The Three Great VESTA Triumphs

AMONG the various makes of storage batteries there is only one radically different and superior to the rest. This one exceptional battery is the Vesta. Three great battery improvements make the Vesta different. These triumphs give it double life:

1. **Vesta Indestructible Isolator**—an ingenious device, locks the plates apart and prevents short circuits.

2. **Vesta Impregnated Wooden Mats**—prevent "treeing" and its disastrous consequences.

3. **Titanium**—a rare mineral, enters into the lead plates, hardening them and giving them longer life. It precipitates minerals and impurities in solution, thus increasing the efficiency of the battery.

These remarkable features are covered by U.S. Basic Patents belonging to the Vesta. They cannot be used in any other battery.

Vesta costs no more than ordinary batteries. Ask any Vesta Service Station man to explain Vesta superiority.
