A dispatch from Denver states that the Union Pacific lines in Colorado will be directly affected by the closing of silver mines and its officers estimate the loss at 75 per cent of the whole traffic, or about \$90,000 a month. They say should suffering become apparent in the mountain towns they will carry supplies at nominal figures. A conservative estimate of the loss to the Rio Grande road is 30 per cent of the gross earnings, or about \$150,000 a month, and this will increase if the mines remain closed for any length of time. The Colorado Midland will lose about the same proportion of its earnings. The roads have all commenced to lay off train crews and have received orders from the smelters and sampling works to accept no ore shipments. Even gold ore is not taken, as it cannot be handled in most cases without silver and lead flux.

The Bonds Carry.

The election held Saturday to vote on the proposition of issuing bonds in the sum of ten thousand dollars for the purpose of erecting an electric lighting plant, resulted in the bonds carrying by a majority of eighty-seven. The vote polled was very light, less than one-half the voters casting ballots. A large majority of the voters were of the opinion that there would be very little opposition to the bonds, and many thought it unnecessary to take the trouble to go to the polls.

The vote by wards was as follows:

Table with 2 columns: Ward, FOR, AGAINST. First Ward: 54, 21. Second Ward: 76, 47. Third Ward: 47, 22.

The bonds have been voted, but it must not be expected to have the plant put in at once. It will take some time to prepare the bonds, and when they are ready it may be possible that they will not find a ready sale, but being the first bond issued by the city they will not likely go begging for a purchaser at par, and they may command a slight premium. Then after the money has been realized on them it will take some time to make a suitable contract, the council having signified their intention of making a careful examination of the plans, systems and prices which may be submitted by the several companies likely to bid. It is therefore likely that the plant will not be in operation much before January 1st.

The county commissioners are now allowing claims against the county and warrants for same are being drawn.

U. P. watchman Sawyer had an encounter with overland tourist Sunday night and as a result is wearing a foot or two of copper plaster on his face. The leaden missile cut a shallow groove on his cheek, and he considers he made a narrow escape. But "Buck" survives and the company's property will be protected as usual.

One of the most encouraging signs of the times is the increased activity in the exportation of American wheat. The fact that 14,000,000 bushels were cleared from Atlantic and Pacific ports during the four weeks ending June 23 ought to have a stimulating if not an immediate effect upon prices. The only drawback is the extremely low price which wheat commands at this juncture in the European market.—Bee.

Pis a Ring on the Mayor.

Mayor Warner turned the fortieth milestone in his life's journey Wednesday, and on the following Saturday evening, about thirty friends, ladies and gentlemen, assembled at his residence and gave him a great surprise. Mr. and Mrs. Warner were out riding during the evening, and when they returned at nine o'clock they found the guests had taken possession of the house. Mrs. Warner had been given an inkling of what was to come, but the event was a complete surprise to the Mayor. After he had recovered from his astonishment, Geo. E. French, in behalf of the company, presented Mrs. Warner with a handsome solid gold ring, on which were engraved the symbols of several secret societies of which he is a member. The recipient responded in a brief but feeling speech. After this the guests made merry the time in various ways, and before leaving seasonable refreshments were served. The occasion proved a pleasant one to all present.

All Should Go.

A North Platte lady visitor at the world's fair writes THE TRIBUNE as follows: The world's fair is simply wonderful, prodigious, beautiful. The grounds around the buildings are exquisitely laid out, the statues, the fountains, the maze of lagoons, Lake Michigan, and all, presents a lovely picture. The buildings are marvelous. It really seems a pity that such beautiful structures, with their equally wonderful and interesting exhibits, as those at the fair should be set up for only six months. I wish one and all would see them as they are. They equal a trip abroad. Everything is in readiness and one can feast their eyes upon the grandeur for months without tiring. Words are too cold and vain to express the magnitude and quality.

A person desiring to see the fair can form a very good idea of it in two weeks and they will find plenty good hotels in walking distance of any entrance and prices are reasonable. I only wish it were in the power of every one in Lincoln county to see the grand world's fair, and my advice to all is to make an effort and come.

The Glorious Fourth.

