Victor E. Meyer returned this morning from a sojourn of nearly two years in the west. The greater part of the time has been spent in various places in Alaska. When Mr. Meyer left here he expected to find a fortune in Alaska, but decided, after living there a while, that he could make one more readily in Nebraska and has returned to locate permanently. As he is an expert machinist he was able to command high wages all the time he was in Alaska but he found the cost of living correspondingly high. Suffering from lack of proper food is very much in evidence in the field fields, and only a very small percentage of the gold seekers find fortunes. After leaving Alaska Mr. Meyer went south along the coast and spent several weeks visiting the California coast towns. From San Diego he went down into old Mexico and from there he returned home.

Deafness Cannot be Cured by local application as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh; which is nothing but an inflammation of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.
