"Have you noticed the difference between the Union Pacific employees and those of the B. & M.?" said a traveling man to another. "They are the most courteous railroad men I meet." "This is the difference," he said, "between a well paid and union railroad man and the underpaid and scab labor of the B. & M. road." This is a new thought and one worthy the consideration of the traveling public.—Sutherland Free Lance.

### Rye Yields Well.

Jim Glaze, of Medicine precinct, threshed out 4,600 bushels of rye last week. He had in about one hundred acres. Other farmers in that section report equally good yields of small grain.

### Lots of Barley.

Considerable barley has been raised in the north part of this county and in Logan county this year, and the crop is said to be an excellent one. Cy Fox of Garfield says he will have forty-six hundred bushels, and the Hughes family, father and sons, estimate their crop at ten thousand bushels.

### Crick-Preston Wedding.

George Crick and Miss Flora Preston were united in marriage at the M. E. parsonage Wednesday evening by Rev. Wimberly, a few intimate friends of the contracting parties attending.

The groom is a steady going young man who has spent nearly all his life in North Platte and at present is employed in LeMaster's repair shop. The bride is highly spoken of by all acquaintances. The usual congratulations are extended.

### Will Inaugurate Pension System.

THE TRIBUNE is reliably informed that the Union Pacific company will soon inaugurate a pension system which will apply to all men who have attained the age of fifty-five years and who have been in the employ of the company for ten years or more. We understand the basis of the pension will be twenty-five per cent of the wages drawn by the employe at the time the pension becomes effective.

### Gravel Work Suspended.

Yesterday all grading and ballast work on the Nebraska division was suspended and the foreigners on the work discharged. The grading has been completed west of the state line and the ballast work completed from Kimball west to the state line.

The reason assigned for the cessation of the work is that trouble is experienced in getting gravel at the Sherman pit, a large amount of rock having been encountered.

### Colonel Cody in Omaha.

The Wild West Show exhibited in Omaha yesterday, and the News speaks of Colonel Cody as follows: If "Buffalo Bill" had been the hero of Maui, and had just returned to his own land, he could not have been given a greater ovation than he received this morning.

The moment he arose this morning he was called on to hold an informal reception for the scores of old friends he has in Omaha, friends whom he made years ago when his career was on the plains instead of between the four canvass walls of his great Wild West show.

From breakfast time until he bade them a hasty farewell to take his place at the head of the parade, he mingled with old comrades in arms and admirers by the hundreds, Count John A. Creighton and a number of other equally prominent Omahans were among those who greeted him.

### SOMERSET SAYINGS.

Every farmer and stockman in this section is busy putting up hay.

Mrs. P. G. Mulliken will leave in a few days for a visit with friends in Fillmore county.

### Will the Nightmare be Dissipated?

Elsewhere in these columns will be found the gist of a conversation with Master Mechanic Barnum. Some who read it will consider it a "bluff" on the part of that official, others will probably accept it as true. The removal of the machines from the shop is accepted by some to mean that a better class of machinery is to be installed; others anticipate a reduction of force due to the new shops at Omaha, where with improved machinery work can be performed much cheaper than at this point. The article is published in these columns as a matter of news without recommendation as to rejection or acceptance by the reader.

While a wholesale reduction in the shop force would be regretted by the people of North Platte and for a time materially effect the business interests of the town, it would dissipate a nightmare that has for years hung over the city. This nightmare has been the constant reports that the shops were to be removed or else, as now reported as proposed, a wholesale reduction of the force. These reports have ever had a disquieting effect on business; they have done more to impede the material progress of the town than any other matter. Time and time again building and other enterprises have been mapped out, when one of these rumors would start from some source, and the contemplated improvements would be deferred or else wholly abandoned. Owing to these reports, which at times seemed well authenticated, merchants never knew "where they were at;" it was impossible for them to gauge the buying of stocks, they knew not to what extent they could safely extend credit. Real estate values were effected and unsteady and a general lack of confidence in the town existed. If, therefore, the shop force is curtailed and kept at that figure we will, as citizens and business men, know what to depend upon and can make arrangements accordingly. The nightmare will vanish.

THE TRIBUNE editor has always believed that the business men of North Platte have laid too much dependence upon the shop pay roll and neglected the cultivation of the country trade and the encouragement of agricultural and stock interests, which if properly cared for would amount to many times the payroll. If the proper efforts are made the 1400 acres of sugar beets in Lincoln county this year—which will produce \$75,000—can be increased to 3,000 or 4,000 next year and 5,000 the following year. And this increase will be followed by the erection of a sugar factory. The thousands of tons of alfalfa raised can be increased many times, the dairy interests, which are so rapidly becoming an important factor in the wealth of this country can be multiplied, the hay and stock interests can be expanded, in fact there are many things which if given the proper encouragement can be made to double the volume of business in North Platte.

Whether or not the shop force is reduced, let us in the future pay more attention to the resources which lay before us and are undeveloped; let us strike to make two blades of grass grow where but one has grown before.

### President O'Neill in Town.

President O'Neill, of the International Association of Boilermakers and Iron Shipbuilders, arrived in town yesterday and last evening addressed the striking boilermakers and helpers at the First National bank hall. This forenoon at the same place Mr. O'Neill addressed a union meeting of all the strikers. Mr. O'Neill is a forceful talker and thoroughly understanding the strike situation is in a position to inform the men of the exact condition of affairs and give them practical advice.

Mr. O'Neill will remain in town until Sunday morning.

### For Rent.

THE TRIBUNE editor leaves this evening for a brief, but well earned, vacation, which will include a week's fishing on the Big Laramie and a couple of days' visit in Salt Lake. During his absence the paper will be in the hands of the office force, and if the members thereof ruffle the feelings of citizens by anything they may say through the columns the persons so aggrieved are requested to await demands for "satisfaction" until the editor returns, when the choice of swords or guns will be given.
