FLOWER SUPERSTITIONS.

Maidens' Barometers For Divining the Depths of Their Sweethearts' Leve. It is singular to see how many mean-ingless ceremonies are now practiced by young women—oeremonies which were formerly used in earnest as love charms ncantations. Most of these have an amatory origin, and in connection with not Fifteen years ago, said George W.

A German girl, after having been called on by her lover, will put a star flower or dandelion in water and leave it there until his next visit, drawing an positive. Will stop that backscue and sick-headache. A positive specific for all diseases of women. Why suffer when it will cure you? For sale by North Platte Dharmacy.

Can now be come upon without a unit on her breast, and if it expands to come a perfect flower the omen is comprovince.

Sick-headache. A positive specific for all cult and tedious journey of at least 800 miles into the interior wilderness of the province. omen from its condition, while a Spanish East Indian maiden who places a poppy in her hair. In England the primrose is used for the same purpose, and in country districts of New England the spikes of the rib wort plantain are taken, wrapped in dock leaves, placed beneath a stone, and if the next day signs of new buds appear the omen is considered

happy.

In France young ladies desirous of ascertaining the extent of a lover's affection take the common daisy and pull off its leaves one by one, with the question "Does he love me? Does he love me little? Does he love me much? Does he I know no reason why the grizzly bear love me with all his soul?" Marguerite proved to me that such is the fact. No and the Irish maiden learns of her future her husband.-New York Advertiser. .

Some New York Breakfasts. Nearly every German bakery on Third avenue serves breakfast and luncheon to the furnished room population of the east side. Some serve eggs and cold meats, coffee, tea and chocolate. The majority, however, provide only coffee, tea, rolls and cakes. Nine out of ten of the customers take coffee and cake. The latter is not the French or American kind. It consists of four varieties tremendous presence and prepared to dear to the German palate—apple, do battle coolly and with a level head.

dear to the German palate—apple, peach, prune and sugar. The last made of bread dough on the upper surface of which is spread some butter, sugar and cinnamon. Then it is baked

The peach and apple cakes are made of thinly rolled bread dough, surmounted by alices of apples or peaches, as the case may be. When a little butter and sugar have been placed between the slices, the baker has approached as near perfection as possible. The dough of the prune cake is made like the other and covered thickly with mashed stewed prunes. In the best bakeries a slice of any of these cakes from four to five inches square is sold for 5 cents. A good cup of coffee or tea with milk and sugar costs the same. Those who like light and sweet breakfasts can thus be satisfied for 10 cents. Probably 5,000 east siders eat such breakfasts in the bakeries every

morning.—New York Sun. when confronted by a bear, would invariably charge ferociously upon its big in that year that Mistress Van der Plasse origin of starching in London. It was the time were not long in discovering her ruffs of lawn to starch, which she did so excellently well that it became a saying that if any one sent her a ruff made of a spider's web she would be able to starch it. So greatly did her reputation grow that fashionable dames went to her to learn the art and mystery of starching, for which they gladly paid a premium of £4 or £5, and for the secret of seething starch they paid gladly a farther sum of 20 shillings. - New York

A Hair Splitting Blahop. It is recorded of a certain hair splitting English bishop, who was accustomed to compose his "charges" in the train, and whose desk was always placed pposite to him, that he invariably treated it as though it were a living vis-a-vis. The train being very full on one occa-sion, a would be passenger inquired if this place was taken, and the bishop, with his sunniest smile, expressed regret that there was no room. "I don't think that was quite right, my lord," said one of his fellow passengers. "What was not right?" inquired his lordship urbane-"To say that the place was taken." Pardon me, I did not say that it was taken; I was particularly careful to use the word 'occupied.'"-San Francisco

He Was a Senator. Senator Allen of Nebraska is a big, burly man who looks like a prosperous dealer in live stock. Shortly after his arrival in Washington he was stopped at the door of the senate chamber by a new red precincts.—Chicago Herald

"REAL LONDON SOCIETY."

It Contains Two Classes Whose Rights Be So Identified Differ Radically. A London correspondent in a recent letter to a New York paper says: We have been told this week by Lady Charles Beresford that the real London society, which includes "those who are there by right, and whom nothing can remove as long as their fortunes survive," consists of only 80 or 40 families. So called London society, she declares, includes two classes, one of them being those who are there, not of right, but by force, and who remain by dint of labor, thinking no cost too excessive to pay for the privilege of meeting with the great. The other section consists of those who are still anxious to obtain admittance into what appears to them to be a social paradise, and who still hope, and have every right to hope, to succeed, despite busy markets held there.

