## Yeager Agrees to Fight "Kid" Demith at Next Legion Show

"Battling" Dick Yeager has finally agreed to appear on the program of the next American Legion boxing show, after long negotiations with the battler and his manager. Yeager will box "Kid" Demith of Crawford, who is a rugged two-flated baby, and will no doubt make trouble for the Chadron Adonis. Yeager, although possessed of a terrible wallow, is somewhat of a picture fighter, and will probably not be especially pleased with the Crawfordites' game. The men will weigh in at 143 pounds, or under the welter-weight limit. Yeager appeared here once before, when he rocked "Kid" Florine to sleep in the third round. Yeager hit Florine but once, but there was no need for further exertion. Demith has been boxing at Fort Robinson, and has acquired a fine reputation in his locality.

Al Marker and Tommy Eddy, the two principals have not as yet returned their contracts, but there is little doubt that this will be done soon. These boys have been fighting for the past two years and are well known in their own sections of the country. They are 137 pounders and both fast and clever. These boys have been winning consistently from good men and will put up a battle that will be well worth coming a long way to see.

"Kid" O'Connor, the remarkably energetic and bouncing local fighter, will meet "Cowboy" Wyland, the hard hitting farmer. Wyland and O'Connor both have punches which mean sweet dreams for the fighter who receives it, and it may be merely a case of which lands a hay-maker first. O'Connor is constantly on the move and over a short route should make most fighters worry. Wyland is slightly heavier but may have considerable difficulty in locating his opponent. Wyland always puts up a whirlwind battle for a couple of rounds, but before this he has been unable to keep up the terrific pace he sets. Should Wyland get a little more endurance, he would make a nasty scrapper for most to tackle.

The arrangements for the bout are already under way and preparations are being made for the largest crowd that ever attended a local show. Those who attended the last bout know that everything will come off smoothly and that there will be no disappointment to the spectators.

## Upsets Possible in County League Games the Coming Sunday

Berea, champions of the county league will play at Lawn Sunday, in what should be a good game. Berea is naturally the favorite, but the Lawn aggregation is by no means slow and will show the champs a good battle.

Marple, one of the teams tied for second place, will take on the Red Sox, on the Marple grounds. The Red Sox have been playing good ball, and will furnish a good test as to the strength of the Marple team, which is regarded as the league's dark horse.

Snake Creek, another second place team, will take on the Fairview pastimers at their home diamond, and they should put on an interesting contest. Fairview has been holding all the teams down to low scores, although they have not a very high standing in the league. The Fairview team may spring a surprise and take the fast Snake Creek crew into camp.

Pleasant Hill, holders of the cellar position, will mix with a fast team when they cross bats with the Ash Grove bunch. Ash Grove is in second place, and has been going better as the season progresses. Pleasant Hill has held most of the teams to low scores until last Sunday's game with Snake Creek. Should they get going right they might cause the Ash Grove team some trouble. The dope, of course, favors Ash Grove to win, but there may be some difficulty in carrying out the advance guesses.

## Low Tender Will Fight Benny Leonard in Title Bout Soon

Low Tender, the port-side light-weight, has now signed to meet Benny Leonard in a title bout, since Tender defeated Bobby Barrett last Tuesday. Barrett was hailed as the boy wonder, being a newcomer in the ring, but lasted only six rounds against the hard-slugging Tender. With more experience he may again claim a bout with his conqueror, but he was evidently too green to put up a real battle now.

Tender is given a good chance against Champion Leonard, and his ability to stand with his right hand projected may bother Leonard to a great extent. Tender of course has battled many right handers and will have an advantage. The champ is said to be inexperienced with this style of fighting, as the mitten-whirling game is strangely devoid of many good south-paw boxers.

Leonard's recent victory over Johnny Dundee and his knock-out of Barrett clearly entitle him to a title bout, and the outcome of this will be watched with the greatest of interest.

## Alliance Will Play Bridgeport Sunday at the Fair Grounds

The second home game of the season, with Bridgeport Sunday promises to be a hum-dinger, for although the Alliance team has once defeated the valley team, the Bridgeporters have since held the strong Sidney team to a 4 to 3 score. The Bridgeport boosters claim that their team can make any in this section step and are coming Sunday to prove it.

The game will be for the benefit of the Boy Scout band which made such a hit at its first appearance on Memorial day. The bank will play at the game and this should be an added attraction to draw a large crowd. The band has been under the direction of William Reese for the past two months and although all of the players are young the ability displayed has been remarkable.

Ladies will be admitted free to the game, the management wishing to get the feminine fans out to see the locals perform. Alliance has a team to be proud of as there is probably not an amateur, or in fact any team in this part of the state that can equal it. Most of last year's stars are back, although some have been nosed out by the appearance of new men of greater ability.

## Proposed Sandhill Baseball League May Yet be Formed

At the close of the baseball season last year arrangements were made to organize the teams from Antioch to Mullen into a "Sandhill League" but several towns that had planned to have teams in the field failed to materialize this season and for that and other reasons the league was not formed although the managements of several of the sandhill teams have expressed their opinions as favorable for yet organizing, although it is not probable that this will be done this year but the plan will no doubt be carried out this fall for operation next season.

