

**WILL DRILL FOR OIL
IN SHERIDAN COUNTY**

It is said by those who ought to know that Sheridan county is in the oil belt that comes down from Wyoming and steps are being taken to test this on a large scale. July 7th a meeting was called at the Pfister Hotel for the purpose of organizing the Big Chief Development Co. This was followed by another enthusiastic meeting July 12th, when the organization was completed and the following officers elected: President, Wm. G. Vahle; vice president, G. A. Ostrander, treasurer, Herman Miller, secretary, H. S. Gillespie. The company have opened an office in the Graeber block and stock is being liberally subscribed for.

Fifteen hundred acres of land north of Rushville has been leased where the indications are good and based on geological surveys. Besides these 800 acres more are being contacted for but the deal for these is not closed. The new company are meeting with every encouragement by many of our home people, as well as others who formerly lived here. We have the names of some, two of which desire to take \$3,000 between them. The amount of shares issued calls for \$25,000 when the machinery will be put on the ground as soon as it can be shipped. There is no secrecy about the Big Chief—Rushville Standard.

LAKESIDE

Mrs. George Lindly and children returned from Forest Grove, Ore., Thursday after a few weeks visit with relatives at that place.

Opr Hane is enjoying a visit with her little sister this week.

Mrs. Grubb and children of Whitman, were Lakeside visitors Thursday.

Jola Speer is visiting at the Ray Westover ranch at the present time.

Ellsworth Ash was in town Friday.

Wilma and Beatrice Westover were in town Thursday and as they were returning home the team ran away but fortunately no one was injured.

Mrs. Myrtle Morris returned July 27th from a visit with relatives in Denver.

Mrs. O. E. Black entertained the Ladies Kensington club at her home Thursday afternoon.

Jesse Brice was shopping in Lakeside Friday afternoon.

Will Ryland went to Omaha last week.

Roy Stoop drove in from the Star ranch Thursday evening.

Mrs. Anna Hunsaker and daughter Doris were west bound passengers Friday.

Mrs. Lenora Kennard of Fort Dodge, Ia., is visiting her parents, Mr. and Mrs. W. H. Hudson at the first Lakeside hotel.

Frank Bollenger was delivering potatoes in town Saturday.

Frank Kiecku was in Friday from his ranch. He brought in some fresh vegetables.

Mr. and Mrs. Geo. Lindley and children drove to Antioch Friday afternoon.

Dr. Hand was down from Alliance on professional business Sunday.

Clyde Fosdick and family spent the week-end at the home of Mrs. Fosdick's parents, Mr. and Mrs. J. D. Whaley.

Dr. Moore of Antioch, was in Lakeside Sunday.

Nelda Pollard returned Saturday from a two weeks visit with her sister at Halsey.

Lon Trester and son, Ralph, drove in Sunday morning.

Neil Ballinger and Jesse McCarty were Lakeside visitors Sunday.

Grover Cameron was in from his ranch Friday.

Miss Bronnen of Alliance, who has been visiting her friend, Mary Herman, returned home Sunday on No. 25.

Geo. Baney and family have moved to Newman Grove, Neb.

Lee Taylor was in town Monday morning.

Steve Saitenetz left Monday on No. 40 for Chicago for a few days.

Roy Ritter and family moved to the McKinley place recently.

We were blessed with a nice rain Sunday evening.

A. W. Tyler and son, Ed, were in from the ranch Monday.

MYSTERY

It was bedtime, and the children were calling eagerly for the usual evening story. Two books lay on the table, one stories from the Bible, the other Barnum's tales of the wild animals captured for his Great Show. "Which shall it be, little ones—Bible stories or Barnum's stories?" Quickly came the reply, "Oh! Bible stories; they are so exciting. You never know what God will do next."

HELPING OUT NATURE

In the search for increased production it has been discovered that phonographic music at milking time in winter makes cows give eleven per cent more milk, and that electric light and steam heat make hens lay better. So man's improvements continue to beat nature. Next to come are sanitariums for exhausted cows, and rest-cure factories for treating hens that have overdone.—Late.

