaged. The average condition is reduced to 89 per cent, which forecasts 12,141,000 bu. Certain yields have blighted and appear to bring the same disappointment as winter wheat. The total production of all wheat is 79,866,000 bu. compared to 83,141,000 bushels last year.

Barley maintained its high standard with a condition of 97 per cent and a forecast of 8,392,000 bushels. The condition of rye is 98 per cent and the expected production 7,049,000 bushels.

Practically all reports on oats are very favorable and the high condition of 95 per cent forecasts a production of 78,763,000 bushels compared to 56,188,000 bushels last year. Oats were comparatively free from red rust and outside of a few reports of damage from high temperatures and drouth a fine crop is expected.

The acreage of potatoes is estimated to be 115,000 acres compared to 121,000 acres last year. The condition of 91 per cent indicates a production of 9,523,000 bushels. The crop is generally very promising except in parts of western Nebraska where the rainfall has been deficient.

A bumper crop of wild hay is assured. The second crop of alfalfa promises to be large even though slightly damaged by insects. The yield of clover is exceptionally good. The condition of pasture remains excellent. All vegetables are good.

The preliminary estimate of sugar beets is 60,000 acres compared to 43,000 acres last year. There is considerable damage from insects.

Estimates of important crops for the United States are as follows: winter wheat \$39,000,000 bu. compared to 558,449,000 bushels last year; spring wheat 322,000,000 bu. and 358,651,000 bu. last year; all wheat 1,161,000,000 bu. compared to 917,100,000 bu. last year; corn 102,979,000 acres compared to 107,494,000 acres last year and a production of 2,815,000,000 bu. compared to 2,582,814,000 bu. last year; oats 1,483,000,000 bu. compared to 1,538,359,000 bu. last year.

Tip to Authors.

A youthful aspirant applied to a successful authoress for advice as to how to succeed in literature. "You need indomitable perseverance, a typewriter and a mangle," was the reply. "Do you mean I had better take in washing?" asked the aspirant. "Nonsense! You need the mangle to take the creases out of your manuscripts. Mangle them well, and then, unless the editors have burned them with cigarette ash, no one can tell they have been out before."

Baboons Fierce Fighters.

When they are being hunted with dogs an old baboon that is cornered seizes an attacker with one hand by the nearest limb, and, gathering up a fold of skin in the other hand, tears it off, and throwing aside his victim, waits for the next. In this way he will often kill several dogs before he gives up the fight.

ALLIANCE EVIDENCE FOR ALLIANCE PEOPLE

The Statement of Alliance Residents Are Surely More Reliable Than Those of Utter Strangers.

Home testimony is real proof. Public statements of Alliance people carry real weight.

What a friend or neighbor says compels respect.

The word of one whose home is far away invites your doubts.

Here's an Alliance man's statement.

And it is for Alliance people's benefit.

Such evidence is convincing.

That's the kind of proof that backs Doan's Kidney Pills.

G. H. Williams, stationary fireman, 421 Yellowstone St., says: "My back was lame and ached steadily and heavy work would bout use me up. Doan's Kidney Pills relieved me and I endorse them as a first class kidney medicine."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Williams had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

Sensitive Squabs.

French scientists believe that carrier pigeons are influenced by magnetism, and that with the spread of wireless telegraphy much less dependence can be placed on them.

after meals, dissolved on the tongue—keep your stomach sweet—try Ki-moids—the new aid to digestion.

MADE BY SCOTT & BOWNE MAKERS OF SCOTT'S EMULSION

We Know Them. "Twobble is always being mentioned for some kind of office. I wonder why he never gets appointed to one?" "I suspect that's because Twobble's friends are the sort of people who wish you well without stopping to see whether their wishes are carried out or not."—Birmingham Age Herald.

Not Like a Circus.

Herbie volunteered to take his aunts out walking. They went to the big museum, and one aunt asked, "I wonder if they charge admission." Herbie reassured them: "Oh, no, aunts, you don't have to pay here, this is a museum, all the animals are dead."

THE MOST DANGEROUS DISEASE

No organs of the human body are so important to health and long life as the kidneys. When they slow up and commence to lag in their duties, look out! Find out what the trouble is—without delay. Whenever you feel nervous, weak, dizzy, suffer from sleeplessness, or have pains in the back—wake up at once. Your kidneys need help. These are signs to warn you that your kidneys are not performing their functions properly. They are only half doing their work and are allowing impurities to accumulate and be converted into uric acid and other poisons which are causing you distress and will destroy you unless they are driven from your system.

Get some GOLD MEDAL Haerlem Oil Capsules at once. They are an old, tried preparation used all over the world for centuries. They contain only old-fashioned, soothing oils combined with strength-giving and system-cleansing herbs, well known and used by physicians in their daily practice. GOLD MEDAL Haerlem Oil Capsules are imported direct from the laboratories in Holland. They are convenient to take and will either give prompt relief or your money will be refunded. Ask for them at any drug store, but be sure to get the original imported GOLD MEDAL brand. Accept no substitutes. In sealed packages. Three sizes.

Get the Habit of Drinking Hot Water Before Breakfast

Says we can't look or feel right with the system full of poisons.

Millions of folks bathe internally now instead of loading their system with drugs. "What's an inside bath?" you say. Well, it is guaranteed to perform miracles if you could believe these hot water enthusiasts.

There are vast numbers of men and women who, immediately upon arising in the morning, drink a glass of real hot water with a teaspoonful of limestone phosphate in it. This is a very excellent health measure. It is intended to flush the stomach, liver, kidneys and the thirty feet of intestines of the previous day's waste, sour bile and indigestible material left over in the body which if not eliminated every day, become food for the millions of bacteria which infest the bowels, the quick result is poisons and toxins which are then absorbed into the blood causing headache, bilious attacks, foul breath, bad taste, colds, stomach trouble, kidney misery, sleeplessness, impure blood and all sorts of ailments.

People who feel good one day and badly the next, but who simply can not get feeling right are urged to obtain a quarter pound of limestone phosphate at the drug store. This will cost very little but is sufficient to make anyone a real crank on the subject of internal sanitation.

Just as soap and hot water act on the skin, cleansing, sweetening and freshening, so limestone phosphate and hot water act on the stomach, liver, kidneys and bowels. It is vastly more important to bathe on the inside than on the outside, because the skin pores do not absorb impurities into the blood, while the bowel pores do.

To the Woman Who "Never Has Any Luck Putting Up Fruit and Berries"

How even a Beginner can be Sure of Perfect Results in Making Jams, Jellies and Preserves

Good home preserving is now easy to accomplish. Even the housewife who "never has any luck" with all sugar preserving can put up fruit perfectly if she will first make her preserving syrup with 1/2 Karo (Red Label) and 1/2 sugar—instead of sugar alone.

By this method you can always have the finest, most delicious jams, good clear jellies, and preserves with a rich, heavy syrup. Karo is a fine, clear syrup, with a natural affinity for the fruit juices.

It blends the fruit with the sugar, doing away with one of the great difficulties of putting up fruit at home, and just about cutting the work in half.

You can depend on it that fruit put up by this method will never grow tough or "candy" in the glass.

For Cooking, Baking and Candy Making Karo (Red Label) is used in millions of homes. In all cooking and baking recipes use Karo instead of sugar. It is sweet, of delicate flavor, and brings out the natural flavor of the food.

FREE The experienced housewife as well as the beginner will find unusual interest in the new sixty-eight page Corn Products Cook Book. Beautifully illustrated—and suggestions galore for preserving, etc. It is free—write us today for it.
