From four to six carloads of sugar beets are being shipped daily from points along the Union Pacific in this county. As a carload of beets is worth from \$125 to \$150 to the grower, it will be seen that the money obtained from the beets will this year prove quite an item to the growers.

Hon. James Wilson, secretary of agriculture, was in Omaha yesterday and is quoted by the Bee as saying that President Burt should submit the Union Pacific strike to an arbitration committee. Coal thieves are beginning to get in their work early in the season. During the past week the coal houses of B. L. Robinson, H. C. Bickenseder and A. B. Hoagland have been visited. The latter gentleman reports the loss of about a ton. Residents will do well to securely fasten their coal house doors, and stand the breach loader within easy reach.

Sheriff Carpenter and Deputy Elder are busy this week posting election notices and notifying judges and clerks of election of their appointment. To do this work is no small task. There are five members of the election board in each precinct, and each member must be served with a notice. It often happens that these members live quite a distance apart and to reach the five in each precinct twelve or fifteen miles must be traveled. When it is considered that there are forty-one precincts in the county outside of North Platte some idea of the amount of driving necessary may be gained.

A. T. Nichols, living three miles west of town, received returns yesterday from his first car of beets. The car was a small one and only held eighteen and a half tons, but the beets were of a superior quality testing 18.8 per cent in sugar and 90 in purity, and were rated at \$5.20 per ton. Mr. Nichols had in six acres of beets and the total yield will exceed one hundred tons, thus giving him a revenue of about ninety dollars per acre. This revenue is four times greater than any acre of corn in Lincoln county will produce, and while the expense of weeding, cultivating and harvesting beets is much greater than corn, yet the net revenue derived from beets is several times greater than from corn. Mr. Nichols says that he did not have a fair show, else his results would even have been better. The land he put in beets had not been properly cultivated for several years and was therefore foul with weeds. There is considerable alkali in the ground but it did not seem to interfere with the growth or purity of the beets.

Do You Want to Yawn?

Feel cold shiverings, aching in the bones, lack of energy, headache and great depression? These symptoms may be followed by violent headache, high fever, extreme nervousness, a condition known as malaria. Herbine cures it. Take it before the disease gets a fair hold, though it will work a cure in any stage. J. A. Hopkins, Manchester, Kan., writes "I have used your great medicine, Herbine, for several years. There is nothing better for malaria, chills and fever, headache, biliousness, and for a blood purifying tonic, there is nothing so good." 50c at A. F. Streitz's Corner Drug Store.

The board of directors of the base ball association met last evening for the purpose of devising means for paying off the indebtedness of the association, which amounts to about four hundred dollars. Several plans were suggested for raising funds to pay the deficit, one of which was a minstrel entertainment, and a committee was appointed to arrange for such an affair.

Points of Similarity.

The young pig could reach the swill well enough by putting its snout over the side of the trough, but it was not satisfied with that. It proceeded to get all four of its feet in the trough. But the mother of the pigs thrust the greedy young monopolist to one side. "Get out of that, you selfish, grasping thing!" she said. "You remind me so much of human beings!"

Mount Etna Diminishing in Height.

Mount Aetna is diminishing in height, a fact attributed, of course, to telluric convulsions. The highest peak, which in 1818 was 9,942 feet above the sea level, is now reduced to 9,825 feet. In 1869 the border of the crater was 9,753 feet high; it is now only 9,695 feet. On the other hand, the diameter of the crater itself, which then measured 1,200 feet, has now expanded to 1,500 feet.