Anyway, the home garden goes well with overalls and bungalow aprons.

Aids to Grace and Beauty

Some Summer Suggestions

In these hot summer days it is more necessary than ever to guard one's complexion against the sun, salt water and dust.

Many young girls, who are fortunate enough to be able to spend the summer at the beaches, give no care to the face, neck and arms during the period that these parts are so carelessly exposed to the elements.

They allow a coat of tan to gather over a terrific sunburn, their arms freckle and sun become fat and overweight in the days of idleness spent in lounging around the sands and hotel piazzas. This is not the way to spend a vacation so that it will do you good, as vacations are intended to do.

A rest is all right. We all need vacations, but we want to see that they benefit us and not return much the worse for wear.

When you start for the seaside, see that you are properly equipped with the necessary toilet articles for some line of defense against Old Sol.

A cream to put on as a foundation for powder and rouge, is the first thing to be considered. Any toilet article firm makes such a cream. If you ask in a reliable drug store for a foundation cream, you will doubtless be successful in getting the right article.

Then there is a night cream. This is the most essential of all. Do not

retire without first having removed the traces of the day's toil. While you sleep the little particles of dust and dirt can play havoc with your skin, as you will soon find out if you do not apply a little preventative.

A night cream is an easy thing to get and at the same time buy a lotion to put on the arms and neck and face after swimming. The face burns the quickest if the sun is allowed to dry it while wet with salt water. A lotion made of honey, almonds and rose water is the best and may be purchased with the other articles.

A very important and unusually overlooked factor in the summer vacation kit is a prevention for perspiration.

It makes no difference how prettily you are dressed, or how smart your appearance, a woman is never beautiful with perspiration odors about her. There are many remedies for excessive perspiration. Some are liquids, others salves, etc., but I know of something that is by far more effective and less expensive; plain Bicarbonate of Soda.

Apply the soda as you would powder, night and morning and you will never be troubled with perspiration. It is used before and after bathing as well.

If you spend your vacation at a hotel, don't hang around like a listless flower, gossiping and crocheting if you do you will be fat as sure as

you are alive. Nothing puts on weight more than eating a great deal, little exercise and fresh air. There are plenty of things to do. Hustle around and find them. I can't tell you, for I do not know the place you may select, but if you will take my advice, you will go into the heart of the woods and camp, fish, swim and have a regular vacation. Deliver me from hotels.

As for clothes, dress loosely. Don't wear your clothes as tight as you do in winter. Allow plenty of room to breathe. The dresses of the mode are designed to give plenty of room for action. Breathing; eating and dancing. You can be fashionable and comfortable.

Don't over eat and when you do eat salads, cold meats and drinks are the best for hot weather. You are not so much in danger of heat and nervous prostration when you refrain from overheating the body. Avoid steaks, chops, hot soups and heavy dining.

Last but not least keep calm. Don't rush and tear around as if the next minute on earth was to be your last. We Americans hurry too much. Summer or winter they never slacken their speed and very soon the machinery wears out. You cannot be beautiful and chase a street car or train. Take it easy and you will get out of the summer the thing for which it is intended, rest and relaxation.

AT THE MOVIE
Wife (dabbing her eyes): Just

look at those big tears on the poor girl's face, dear!

Hubby: Fresh from the glycerine bottle.

Wife (in a fierce whisper): Always taking the little joy out of my life, brute that you are!—Buffalo Express.

Two employing printers were recently talking shop at our table. One of them remarked: "I notice printers are beginning to cut prices." Said the other with that sarcasm that printers know so well how to use on occasion: "I didn't know they had stopped."—America's Printer.

OR CALL YOU TO MESS

Farmer (to one of his laborers, recently demobilized): Well Pat, which do you prefer, being a farmer or a soldier?

Pat: In one way, sir, I'd rather be a soldier.

Farmer: And how is that?

Pat: Well, you see, you'd be a long time workin' for a farmer before he'd tell you to stand at ease. —Boston Transcript.

50-50

The soldier had been severely wounded, and during the convalescent stage was ordered sherry and egg.

One day the doctor attending him asked how he liked the diet.

