

PIPE LINE FROM MULE CREEK FIELD

Illinois Pipe Line Company Secures Contract for Oil Pipe Line From Field to Dakoming, Wyo.

According to the Casper Daily Tribune, production from the Mule Creek oil field in eastern Wyoming, eighteen miles west of Edgemont, South Dakota, will shortly have an outlet through the construction of a pipe line, contract for which has been awarded to the Illinois company, together with plans for storage facilities. Connections will be made with the railroad at Dakoming, Wyo., on the state line.

Field reports now show seven producing wells in the field, with an average production of 150 barrels per day each at a depth of about 1,400 feet. Drilling on sections 30 and 25, in the south end of the field, indicate that the southern and western part of the field will prove to be the most productive.

There are now a total of fifteen rigs in the field and drilling is going on at a rapid rate. A Star 28 drilling rig and outfit was purchased the last of the week by the Nebraska men who are organizing the Wyoming Northeastern Oil company at Alliance, of which F. A. Bald will be president and Lloyd C. Thomas, secretary. This rig is being moved to the field this week and they expect to be ready to commence drilling on their holdings in the field within a short time. They have 3,400 acres in the field, in different locations, and are preparing for active work on the same.

The Midwest now has under construction permanent camp on its lease on 24-39-61 and has also made location for wells on the southwest quarter of the northwest quarter of 30-39-60, the southeast quarter of the northwest quarter of section 25 and the southeast quarter of the southwest quarter of section 25, both in 39-61.

The Sterling Oil company's well on 14-39-61 is waiting for cement to set and will start drilling again in a short time. This well pumped 2 barrels of oil per hour for ten hours before the water broke through. The depth is approximately 900 feet.

The Upton Oil company is drilling at 900 feet on the northeast quarter of the northeast quarter of 2-38-61 and the formation of this well at 800 feet was identical with the formation of the Ohio and Midwest wells at 1,100 feet, a development that is hailed with considerable significance by operators in the field.

The Mike Henry well on the southeast quarter of 1-38-6 is closed down at 250 feet for boiler repairs.

The Van Deusen Oil company has erected camp and building a rig for a well on the northeast quarter of 12-38-61, while DeBolt and Sayre have completed a camp and are drilling at 350 feet on the northwest quarter of 13-38-61.

The Lusk drilling and Holding syndicate is building a rig on the northwest quarter of 16-38-61.

The combined activities of all companies operating in the field indicate a steady increase in production and no surprise would be created if the possibilities of the structure should loom large during succeeding weeks, by reason of new and important strikes.

Soldiers' Superstition.

Cavalrymen have a superstition of their own. A mounted man firmly believes that he will come through the deadliest charge unscathed if he carries on his person the tooth of a war horse, the only condition being that the horse itself has, at some time, been through a charge.

SAYS HOT WATER WASHES POISONS FROM THE LIVER

Everyone should drink hot water with phosphate in it, before breakfast.

To feel as fine as the proverbial fiddle, we must keep the liver washed clean, almost every morning, to prevent its sponge-like pores from clogging with indigestible material, sour bile and poisonous toxins, says a noted physician.

If you get headaches, it's your liver. If you catch cold easily, it's your liver. If you wake up with a bad taste, furred tongue, nasty breath or stomach becomes rancid, it's your liver. Sallow skin, muddy complexion, watery eyes all denote liver uncleanness. Your liver is the most important, also the most abused and neglected organ of the body. Few know its function or how to release the dammed-up body waste, bile and toxins. Most folks resort to violent calomel, which is a dangerous, salivating chemical which can only be used occasionally because it accumulates in the tissues, also attacks the bones.

Every man and woman, sick or well, should drink each morning before breakfast, a glass of hot water with a teaspoonful of limestone phosphate in it, to wash from the liver and bowels the previous day's indigestible material, the poisons, sour bile and toxins; thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

Limestone phosphate does not restrict the diet like calomel, because it can not salivate, for it is harmless and you can eat anything afterwards. It is inexpensive and almost tasteless, and any pharmacist will sell you a quarter pound, which is sufficient for a demonstration of how hot water and limestone phosphate cleans, stimulates and freshens the liver, keeping you feeling fit day in and day out.

