NO. 67

GOVERNOR GEO. L. SHELDON.
Who will discuss the political issues of the day at the court house at two o'clock p. m. Thursday, Sept. 17th.

In speaking of the lambs which died at the stockyards the early part of last week, it was stated that they were poisoned. This was an error, as death was due to water-fouder, the animals having been in transit during the extremely hot weather and when given access to water at the yards drank so freely that they died.

Notice.

All persons knowing themselves indebted to us will please call and settle their account in full. Owing to our recent loss by fire we are badly in need of the money and an early compliance will be duly appreciated.

An Omaha paper says: Since Mr. Harriman's visit here there has been much talk about the probable expenditure of large sums of money in the west. It is believed Mr. Harriman was impressed with the excellent business situation during his short stop and that he will at once order the working out of his program for expansion which was interrupted by the panic almost a year ago. Before his arrival some of the work then under way was started and double tracking of the main line is now being carried on at different places between Omaha and Ogden.

When Engineer Austin started out with the Harriman special last Thursday he had a schedule of a mile a minute to Grand Island. He reeled off the sixty miles to Lexington in fifty-five minutes, and while stopping there for water, was approached by Genl. Supt. Park and told to cut the speed to fifty-five miles per hour, which was done, otherwise the mile a minute gait would have been maintained. When Mr. Harriman made his record-breaking jaunt across the continent some time ago Mr. Austin pulled the train to Grand Island, and the speedometer in Mr. Harriman's car showed bursts of speed at the rate of eight-four miles per hour, and the railroad king seemed to enjoy the gait. Last Thursday, however, he concluded he did not want to ride so swiftly.

Facts About The Great Majestic Range

It is the only range in the world made of Malleable and Charcoal Iron.

It has, beyond any question of a doubt, the largest and best reservoir.

It uses about half the fuel used on other ranges, and does better work by far.

The Majestic All Copper Nickered Reservoir heats the water quicker and hotter than any other. It is the only reservoir with a removable frame.

The Charcoal Iron Body of the Great Majestic Range lasts three times as long as a steel body.

Being made of non-breakable material, there is practically no expense for repairing the Majestic.

As for baking, it is perfection; not only for a few months, but for all time to come.

A Great Majestic Range lasts three times as long as a cheap range; but it don't cost three times as much.

PROOF—We don't ask you to take our word for any of the above statements, but if you will call at our store, a man from the factory, where Majestic Ranges are made, will prove to your satisfaction that these are absolute facts, and will show you many more reasons why the Great Majestic Range is absolutely the best that money can buy.
