

## AVERAGE WHEAT YIELD BETTER THAN LAST YEAR

TEST OF GRAIN IS CONSIDERABLY LOWER THAN NORMAL.

Crop Conditions in General Not as Good as Reported Month Ago is Claim.

Winter wheat will average 14.0 bushels per acre according to the preliminary estimates on yield just announced by A. E. Anderson and E. R. Danielson of the Bureau of Crop Estimates and Nebraska Board of Agriculture. The yield was 11.1 bushels last year and the ten year average 17.4 bushels. The total production is 49,000,000 bushels compared to 33,470,000 bushels last year. The test ranges from 63 pounds to 48 pounds or less, the average being considerably lower than usual. The weather was generally excellent for harvesting and threshing. A large per cent of the crop was stacked.

The condition of spring wheat at the time of harvest was 51 per cent compared to 89 per cent a month ago. Spring wheat is a greater disappointment than winter wheat, due largely to black stem rust although other factors may be partly responsible. The indicated yield is 8.9 bushels per acre compared to 11.9 bushels last year, and the production 7,246,000 bushels compared to 9,663,000 bushels last year. The preliminary estimate of all wheat is 56,246,000 bushels compared to 43,141,000 bushels last year.

The August 1 condition of corn was 81 per cent compared to 88 per cent a month ago, which indicates a production of 174,830,000 bushels compared to 123,086,000 bushels last year. The deterioration is confined largely to counties south of the Platte river and extending westward from the Missouri river to Adams and Franklin counties. This section of the state was in very critical condition, much of the corn being stunted and some of it had begun to fire. The balance of the state with few exceptions was in good condition. Central, south-central and some of the western counties had an excellent condition. Northeastern Nebraska was in good condition, but was needing rain.

The condition of oats at the time of harvest was 85 per cent to 95 per cent a month ago. This indicates a production of 73,408,000 bushels compared to the final estimate of 56,188,000 bushels last year. The southeastern quarter of the state has a better crop of oats than the north-eastern quarter, which is rather exceptional. There was very little rust on oats grown south of the

Platte river, which may account for the relatively better yield than winter wheat as both crops ripened under similar weather conditions and oats are considered to be more susceptible to damage from high temperature than wheat.

The condition of barley at the time of harvest was 85 per cent, which should give a production of 7,880,000 bushels compared to 5,660,000 bushels last year. The preliminary estimate on yield of rye is 14.5 bushels and the production 5,359,000 bushels compared to 5,005,000 bushels last year.

The condition of potatoes was reduced from 91 per cent to 69 per cent during the past month. The indicated production is 8,411,000 bushels compared to 10,406,000 bushels last year. High temperatures, drought and insects are largely responsible for the lowered condition. On account of reduced acreage and low condition, the commercial crop promises a much smaller crop than last year. Moisture is needed at once to prevent further deterioration.

The condition of all hay is good. The yield of wild hay is excellent. The first crop of alfalfa was very large and the second crop was good. These sections, which have been favored with moisture last month, will have a good third crop while in other sections the crop has been damaged by drought.

The condition of sugar beets is 87 per cent compared to 89 per cent a month ago. Insects were in much evidence this year and the supply of irrigation is reported to be short. The acreage is the largest in the history of the state.

Estimates of important crops for the United States are as follows: Winter wheat, 715,000,000 bushels compared to 558,499,000 bushels last year. Spring wheat, 225,000,000 bushels compared to 358,651,000 bushels last year. All wheat 940,000,000 bushels compared to 917,100,000 bushels last year. Corn 2,788,000,000 bushels compared to

2,582,814,000 bushels last year. Oats, 1,266,000,000 bushels compared to 1,538,359,000 bushels last year.

## WILL PRAISE IT ALL OF HER LIFE

Mrs. Edwards Has Gained Fourteen Pounds by Taking Tanlac.

"I weigh just fourteen pounds more than I did when I commenced taking Tanlac a short time ago, and my troubles have been completely overcome," said Mrs. Nancy Edwards who lives at 5620 East 13th Street, Kansas City, Mo., while talking to a Tanlac representative the other day.

"About two years ago," continued Mrs. Edwards, "I began to have stomach trouble, and until I commenced taking Tanlac, my condition had gradually grown worse all the time. In fact, I had reached the point where I was so weak and run down that I was hardly able to get about. Everything I ate disagreed with me, and the gas that formed from sour, undigested food, would make me miserable for hours at a time. I would have raging headaches nearly every day, and was so nervous all the time that the least noise would upset me, and when night came on it was a hard matter for me to get off to sleep. I often had such bad dizzy spells that I could hardly stand on my feet. The different medicines and treatments I tried didn't do me any good at all.