In the Asiatic part of R

On the delicate and much-vexed question of the morals of society, Lady Beresford says that the real question is whether the circle in which immorality is so openly practiced is widening. She thinks it is not. It is generally noticed, she says, that the most pronounced set gather fresh recruits. "See here," said the man wno n

married a widow, "hasn't your h: turned gray rather suddenly since we were wed? "Oh," said she, "that's from fright. I FOR LITTLE FOLKS.

A Little Child's Hanger. Some very pathetic scenes accompa-nied the distribution of bread by the various relief committees in the poverty stricken districts. One woman, with hunger's lines written plainly on her face, came to the house where food was atory origin, and in connection with not a few certain flowers are used, presumably as a means of foretelling the future. In several parts of New England when a young lady expects a visit from her lover she will pluck a marigold, take it in her hand when he arrives and carry it until the end of his visit, when from its fresh or faded condition she will judge of the atrength of his affection.

The mather stepped hesitatingly in, her little one clinging, half shy, half scared, to her dress. She gave her name and address, as each applicant was re-

quired to do, and then started to tell her story of destitution and want. She had hardly begun before the little girl, peep-ing from behind the projecting skirts, spied the bread on the table near by. She sprang forward, and before any one could stop her, even if they had had a desire to do so, she picked up a loaf. Her tiny fingers seemed imbued with an unusual strength, and she tore a large piece from the loaf and began devouring it as

fast as she could. "My poor child," gasped the mother as she sank into a chair and burst into tears, "even I did not know how bad your hunger was. We have had nothing to eat for several days excepting a few slices of bread that I guarded for my little girl."

The young men hesitated not an instant to fill the woman's arms to overflowing and told her to come for more when she needed it.—Philadelphia Press.

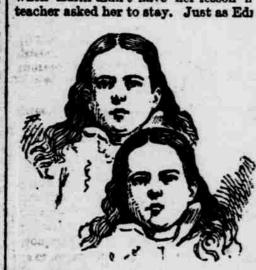

A Stubborn Little Queen. Little Queen Wilhelmina of Holland ordered to bed immediately upon her return to the palace.

"What!" she exclaimed, "am I. the queen of the Netherlands, to go to bed at 7 o'clock? I won't do it." But she did do it, being persuaded thereto by a slipper wielded by the queen regent, who brooks no disobe-

The Blackbird Legend. Jan. 80 and 31 and Feb. 1 are known at Constantinople, Brescia and along the Danube and the Rhine as "blackbird days," through a curious legend that originally all species of blackbirds were The Origin of Starching.

The course of history carries us back no further than the year 1564 for the origin of starching in London. It was cold that the birds in Europe took refuge in the chimneys.

Edith and Edna. In Homer, Mich., live Edith and Edna Lovejoy, twins, who look so very mu alike that nobody can tell them apa Their teachers can't do it. One d when Edith didn't have her lesson h

Once, a few weeks ago, while they wood opal is the petrifaction of wood, opalescent, but without the coloring sister, they had been going through one which makes the "noble" gem so preof the big dry goods stores. Edith missed | cious.-Chicago Tribune. her sister and started to find her. Then she saw, or thought she saw, Edna some distance off, and called to her. It was only when the crowd jostled her against

But the insides of their heads aren't a bit alike. One girl is very sober, and one is very jolly and full of fun.

I've had a party 'cause I'm six years old, And 'cause I did last week as I was told, And always shut the door, and fed my cat, Nor once forgot to hang up my new hat.

But Willie had the mumps and couldn't come, And Chester fell down stairs and broke his Burt had the croup, and Lee a sore throat, And Tom had gone to Boston on the boat.

And so papa, mamma and I—we three Had just a lovely, lovely party tea. "Too bad!" said every one; but—don't you tell— I think I liked it just about as well!

DESCRIBE YOUR FRIEND.

