A gentleman in from Logan county today says that in that section the dry weather has ruined the small grain crop and that it is being cut for feed. A second section of No. 5 this morning contained the Cincinnati delegation of Epworthians to Frisco. Leg Cut Off.

Franz A. Bruckner, a piano tuner who came to town about a week ago and had been making his headquarters at Kellner & Stack's store, had his right leg cut off by train No. 4 last night.

Bruckner went to the train with his friend W. H. English and got on the car with him. He remained on the car until the train was in motion and in attempting to get off fell with his right leg under the wheels which passed over it just above the ankle. The unfortunate man was taken to Mrs. Pulver's where an amputation was performed by Dr. McCabe. Bruckner is about thirty-five years of age and is an expert on piano work.

Y. M. C. A. NOTES.

It was hinted that some fellows in North Platte needed a bath and that the Y. M. C. A. was the place to get them. The Grasshopper Question.

The question of the grasshopper plague which at this time is being fully discussed by many intelligent tillers of the soil is a deep one. We understand that many candidates in the coming campaign will take up this question and thoroughly discuss it from the standpoint that the county attorney instruct the commissioners to import several thousand turkeys into Lincoln county, the same to be distributed among the farmers on shares as parties do cattle at this day and age. The supposition is that if this argument is carried out that the bugs which devoured our crops last season and are at this time about to accomplish the same feat again, will be stricken from the earth for ever.

Awful Hot Weather.

Everybody in North Platte knows that the weather of the past ten days has been extremely hot. They don't need the figures to prove it. However, the following statement of temperature for the first eleven days of 1901 and 1900, furnished by Observer Percy are given as a matter of information to those who may desire it:

	1901	1900
July 1.....	83	93
2.....	91	89
3.....	100	89
4.....	100	88
5.....	86	85
6.....	94	88
7.....	97	82
8.....	100	86
9.....	101	96
10.....	98	89
11.....	101	87

The aggregate temperature for the eleven days of July, 1901, is 1,051 degrees; for the eleven days in 1900 it was 972. For the first period the average daily maximum was 95 1/2 degrees, for the latter period 88 1/2 degrees, a fraction over seven degrees hotter this year than last on the daily average.
