—On Sunday afternoon O. M. Rose, father of Mrs. J. G. Anderson, died at the home of his daughter on west Fourth street. The deceased was eighty-one years old, and had been confined to his bed but a few days. For a man of his advanced age he bore his years remarkably well. The funeral will take place this afternoon from the family residence conducted by Rev. D. Z. Foulk, of the Lutheran church, of which the deceased had been a worthy and respected member for several years.

—The Messrs. Turpie have made an offer for the Calhoun ranch of 800 acres north of town, and it is said the price offered by them will quite likely be accepted by Mr. Calhoun. The same gentlemen are also negotiating for the purchase of the Ritner ranch of 1100 acres, a part part of which is already under irrigation. These deals, if consummated, will be a good thing for the section, as the Messrs. Turpie have abundant capital to improve the land and get under cultivation in a short period of time.

—Reports from the Madrid republican meeting on Saturday night state that it was a magnificent success. On the other hand, if Holcomb is elected, Ralston will drive a steer to Brady and give it to Beatty. The distance is thirteen miles."

—The latest Senegambian in the pile of combustible material discovered by popocrats is that Li Hung Chang has been imported by the "gold power" to discredit the cause of free silver. There is about as much argument in this as there was in prohibitionist St. John's rejoinder that the author of what is known as the Gresham law was an Englishman. For the same reason the law of gravitation or the theory of evolution might be denied because their discoverers were Englishmen.

—The first of this week the Boston Store was moved to its present quarters in the Ottenstein block and its proprietor and clerks have been busy as bees ever since arranging and putting in shape the stock. —Up in Colorado the Ft. Collins Express in writing of the crop conditions states: "Most of the farmers have completed their threshing. The yield is quite small; dry weather, a scarcity of water in the ditches, destructive hailstorms and millions of grasshoppers are the cause of failure. Our farmers report an utter failure of the early potato crop. Large and vigorous looking vines, but in many instances not a potato large or small. We have never heard of such a complete failure in any preceding year since our residence in Colorado. No one is able to give a satisfactory reason or assign a cause for such a state of things. Some attribute it to the excessive hot summer."