And Then See How Well Your Picture Will "He was a young man and fairly good ooking; smooth face and without plasses; wore a dark suit; was about 5 leet in height and looked like a married man. Anybody would know him." Such was the description turned in by a young woman who slipped quietly into the city editor's office and wanted to advertise for Chalmers. It appeared that Chalmers had left home, and nobody knew why, and this young woman had faith that her recital of his personal traits would bring him back. It was a good example

of the average person's power of descrip-tion of a fellow being. It is totally inadequate! Though man be fearfully and wonderfully made, there seems to be an unaccountable inability in nine persons out of every ten to give a creditable word picture of any one whom they have seen. Because we understand the looks of a person when we meet them, it never occurs to the mind that other people do not grasp a thorough idea of his appearance with a few passing phrases of description. Your friend comes in, and you exbound to him that such and such a man

has just called for him, but almost invariably your exposition is a jumbled lot of phrases which apply to the human The other day when I rushed into my office room with a column story on the end of my tongue-or at the tip of my pen, to be more accurate—I was given this greeting:

"Hello! A man has just been in to see "What did he look like?" "Oh, he was a good looking fellownot very tall, rather heavy, but not too

much so." "Was he old or young?" "About 20 or 25, I should say." "What color of hair?" "I don't remember now. However don't think he had a mustache." "How dressed?"

"Oh, just an ordinary business suit." Have you ever heard such a description? If not, watch yourself next time you tell of some one's call. You will be surprised to find that your description would fit almost any member of the human race. Why is it?

I don't know. We read in books that it's because we don't cultivate the habit of intelligent observation.

There was once a boy who learned how to describe what he saw. Every is credited with the possession of a par-ticularly intractable temper, which she glance at the panorams and to describe at Babylon, N. Y., the other day over inherited from her disreputable old papa.

Not long ago, while driving out with her governess, she became sulky and refused to return the salutes of the people in the streets. As a punishment she was once. - Boston Herald.

The manicure with the golden hair was bending over the hand of a new

"Do you want your hands bleached?"

She applied the bleach, using more After working for about five minutes "It is always difficult to remove nico-

tine with the first application." "Wh-a-a-t?" gasped the society girl, elevating her eyebrows. "Nicotine? What do you mean?" "The cigarettes, you know," replied the manicure. "It's perfectly awful how

"Use lemon juice-I do-we all do. "Thanks."-New York Herald. About Opals.

The prejudice against opals appears to be disappearing. Anyhow they are popular. There are several varieties of opals and therefore several degrees of merit. The precious, or noble, or oriental opal is the supreme. This has all the colors, and when these colors are broken into spangles it is then called the harlequin pal. Then comes the fire opal, or girasole, with hyacinth red and yellow reflection. The former comes from Hungary, the latter from Mexico. The common, or semiopals, are nonopalescent. The hydrophane, or oculus mundi, is nontransparent, but becomes so by immersion in water or any transparent fluid. The said, "Didn't I tell you to stay?" and she cachalong is nearly opaque and of a bludid stay without letting any one know ish white color. The hyalite is colorless, pellucid and white. The opal jasper or

Working For a Hollday. An Englishman stopping at one of the hotels was commenting upon the exthe frame of the big mirror that she treme restlessness and incessant go of found out she had mistaken herself for Americans. He said, "You Americans have such a beastly idea of the compensation of work."

"What do you mean?" questioned Pittsburger standing near by. "Oh, you people work for money," was the explanation.

"I don't see anything beastly about that," was the retort. "May I ask for what you Englishmen work?" "Why, we work for our holiday," was the reply.-Pittsburg Dispatch.

Vienna is of nearly circular form, being 12 miles in circumference. The old city, or city proper, is, however, scarcely three miles round. It was formerly inclosed by fortifications. Immediately outside of these was a wide esplanade called the Glacis, which has been elegantly built up and is called Ringstrasse,

has, for some time, found it difficult to can glide over the snow very quickly, has 70 species of bees and 16 of wasps.

was so scared when you proposed to me, and addresses, is 18 inches thick, has material of which is said to be the choose a vegetable diet. "tanned gut of a great dragon."

THE "MARBLE MAN."

