A stock buyer in town today, who has just returned from an extended trip in the west, says that cattle are mighty scarce on the western ranges and this leads him to believe that prices will not decline much in the future. D. A. Baker reports that on Saturday evening last an atmospheric disturbance occurred at his farm four miles west of town during his temporary absence in town. Mr. Baker had been cutting hay and had left about six tons raked up in bunches in the field. The wind, which probably assumed the nature of a cyclone, picked up the six tons of hay and swept it from the field, not a trace of it being found. The wind also took the top off a large stack, but the larger part of this was found rolled up in a ditch some distance from the stack. The supposition is that the hay picked up on the field was carried across the river by the force of the wind. The field indicated that track of wind did not cover any great width of territory.

Representatives from Grand Island are expected here Thursday to confer with the street fair committee in regard to arrangements whereby the amusement features at the Grand Island street fair can be secured for the fair here. By both towns using the same companies it is thought that more attractive features can be secured.