"Well", said the blue boy, "if the sherry was as old as the egg and the egg as fresh as the sherry, I believe I would enjoy it as much as anything else I could think fo."—Pittsburg Sun.

**WYOMING OIL
IN THE LEAD**

Our neighboring state will solve the problem of the shortage of gasoline and oils by increased production from its new fields—you should take advantage of the profits to be made

The eyes of the oil world are turning towards Wyoming. California is experiencing an actual gasoline shortage at the present time; many of the mid-continent fields are showing rapid decreases in production; the state of Wyoming is rapidly increasing its production and during coming months the drilling in new fields will continue rapidly

Oil production in Wyoming is steadily increasing. There were marketed from Wyoming oil fields in the year 1916 a total of 6,234,137 barrels; in 1917, 8,978,680 barrels; in 1918, 12,810,230 barrels; in 1919, 13,877,640 barrels; according to reliable reports furnished to us. No other business in the world offers such unlimited opportunities for the legitimate accumulation of wealth as the American oil industry.

It is estimated on good authority that Wyoming's available oil, stored in the earth, is not less than 400,000,000 barrels. And only about 9.5 per cent has been extracted, as compared with 33.1 per cent in California, 61.4 per cent in Illinois, 69.1 per cent in the Appalachian fields, and 36.2 per cent in the mid-continent fields of Oklahoma, Texas and Kansas. No other business in the world has so continuously and so certainly returned enormous profits to investors, and no other business in the world has ever assembled for and widely distributed among its supporters so many great fortunes.

Experts state that yields of 40 barrels per day to the well is the average production of the Wyoming oil fields, as compared to an average of only 4½ barrels per day to the well for the entire United States. Wyoming had 1,327 producing wells in 1918 and 1,630 producing wells in 1919. The year 1920 will go far ahead of this. No other business in the world exists, that having accomplished such marvelous results, as the oil business, still continues to offer the same wonderful opportunities for the discerning investor.

Constant increases in the prices of crude oil has caused unprecedented activity in the Wyoming oil fields. Hundreds of wells are being drilled in proven fields and hundreds of prospect wells are being drilled in new and unproven fields. The present market price of crude oil in Wyoming is from \$2.75 to \$5.25 per barrel. Oil is the most profitable, legitimate and essential business in the world today.

Authorities state that gasoline extraction from Wyoming crude oil is the highest of any field in the United States, being from 32 to 53 per cent, as compared to 24 per cent in the mid-continent, 28 per cent in the Appalachian and 12 per cent in the California fields. The Wyoming wells not only give very large initial production, but owing to the thickness of the sands and the favorable geological formations they maintain a high rate of production to a degree not surpassed by any other field.

The Wyoming-Northeastern Oil Company is actively engaged in the eastern Wyoming oil fields. It has drilled to a depth of over 1,400 feet in the Mule Creek oil field and a few weeks of active drilling should bring in a successful well on its holdings, proving a large amount of acreage adjacent to and surrounding the well. The operations of the company at the present time are limited to 10,000 acres situated in the Mule Creek and Hidden Dome fields. The money received from the sale of stock in the company is being used for the development of these holdings.

After a thorough and rigid investigation by the Bureau of Securities, Department of Trade and Commerce, State of Nebraska, this company was on June 24, 1920, granted permit No. 915, by the Bureau, authorizing the sale of \$50,000 worth of the stock of the company, the proceeds therefrom to be used as directed in the order—chiefly for development purposes. This is a speculative security and returns on the money invested in the stock of the corporation depend upon the discovery of oil in paying quantities by drilling upon the company's property. The company welcomes a thorough investigation by prospective investors. We are making frequent trips to the fields with interested parties. If you wish to go at any time or desire further particulars regarding our operations or holdings, communicate with us by wire, letter or in person.

Wyoming-Northeastern Oil Company

Authorized Capital Stock--\$1,000,000

Alliance, Nebraska

Authorized by and issued by virtue of Permit No. 915, granted by the Nebraska Bureau of Securities under date of June 24, 1920. The Bureau of Securities does not recommend or disparage investment in any securities licensed by it.
