THIS MAN DREADED TO SEE NIGHT COME

Was So Restless He Couldn't Sleep And Daylight Was Always Welcome

"With the exception of a little milk toast, which comprised my diet for more than eight weeks, I could not eat anything," said Capt. Geo. W. Womble, residing at 105 Jennings St., Knoxville, Tenn., a highly respected citizen of that city.
 "I am now able," continued Captain Womble, "after taking two bottles of Tanlac, to eat practically anything. I had a bad form of stomach and intestinal trouble for a long time and for months my condition had been such that I suffered agony. I got so I could not eat the simplest food. I tried doctor after doctor and all kinds of medicine but nothing that was prescribed for me seemed to do me any good. I had a terrible pain in my breast just over my heart and for weeks and weeks I got no relief.
 "I finally got so nervous that I actually dreaded to see night come as I could not sleep and was always so restless that I would rejoice to see daylight come. I was also constipated all of the time. In fact, life seemed a burden and I was so miserable that I was almost on the verge of despair. Several of my neighbors told me about Tanlac and advised me to try it.
 "I am personally acquainted with Mr. Dan M. Chambliss, of the firm of Kuhlman & Chambliss, and when I told him of my condition and how I suffered he advised me to begin taking Tanlac without delay, and that it had relieved hundreds of the best people in Knoxville. I have now taken two bottles of Tanlac and am giving you this testimonial in the hope that it may induce others to take it. Since taking this medicine I actually feel like I had been made all over again with the youth, energy and ambition of a sixteen year old boy."

OPAL RUSSELL, County Supt.

Ranchmen coming to Alliance from the sandhills districts report that never before in the history of the country has there been so much water in the hills. Many valuable hay valleys, which annually produce thousands and thousands of tons of excellent hay, are now under water and there is little chance of the water lowering enough to permit cutting hay in them. If the present high water keeps up, a comprehensive system of drainage will undoubtedly have to be worked out to drain the valleys which are now flooded.