Patient Suffering From a Peculiar Di ease In a St. Louis Hospital There is a "marble man" at the City hospital. He is whiter than the alabaster statue Dixey makes in "Adonis," and Coal Oil, Gasoline, the "driven snow" would soil his cheeks. Not only is his skin absolutely colorless,

but his tongue, gums and finger nails are devoid of all hint of blood dyeing. He is believed to be the first patient suffering from the peculiar ailment he i fflicted with that ever stepped inside St. Louis. As is proper with such a very distinguished disease, it has a very aristocratic name-anchylostomum do-

A very, very rare little worm is engaged in merrily sucking the red corpuscles, or life giving element, from this poor fellow's blood, and if the unwelcome tenant is not gotten rid of pretty soon the patient will fade away to a shadow and die from sheer lack of nourishment, though his stomach be full of food. Albert Abbink, a young man who came from Germany, is the patient, and he isn't at all proud of it either. He looks like a marble statue, and a very Farm and Spring Wagons, skeletonish one at that, and has great difficulty in moving around owing to his weakness.

Though this peculiar disease, or affection, is very rare in this part of the country, it is common enough in Italy and Germany. The worms are supposed to be in certain kinds of muddy water, and it has been noticed that brickmakers and pottery operatives in the old country are peculiarly apt to get them. When the great St. Gothard tunnel was being dug it was discovered that nearly every workman engaged upon the job suffered from this plague. It was first noted in Egypt, and from this fact the weakness was named Egyptian chlorosis. Scientists are pretty certain that the Pharaohs had it, and some are inclined to believe that the plague of toads mentioned in holy writ was none other than the plague of anchylostomum dode-

Dr. Marks believes he can assist Abbink in getting rid of his high toned parasites, several of which now occupy a glass slide under his microscope. They are about an eighth of an inch in length, and under the magnifying glass look like white alligators. They have tremendous jaws and wear their eggs scattered along their backbones.-St. Louis Globe-Democrat.

A LONG ISLAND MYSTERY.

morning he was sent by his father to A Skeleton Declared to Be That of an Inwalk rapidly by an elegantly arranged | dian, but There Are Some Who Doubt It. window, and then afterward to repeat | Justice Cooper and a jury, in the abto him all the things he saw at this one sence of Coroner Moore, held an inquest or identify the remains. They all stated that they could not recollect the sudden disappearance of any man. The oldest witness, however, said that the round where the skeleton was found had never been used as a gravevard.

Charles I. Bedell, a resident of that portion of the town and a farmer, owner of the property, stated that he had plowed than the ordinary quantity upon the the ground in question about eight years thumb and forefinger of the right hand. | ago. From this it would seem that had the body been there then it would have been unearthed, as it was only 18 inches under ground. The jury returned a verdict stating that in its opinion the skeleton was that of an Indian who had been buried about 40 years and had come to his death from natural causes.

The village people generally believe that it was the skeleton of a murdered man whose body was brought ashere

and buried. Mrs. Grant's Hunt For a Home. Mrs. Grant has determined to make her future home in Washington, and during her recent sojourn here spent most of her time in house hunting. Almost every available residence in the West End now vacant was offered for her consideration through the various real estate agents, and it is safe to assert that she made an exhaustive examination of no less than 50 before leaving for New York with her daughter, without coming to any definite conclusion in regard to a selection. Those that suited her fancy did not suit her purse, and when houses desirable in both these respects were offered for her approval, the locality, as a rule, proved unsatisfactory. Mrs. Grant has not given up hope of ultimate success, and candidly avers her preference for Washington as a place of residence. - Washington

Telephoning Through Snow. Professor A. H. Thompson, chief of the United States Geological survey, returned from the Black Hills a few evenings ago. The government has two parties in the hills, one at Rapid City and the other at Deadwood. The professor the other at Deadwood. The professor loss of appetite, relieve constipation, correct found the Rapid City party entirely kidney disorders and destroy worms, giving snowbound and tells a tale of how he new life to an old or over worked horse. 25 got communication with them. He cents per package. For sale by druggists worked his way toward the men until he came within speaking distance. By that time further passage seemed to be impracticable, but by accident they had occasion to resort to a peculiar expedient. They talked through the snow. The snow acted as a conductor of sound, and with some difficulty they made one another understand.-Denver Republi-

Browne on Insomnia. Sir James Crichton Browne, the English expert on brain diseases, asserted in a popular lecture last week that insomnia is not attended with such diastrous consequences as is commonly supposed. the sufferer. He suggested that the brains of literary men, who are the most frequent victims, acquire the trick of the heart, which takes a doze a fraction of a second after each beat and so manages to get six hours' rest in 24. Some