The celebration given yesterday under the auspices of the A. O. U. W. was well planned and satisfactorily executed and reflected credit on the arrangement committee. In the forenoon a parade, participated in by that lodge and the fire department, and headed by the Gordon cornet band, with Joe Filion's drum corps stationed toward the rear of the parade, marched through the principal streets and thence to Ray's grove south of town where the exercises and sports of the day were held. J. M. Ray read the declaration of independence and was followed by H. M. Grimes who made one of his usual excellent addresses. Refreshments were taken, a great many of those present having brought with them baskets filled with tempting lunches, and this part of the proceedings was particularly enjoyable.

After dinner a fine programme of sports was rendered and joyfully enjoyed by the very large audience present. The sports lasted until about half past seven o'clock, the concluding act being a game of base ball. An effort was made this forenoon to secure a list of the winners in the races, etc., but this could not be obtained in time for publication.

There was no formal display of fireworks in the evening, but enough were set off by various individuals to amuse the crowd on the streets. A dance at Lloyd's opera house concluded the festivities of the day.

The thanks of the public are due the A. O. U. W. lodge for the amusement furnished.

C. S. CLINTON, JEWELER AND OPTICIAN.

U. P. Watch Examiner.

The City Guardians.

At the meeting of the city council Monday evening the first business considered was the canvassing of the votes cast at the special election held Saturday. The result is published in another column.

Councilman Johnson had brought with him a Scientific American containing an illustration and description of an underwater water wheel, a duplicate of which he thought might be made and placed in the North Platte river to furnish power for the electric light plant. The wheel described is in use by the Pottadam (N. Y.) Red Sand Stone Co., is eighteen feet in diameter, forty-one feet long, furnishes 200 horse power, cost \$2,500, and during the past five years has been run at an exceedingly small cost for repairs. The feasibility of putting in a power of this kind seemed clear to a majority of the council, and the clerk was instructed to correspond with the Pottadam Co. for further particulars.

The committee on public improvements was instructed to secure a plan of the city, ascertain the number of arc lamps required to light the streets and the number of miles of wire which will be needed. The members of the council pronounced themselves in favor of having both the arc and incandescent systems. The clerk was instructed to report to the county commissioners an additional estimate of \$600 in the running expenses of the city for the present year, that sum being needed to pay interest on the bonds.

The following bills were approved: Mrs. L. Bare, printing and publishing, \$31.75; A. P. Street, blue vitrol, \$20.75; D. A. Baker, boarding printers, \$201; M. Pleasant Grader Co., \$75.00; Inter State Alarm Co., \$150.00; Mr. Picard, rent of house ground, \$12.50; Baptist church, same, \$12.50; J. H. Ellison, same, \$10.00; board of registration, \$81; election board, \$63.00; J. M. Ray, deputy city clerk, \$5.00; incidentals for First ward house, \$3.00; H. W. Hill, printing and publishing, \$43.85; A. E. Huntington, killing dogs, \$7.00; G. W. Bunney, work on streets, \$48.25; Joseph Knox, same, \$22.50; E. Wright, same, \$8.25. A warrant for \$180.00 was ordered drawn in favor of the waterworks company.

Warm Weather Weddings.

On June 27th Edgar L. Raymond, a printer employed on the Sidney Pioneer was married to Miss Lillian Stockton of Brady Island, Justice Mathewson of that village performing the ceremony.

On the same date Judge Ray issued license to wed to John Schick, of Lincoln county, and Maggie Wilson, of Keith county, and it is likely they assumed the marital regalia a day or two after the issuance of the license.

On Monday forenoon last Judge Ray pronounced the words which made Chas. Carlstrom and Alice Wagner man and wife. These people live about seven miles south of Sutherland, and when seen on the streets after the ceremony were looking as though they were exceedingly happy.

Monday afternoon James L. Jones, living near Wallace, planked down the necessary cash on the county judge's desk and asked for a license to wed Miss Ingeborg Sady, who also resides in the land of Egypt. The judge sent the young man away with the necessary document.

Yesterday forenoon Judge Ray was called upon to unite two hearts that beat as one, the owners thereof being Andrew Anderson, of Hershey, and Gertrude Larson, of this city.

These people have the best wishes of THE TRIBUNE and the wish that they may be prosperous and fruitful.
