IDENTIFIED. Mose Potts was an old colored ditch digger on the farm of a well-known Virginia planter. One morning, after having been at work only a few hours, he was seen approaching the farmhouse with a peculiar limp and an unusual rapidity. "What's the matter, Mose?" asked his employer. "It's dis way, boss," he groaned. "Ah see de biggest turtle Ah ever did see wigglin' his haid in de mud, and Ah took de spade and cracked him on he haid, and, boss, Ah done cut off mah big toe."—The American Legion Weekly. An indirect cost you should figure. Lubricating oil is one of the smallest items of cost, when you balance it against fuel or tires. But its indirect cost may easily be higher than either. Engine wear-and-tear, frequent overhauling, repairs and the replacement of broken parts—practically all this expense should be charged against the cost of lubricating oil. So lubricating oil of highest quality and proper body is a big money-saver. It protects engaging parts against wear, prevents bearings burning out, keeps compression tight and assures maximum power and mileage from every gallon of gasoline. Polarine makes these economies not only possible but certain. Its stability under high engine heat insures a fuel-tight and gas-tight seal in the cylinders, and a film on bearings and moving parts that prevents wear. Polarine is made in four grades—light, medium heavy, heavy and extra heavy—but only one quality. Get the proper grade for your car next time you buy clean-burning Red Crown Gasoline—and you will start cutting down motoring costs. STANDARD OIL COMPANY OF NEBRASKA. Polarine MOTOR OILS.
