The ten percent increase in wages which the Pennsylvania railroad voluntarily granted \$9,000 of its employees last week, has been followed by the New York Central making a similar advance in the wages of its thousands of employes. Miss Votaw is of course queen of the household and her advent was royally welcomed.

**RAILROAD NOTES.**

Supt. of Motive Power McKeen came in from the west Saturday morning and spent the day in town.

Ed Seyferth spent several days in Sidney last week placing and adjusting the new air compressor which has been installed in the machine shop at that place.

The Sidney Telegraph says: The new boiler for the Union Pacific electric light plant arrived Wednesday and will be put into place as soon as the workmen complete the foundation for it.

Strike leaders claim to have positive knowledge that Harriman has given orders that no more of the Southern Pacific engines shall be supplied to the Union Pacific. Ten or twelve of these engines have so far been received by the latter road.

J. J. Bosko, a fireman between this city and Grand Island who fell from his engine at Wood River last Thursday, is said to be getting along satisfactorily. It was at first thought he had received internal injuries in the head that would prove very serious.

Engineer Fonda and Fireman Baily who were on engine 1859 when it turned over in the Grand Island yards last Friday, came back on their regular run the same evening. Both men remained on the engine and got out by crawling through the cab window. Neither were injured to any extent.

After a conference which lasted but an hour, between the B. of R. T. committee and President Burt, the switchmen on the Union Pacific were granted the "Chicago scale," which means an increase of about twelve per cent in wages. Under the new scale, based on a day of ten hours, day foremen will receive \$3 10, day helpers \$2 80, night foremen \$3 30, and night helpers \$3 00. About a dozen men at this point are affected by the raise.

A New York dispatch states that E. H. Harriman has lost the controlling interest in the Union Pacific. J. P. Morgan and the Standard Oil Co. having succeeded in getting hold of a majority of the stock. This change of the control of the road may result in some radical changes, both in management and in officials. It is freely predicted that President Burt will be deposed and that changes in the heads of departments may be expected.

Reports from the various shops along the line of the Union Pacific are to the effect that the force of strike-breakers is being diminished, the desertions being greatly in excess of the importations. In the North Platte shops a number of men who left at one time or another since the strike began, have returned and gone to work again. The average strike-breaker seems to be a migratory individual who makes a "stake," quits work until he spends his savings and then returns to work. The greater proportion of them seem to be strongly addicted to the drink habit.
