Fall Frocks are Fascinatingly Embellished

Prodigal use of beading in black, white and iridescent colorings adorn the smart new silk and wool frocks of Autumn that are fashioned on chemise, Redingote or Russian lines. Embroidery and appliques of kid or contrasting fabric in gay Egyptian and Persian colorings enliven the sombre smartness of brown and blue tricotine, twill and duvetyn. For the glorious outdoor days when one goes without a wrap, you will want at least one of these clever frocks.

New Suits Show Smartness and Beauty

Crisp, cool days, that urge one to be out, are even more beautiful when you are conscious of the newness, smartness and beauty of a new Fall suit. Lines, generally speaking, are youthfully straight and slim, with now and then a jaunty rippled jacket. In defiance of frosts and cold weather are enormous and coming collars of fur. Finding a suit this season that is attractive, and practical for many purposes, is indeed simple when one sees the number of individual models now being displayed.

SMALL CHANCE

The night was dark but it did not seem to hamper the German artillery shell after shell screamed overhead as the two Yank's sat uncomfortably in their cramped dugout. Suddenly one came crashing in, bumped into the back wall and thudded down at their very feet, apparently a dud, but threatening momentary death and destruction.

"I'm going out of this place," declared one soldier, scrambling to his feet.

"Set still, set still," grumbled the other; "it takes a blamed good German to hit the same hole twice."
