THE Buffalo county Alliance held a meeting last Saturday and passed a resolution that it was the sense of the Alliance that the state appropriation for the Omaha exposition should not exceed twenty thousand dollars. It is not to the credit of Buffalo county to have residents who express such a niggardly disposition.

THE populist state machine is unalterably opposed to any legislative action in the the direction of retrenchment upon salaries paid employes of state institutions. After working all these years for the privilege of appropriating the state patronage it does not see why it should relinquish any of the spoils just to keep a few campaign promises made to the people to procure votes .- Bee.

THERE is at least one thing for which Senator Allen can be commended; he favors a liberal state appropriation for the Omaha exposition. He recently telegraphed from Washington to the Omaha World-Herald as follows: "Prompt and liberal legislative action in aid of the exposition in Nebraska is highly essential to stimulate congressional aid. I fear much damage will result to the enterprise in congress and in the several state ferocious bulls have been ordered from legislatures if people of our own Spain-Mr. John D. Rockefeller has state are indifferent to its success."

affairs. But Germany cannot supply its people with food and grain from its own soil. It must import food or it must cease to de velop its manufactures.

It now becomes a matter of neces sity to let Germany know that if its sugar is to come into the United States our farm products must enter its ports as freely, or as slightly burdened, as its sugar enters ours .- Inter Ocean.

Moore says he has a one-third interest in a mine in Colorado, for which he would not take \$100,000. It now nets \$1,500 a month and Moore is ready to pay \$500 a month to the state on his indebtedness.

Attorney Reed says that the law of 1873 provided that these insurance fees should be paid to the state auditor. The constitution of 1875 amended this law and made all fees received by any state department payable in advance to the state treasurer. Hence, the bondsmen of Moore assert that they are not liable as Moore has no right to receive the fees Mr. Reed says that this will, he believes, be a good defense in a criminal action

Attorney General Smyth said firmly that something must be done in the matter or an arrest would be made. This is what Attorney Reed expects and he is making preparations for defense. Mr. Moore says that he is doing all he can to fix this matter up, and that, if given time, the state will not lose a cent. It is Attorney Reed's opinion that if criminal action is commenced the state will never realize a dollar, as the supreme court has held the point he will raise on the constitutionality of the payment of the fees to the treasurer good.

I such an institution can be made to pay so well in Seward county similar results can undoubtedly be ob tained in this county, especially in the Patte valley where every condition is favorable.

THE New York Mail and Express says that business improvement continues in many industries and in nearly all sections. The cotton factories and woolen mills of New England are increasing their New York City next week-George working forces; a great steel mill is to be constructed in Birmingham, Ala, as speedily as possible; the Westinghouse Electric company of Pittsburg has received orders for \$500,000 worth of new work within the last ten days, and the builders of locomotives and railway cars are receiving the largest contracts they have had in several years. There is no boom in business, but there is undeniably steady, solid and constantly increasing change for the better. The improvement is general in its scope, and there is every reason to believe that it will be substantial and long-continued.
