Telephone Equipment Shortage Is Becoming Serious

There is a world-wide scarcity of raw materials, especially wood, paper and metals. These products are very essential in the manufacture of telephone supplies.

This shortage of material, in addition to the steadily increasing demand for telephone service, is making it impossible for the factories to promptly meet the need for telephone instruments, wire, switchboard and other equipment.

Every effort is being made to take care of the telephone requirements of our patrons as quickly as possible, but because of existing conditions we may not be able to change or install equipment without considerable delay.

Please let us know as far in advance as possible when you want a telephone installed or if a change in your equipment is desired.