"My daughter had been taking Tanlac, and it had done her so much good that I decided to give it a trial myself, and I can honestly state that by the time I had finished my first bottle I was feeling like a different person. Well, I just kept on getting better, and now since taking three or four bottles of Tanlac, I am enjoying the best of health in every way. I never had a better appetite, and what I eat agrees with me perfectly,

and I never have a sign of indigestion or stomach trouble of any kind. The nervousness has left, and I get plenty of good sound sleep every night, and I have gained so much in weight and strength that I can do all my household work without the least trouble. Those awful headaches are gone, too, and that alone would make me praise Tanlac the longest day I live."

Tanlac is sold in Alliance by F. E. Holsten, in Hemingford by Hemingford Merc. Co., in Hoffland by Maltery Grocery Co.

## LAKESIDE FIRE LOSSES COVERED BY INSURANCE

The Lakeside Sun is authority for the following list of fire losses and the amounts of insurance carried on the properties destroyed or damaged in the recent big fire:

Crowther's Quality Store, building and contents and lumber yard, etc., loss \$45,000; insurance \$30,000.

Lakeside Mercantile Co. lost two buildings, the barn where the fire started and a lumber yard—loss \$20,000; insurance \$15,000.

Chas. Ryland hotel, building and contents, loss \$11,000; insurance \$7,000.

F. H. Palmer, four buildings—loss \$20,000; insurance \$15,000.

E. J. Brown cafe and contents and barber and household goods—loss \$1,000; insurance light.

M. D. Eastly lost plant of Lakeside Sun and household goods—loss \$1,000; insurance none.

C. A. Simmons, barber shop, building and contents—loss \$400; insurance none.

Walter Hendrickson, household goods—loss \$700 insurance \$500.

## KI-MOIDS

the new aid to digestion comfort today. A pleasant relief from the discomfort of acid-dyspepsia.

MADE BY SCOTT & BOWNE MAKERS OF SCOTT'S EMULSION

**Telegraphing Pictures.**  
A French inventor's process for telegraphing pictures uses a system of hollows and reliefs, the passage of a stylus over which determines the intensity of the current transmitted.

**Keep Teeth Clean.**  
An English physician has advanced the theory that the juices of the mouth are intended to keep the teeth clean, not to prepare food for digestion, as generally believed.

**The Post of Permanence**

The post that drives like a stake—that requires no hole digging—that is cheaper installed than wood or concrete posts—that lasts!

Let us demonstrate

## Red Top Steel Fence Posts

made of durable A-1 angle steel—rot-proof—fire-proof—unbreakable. Used extensively by the U. S. Government.

Protects cattle from lightning—permits fence line burning—improves and beautifies your property—saves work.

Sharp bevel edged points make it easy to drive. Patented anchor plate makes it bind tight in any soil.

Ask for the post with the RED HEAD. Come in today; no obligation to buy.

## The BLACK and WHITE SHOW WINDOW

Everybody gets both pleasure and profit from looking at the ordinary show window. But you get the most from the Black and White Show Window—the advertising columns of your newspaper. Here the best things from your own town and from places far away are displayed. Here you judge the respective merits of articles placed side by side without the glitter and dazzle of lights and mirrors.

People who look at this advertising Show Window buy more intelligently. They purchase knowing the merits of the particular article bought. They know the best products of practically every line of manufacture.

Read the messages directed to you today—every day. Manufacturers miles away and people right here in town, who feel they have something worth talking about, are addressing you. The best of their wares are spread out on these printed pages. They are publicly making certain claims on the fulfillment of which depends their commercial success. These claims are well worth your consideration.

Cultivate a closer acquaintance with advertising. Your pocketbook really stretches if you know where to get the most value for your money. The advertisements give you that knowledge very completely.

## Only ONE out of 147 does it!

There are actually over 147 brands of cigarettes sold in this country. But not one of them does what Chesterfields do, for Chesterfields do more than please the taste—they touch the smoke-spot—they let you know you are smoking—they satisfy!

It's all in the blend—a blend of fine selected TURKISH and DOMESTIC tobaccos—just the right kind and the right quantity of each.

There never was a cigarette that grew faster in popular favor because no cigarette ever gave such value.

Prove it! Smoke a Chesterfield fresh from the moisture-proof package.

*Liggett & Myers Tobacco Co.*

# Chesterfield CIGARETTES

—of Turkish and Domestic tobaccos—blended

This is the package with the moisture-proof jacket that keeps Chesterfield's original freshness and flavor intact.
