THE fiscal year of the government closes with the present month. Without waiting for the June figures of the country's foreign commerce, it is possible to make a very close estimate of the trade balance for the year from the statistics for the eleven months ending with May. These show that the exports for that period were valued at \$1,385,013,595. For the month of May last the exports were \$124,589,029 and if this volume should be maintained proportionately during the current month the complete returns for the year will show exports exceeding in value \$1,500,000,000, a point not heretofore reached. Assuming that the value of the year's imports will be \$835,000,-000, the apparent balance of trade in favor of the United States will reach the enormous sum of \$665,000,000.—Bee.
