In North Platte the fusionists today have dropped sight of all their ticket but Graves and are devoting their entire time to secure for him as large a vote as possible. This forenoon they claimed that Graves would carry the town. This, however, we consider a wild guess, though it is evident that Scharmann's majority will be somewhat less in the city than it was two years ago.

Congressman Neville will leave tonight for Hot Springs, Ark., to resume treatment. Since he has been in town Mr. Neville has not been feeling quite so well, due probably to the change from a southern to a northern climate.

The emergency whistle which was blown last evening to summon the wrecking crew, was by some taken as an alarm for fire and someone telephoned to the waterworks. As a result the fire whistle was blown, and the hook and ladder company chased around the streets for a few minutes.

The organization of the choral class has awakened considerable interest in vocal music, and Prof. Leonhardt has been solicited to give private instruction to a number who are not members of the class. The members of the choral class are highly pleased with the work of Prof. Leonhardt and the membership has increased since its organization. The instructor's object is not to show his competency as a teacher, but to see how rapidly but thoroughly he can advance his pupils. Thoroughness is one of the prime features of the Professor's work, and this is fully appreciated by the class.

Price's Cream Baking Powder is everywhere the acknowledged standard, the powder of the highest reputation, greatest strength, and absolutely pure. It renders the food more healthful and palatable, and using it exclusively you are assured against alum and other dangerous chemicals from which the low-grade powders are made.

Dr. Price's Baking Powder is sold on its merits only—never by the aid of lotteries, gifts, commissions or other schemes. The entire value of your money comes back to you in baking powder—the purest, most economical made.

NOTE.—Alum baking powders are low priced, as they cost but three cents a pound to make. But alum leaves in the bread or cake glauber salts, sulphuric acid and hydrate of alumina—all injurious, the last two poisonous.

High-Priced Apples.
South Australian apples are now sold in the Vienna market at from 5 cents to 10 cents each; choice ones even higher. The apples are packed and shipped in small, long boxes containing 100 each. Each apple is wrapped in tissue paper, and they are packed in wood wool (excelsior) and the leaves of corn husks.

Fly's Eating Apparatus.
The fly's eating apparatus is really a sucker of very large proportions, when compared with the size of the animal. If the mouth of a man were of the same proportionate size as that of the fly his head would have to be enlarged about two feet on every side to accommodate his lips and teeth.

Indivisibility.
Eight hundred and seventy persons claiming to be cousins of a Utica (N. Y.) man within the degree specified by his will are fighting for an estate of \$21,000. Forty-three lawyers are employed in the case. How they will be paid is not recited.—Baltimore Herald.

Churches of Australia.
Australia has proportionately more churches than any other country, the number being 6,013, or 210 to every 100,000 people. England has 144 churches to every 100,000 people, Russia only fifty-five to the same number.

Instance of World's Progress.
A queer instance of the way in which the world is progressing is the announcement in the Athenaeum that the crown prince of Siam is going to publish a volume of essays on the war of the Polish succession, as the result of his studies at Oxford University.

Vice-Presidents Who Became Presidents.
Of the vice presidents of the United States who have succeeded to the presidency through the death of the president, Tyler served three years and eleven months and twenty-six days; Johnson, three years ten months and twenty days; Arthur, three years five and a half months. Roosevelt's term is three years five months and twenty days.

Silk in Piny's Time.
In the time of Piny's silk was supposed to be a vegetable product and his "Natural History" contains a long story of the way in which it was picked from trees in the East Indies and spun and woven into fabrics.

Farming in Australia.
Western Australia is making heroic efforts to develop farming industries, especially the growing of grain. In 1899 the cereals harvested in the colony aggregated less than 1,000,000 bushels.