SPRAGUE TIRES

"Made in Nebraska"

The Tire for Western ROADS

LONG experience with motor cars and long observation of mileage on western roads convinced E. H. Sprague, president of the Sprague Tire & Rubber Co., that an extra ply of fabric would materially lengthen the life of a tire run continuously on these roads. That is why you will find an

Extra Layer of Fabric in SPRAGUE TIRES

The wisdom of Mr. Sprague's judgment is being proven by Sprague Tires on thousands of motor cars.

They are proving their mileage value and are giving their owners more miles for less money.

Because of their extra heavy sidewall and tread, they withstand in a remarkable manner the ruts and bumps of western roads.

Sprague Tire & Rubber Co.

18th and Cuming Streets, OMAHA, NEB.

SMALL CHURCH HAS HISTORY

Many Reasons Why Little North Devonshire Edifice Appeals to the Tourist of Leisure.

It has an odd sound, "Brent Tor," hasn't it? And it is just as odd as it sounds. Brent Tor is a little bit of a stone church built high on the frowning cliffs of the wild North Devonshire coast in England. The church is so little that a Devonshire yokel with a keen sense of humor is said to have inscribed this cryptic warning, which puzzled many a simple-minded Devonshire farmer: "If you get into the second aisle of Brent Tor, you will never get out again." There is no second aisle in the wee church at all.

Brent Tor was built centuries ago by a man who was lost among the steep cliffs and rushing waters of the wild North Devon coast. The fog mists enveloped him. In his anguish as the roar and spray of the cold Atlantic assailed him he vowed solemnly that if he ever came safely out of the fog without pitching into the growling ocean he would build a church where he landed. Brent Tor was the result.

The good folk 'round about Devonshire tell how the devil tried to hamper the building of the little church. At last St. Michael de la Ruppe, to whom it was dedicated, grew weary of having the devil interfere with the proceedings and heaved a great mass of cliff at his satanic majesty. There was no further trouble.

A peculiarity of Brent Tor is the fact that it can be seen from all directions—it is a veritable landmark. Before it toss the restless waves of the Atlantic ocean and behind it slope the undulating Devonshire moors.

Use Time to Advantage.

Time, which never stands still itself, will not allow any one of us to stand still. It delivers into our hands sixty minutes every hour and compels us to dispose of them in some way. Whether we will or not, a constant accounting has to be rendered. One who falls into the habit of dissipating time dissipates not only opportunity but happiness, for the spendthrift of time becomes a spendthrift of the other things which make life worth while.—Forbes Magazine.

EAT LESS AND TAKE SALTS FOR KIDNEYS

Take a glass of Salts before breakfast if your Back hurts or Bladder bothers you.

The American men and women must guard constantly against Kidney trouble, because we eat too much and all our food is rich. Our blood is filled with uric acid which the kidneys strive to filter out, they weaken from overwork, become sluggish; the eliminative tissues clog and the result is kidney trouble, bladder weakness and a general decline in health.

When your kidneys feel like lumps of lead; your back hurts or the urine is cloudy, full of sediment or you are obliged to seek relief two or three times during the night; if you suffer with sick headache or dizzy, nervous spells, acid stomach, or you have rheumatism when the weather is bad, get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate clogged kidneys; to neutralize the acids in the urine so it no longer is a source of irritation, thus ending bladder disorders.

Jad Salts is inexpensive; cannot injure, makes a delightful effervescent lithia-water beverage, and belongs in every home, because nobody can make a mistake by having a good kidney flushing any time.

Baboons Fierce Fighters.

When they are being hunted with dogs an old baboon that is cornered seizes an attacker with one hand by the nearest limb, and, gathering up a fold of skin in the other hand, tears it off, and throwing aside his victim, waits for the next. In this way he will often kill several dogs before he gives up the fight.

"FAKE" ASPIRIN WAS TALCUM

Therefore Insist Upon Genuine "Bayer Tablets of Aspirin"

Millions of fraudulent Aspirin Tablets were sold by a Brooklyn manufacturer which later proved to be composed mainly of Talcum Powder. "Bayer Tablets of Aspirin" the true, genuine, American made and American owned Tablets are marked with the safety "Bayer Cross." Ask for and then insist upon "Bayer Tablets of Aspirin" and always buy them in the original Bayer package which contains proper directions and dosage. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.