The Lakeside team has just been organized but it is reported that An-

tioc and Lakeside will support one team as was done last season and in this way a very strong team will be in the field for them. It is reported that J. L. Roe of Lakeside will manage this team.

Whitman, Ashby, Bingham, Ellsworth and the Lakeside-Antioch team are playing this year and had they been formed into a league their standing would be as follows:

	W	L	Pct.
Ellsworth	3	1	750
Whitman	2	1	667
Ashby	2	1	667
Antioch	1	1	500
Lakeside	1	1	500
Bingham	0	2	000

Whitman plays at Bingham Sunday while Ashby plays Ellsworth at Ellsworth and Lakeside and Antioch will play at Lakeside after which game it is reported that Lakeside and Antioch teams will consolidate.

## American Players Lose to English Stars in Tournament

The American tennis players in Europe seem to have lost their usual effectiveness, Mrs. Mallory, the American woman champion, and Miss Ryan, probably the next best player, losing to Mrs. Beamish and Mrs. Peacock in the English tournament. Mrs. Mallory, before her defeat by Miss Suzanne Lengren, was considered invincible. The famous Suzanne, on the other hand, seems to be winning from all the European players with ease. Tennis is a game in which previous dope is very liable to upset, and the French star may yet come out on the short end of the match. Both Mrs. Mallory and Miss Lengren have each won a victory over the other, and naturally this match is regarded as highly important to both. They may meet in the finals of the Wimbledon tournament, known as the world's championship on grass. If so, the match will be watched with the greatest interest.

## Moisture Capacity Of Soil Increased By Organic Matter

In addition to adding plant food to the soil and improving its texture organic matter, supplied by green manure crops, stable manure, or in any other form, adds greatly to the moisture holding capacity. It has been shown, says the United States department of agriculture, that while 100 pounds of sand can hold 25 pounds of water and 100 pounds of clay 50 pounds, the same weight of humus or decaying organic matter will hold 190 pounds.

Clay soil containing organic matter is more friable than similar soil without organic matter. When the organic matter is entirely removed the clay remains compact during freezing and thawing. When the organic matter is returned the soil crumbles after freezing, just as the original soil.

Not only do the higher plants grow better in a soil rich with organic matter, but the activities of the soil bacteria are largely dependent on the supply of decaying vegetable matter. These bacteria need food and air. Their food is the dead vegetable matter which they break down and make

available to the higher plants. Most beneficial bacteria use air, and this they find more abundantly in a soil

supplied with organic matter than in stiff clays poor in it. In sandy soils there is air enough, but the addition

of humus helps to hold moisture and so benefits the bacteria as well as the higher plants.

## Line Trouble!

The wires connecting your telephone with other cities and towns must cross miles and miles of territory where they are exposed to all kinds of hazards.

The limb of a tree may fall across a wire and the line become "noisy." A pile of burning brush may take the "temper" out of wires and cause them to break.

An insulator may be broken by a boy shooting at birds. A piece of wire may be thrown across the telephone circuits, or a wet kite string may fall upon them. These cause a "short circuit," making it difficult to hear over the lines until the obstruction is removed.

Constantly the wire chiefs at each end of the circuits watch the lines and dispatch repairmen to the scene of trouble.

# Polarine MOTOR OILS

STANDARD OIL COMPANY OF NEBRASKA

**CADILLAC**

For the Cadillac we recommend the following grades:

- Summer MEDIUM HEAVY
- Winter MEDIUM LIGHT
- Transmission TRANSMISSION OIL
- Differential TRANSMISSION OIL

**Correct Lubrication is Easy**  
—When you use this Chart

IS your motor being scientifically lubricated? How sure are you that you are buying the right oil? Can you be certain you are right without the guidance of lubrication engineers, who not only understand your motor but who have also mastered the tremendous complications of oil supply and oil refining?

Automotive engineers agree that fully 80% of all motor repair and replacement costs are directly caused by the use of low grade oil or oil of unsuitable body. To meet this condition our experts have prepared a simple chart—the Polarine Chart—which insures you against costly mistakes of this nature.

This chart is included in the Red Crown Road Map which has been mailed to every motorist in the state of Nebraska. If you have not received a copy one will be sent upon request. It gives specifications for practically every car made; specifications tested and proved beyond the possibility of doubt.

Polarine is the highest quality of oil you can buy. Its stability under high engine heat assures a fuel-tight and gas-tight seal in the cylinders—maximum power and mileage from the gasoline. Its smooth, penetrating film protects bearings and engaging parts against wear, vibration and breakage.

Polarine Oil is made in four grades—medium light, medium heavy, heavy and extra heavy—but in only one quality.

You can get the proper grade for your car where you buy your clean-burning, scientifically balanced Red Crown Gasoline—and you will avoid a lot of bother and expense. Prevent costly lubrication mistakes. See the Polarine Chart today, make sure your oil is right, and stick to it. It pays big!
