Several years ago the road leading through the Bratt hay lands on the south side, which had previously been used as a public highway, was closed by the owner of the land. The case was tried in the district court and a decision rendered against the county and this finding of the lower court has now been affirmed by the higher court. With hay eight or more dollars a ton it is quite likely that growers will continue to ship freely, although prices are likely to advance as fall and winter approaches. The high prices will result in growers reserving but little for their own use and they will depend on running their cattle through the winter largely on straw and corn-stocks.
