# Save the Coal!

Do Your Part to Meet the Appeal of the Fuel Administration

It is the duty of everyone to save every pound of coal possible. To strive to do all in their power to help the Fuel Administration. Following are the rules given out by the Fuel Commissioner, which were clipped from a daily newspaper:

**ORDERS ISSUED BY THE FUEL COMMISSIONER**

Alliance's chief source of supply since the strike began and Wednesday these mines produced only 40 per cent of normal capacity, according to Snyder.

**New Orders to City Manager**

To extend its program still further, the committee Wednesday night issued the following order to Alliance:

Do not take an order if the purchaser has a six days' supply.

Insist that every purchaser cut down consumption of fuel by the following methods:

Close unused rooms.

Turn off your registers and radiators.

Reduce maximum temperature in homes to 65 degrees and still lower in business places.

Keep windows and doors closed.

Put more clothes on your back and less coal on the fire.

Florists are to be allowed a certain amount of heat to save flowers and

THESE rules will be followed by all Alliance, and as every room possible will be cut off from heat, and houses and apartments in general will be more or less chilly—wise people will take every precaution to prevent taking colds.

—People will dress warmer than heretofore.

People are going to wear heavier underwear. Women are going to wear heavier petticoats and negligees.

Men and women will wear flanellette night gowns and pajamas.

Heavy bathrobes will be universally used.

People will wear sweaters and scarfs when the house is cool or when going into cold rooms.

Warmer clothing will be needed for the children.

More blankets will be needed for the beds.

When these things are provided for your protection, your conservation of fuel will be safe.

Here are some of the things we have to help you find the desired comfort and protection.
