NEBRASKA TELEPHONE COMPANY

A STATEMENT TO OUR PATRONS, EMPLOYEES AND INVESTORS REGARDING PROPOSED INCREASE IN TELEPHONE RATES IN NEBRASKA

Because the telephone is an essential public service, it is important to all telephone users as well as to telephone employees and investors in telephone securities that this Company's revenues shall be sufficient to meet its requirements.

Considered on a yearly basis, our present revenues in this state are approximately \$593,000 less annually than are necessary to pay operating expenses and earn 8 per cent interest annually on the money invested in our property.

In order to provide for the extension of our service to new people and to new areas we must obtain over \$1,000,000 of new money annually from investors. To get this money we must be able to pay our operating expenses and earn such a rate of interest as will prove attractive to those who have money to invest.

This condition has made it necessary for us to ask the Nebraska Railway Commission to approve an increase in our rates. But even with the increase asked for, our total revenues will only be sufficient to enable us to earn approximately 6 1/2 per cent annually on our investment in this state.

An increase of 10 per cent has been asked in exchange rates to be applied as a sur-charge. This course has been followed rather than to request complete new schedules of rates, because it is impossible under present conditions to determine what permanent rates should be.

A change in long distance rates has been requested which will produce approximately a 7 per cent increase in our toll revenues. These changes apply only on person-to-person calls. No changes will be made in station-to-station toll rates.

You are well aware of the increases which have taken place in wages, material prices, freight rates, fuel prices, rents and interest rates. The price of all these items and others affect the cost of furnishing telephone service. To illustrate: We are now paying over \$1,700,000 more annually in wages in this state than three years ago, of which only \$750,000 is for new employees added during that period. And the cost of materials used in the up-keep of our property has just about doubled the last few years.

This statement is made in accordance with our policy of giving the public full information about our affairs, and we feel sure that it will be accepted in the same spirit of fairness and co-operation that has always characterized the public's attitude toward this company.
