ELLSWORTH.

Find the Smallest Mammal.

OMAHA—A shrew, the smallest mammal in North America, was discovered on the Grant Welker ranch in Cherry county, Nebraska, last week by a party of scientists from the Field museum in Chicago, according to Col. Dale Bumstead, one of the party, who passed through Omaha Tuesday. The scientists were on an expedition in the sand hills looking for rare species of reptiles and insects. The mammal found by the party is fur-bearing and no larger than a caterpillar. Colonel Bumstead said. It is a burrowing animal closely resembling a mouse. It will be placed on exhibition in the Field museum. Dr. W. H. Osgood headed the party. Boardman Conover of Chicago was another member. The party bought a lake in the sand hills to establish a "fur farm" to breed muskrats for scientific purposes, Colonel Bumstead said.
