

# WANTS HER LETTER PUBLISHED

For Benefit of Women who Suffer from Female Ills

Minneapolis, Minn.—"I was a great sufferer from female troubles which caused a weakness and broken down condition of the system. I read so much of what Lydia E. Pinkham's Vegetable Compound had done for other suffering women I felt sure it would help me, and I must say it did help me wonderfully. My pains all left me, I grew stronger, and within three months I was a perfectly well woman."

"I want this letter made public to show the benefit women may derive from Lydia E. Pinkham's Vegetable Compound."—Mrs. JOHN G. MOLDAN, 2115 Second St., North, Minneapolis, Minn.

Thousands of unsolicited and genuine testimonials like the above prove the efficiency of Lydia E. Pinkham's Vegetable Compound, which is made exclusively from roots and herbs.

Women who suffer from those distressing ills peculiar to their sex should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

If you want special advice write to Mrs. Pinkham, at Lynn, Mass. She will treat your letters as strictly confidential. For 20 years she has been helping sick women in this way, free of charge. Don't hesitate—write at once.

## When you Watch Stops

You cannot make it go by shaking it.

When the bowels are constipated you can disturb them with cathartics but, like the watch, they will not be able to do their allotted work until they are put into proper condition to do it.

One cannot mend a delicate piece of mechanism by violent methods, and no machine made by man is as fine as the human body.

The use of pills, salts, castor-oil and strong cathartic medicines is the violent method. The use of the herb tonic laxative,

## Lane's Family Medicine

is the method adopted by intelligent people.

Headache, backache, indigestion, constipation, skin diseases—all are benefited immediately by the use of this medicine.

Druggists sell it at 25c. and 50c.

Western Canada the Pennant Winner

## "The Last Best West"

The government of Canada now gives to every actual settler 160 acres of wheat-growing land free and an additional 160 acres at \$3.00 an acre. The 300,000 contented American settlers making their homes in Western Canada is the best evidence of the superiority of that country. They are becoming rich, growing from 25 to 50 bushels wheat to the acre; 60 to 110 bushels oats and 45 to 60 bushels barley, besides having splendid herds of cattle raised on the prairie grass. Dairying is an important industry.

The crop of 1908 still keeps Western Canada in the lead. The world will soon look to it as its food-producer.

The thing which most impressed us was the magnitude of the country that is available for agricultural purposes.—National Editorial Correspondent, Ill.

Low railway rates, good schools and churches, markets convenient, prices the highest, climate perfect.

Lands are for sale by Railway and Land Companies. Descriptive pamphlets and maps sent free. For railway rates and other information apply to Superintendents of Immigration, Ottawa, Canada, or the authorized Canadian Government Agents.

V. V. BENNETT, 601 New York Life Building, Omaha, Nebraska.

## SEED BARLEY 60 cts. a bu.

Per Salzer's catalog page 120.

Largest growers of seed barley, oats, wheat, speltz, corn, potatoes, grasses, clovers and farm seeds in the world. Big catalog free or send 10c in stamps and receive sample of barley yielding 173 bu. per acre. Billion Dollar Grass, Oats, Speltz, etc., easily worth \$10.00 to get a start with. Or, send 14c and we add a sample farm seed novelty never seen by you before.

SALZER SEED CO., Box W, La Crosse, Wis.

## HORSES KILLED IN BATTLE.

Fine Memorial to Them Erected in South Africa.

London.—Horses killed in battle now have a monument to their honor. It recently has been erected at Port Elizabeth, South Africa. When Lord Byron put up an elaborate monument to his dog, Boson, everyone regarded it as a mad caprice, but now a general public subscription has been raised by English people for the purpose of perpetuating the memory of "the services of the gallant animals which perished in the Anglo-Boer war, 1899-1902."

Monument to Dead Horses.

Pictures of this monument are being sold in great numbers, mostly among army officers, though the animal-loving public is also buying them largely.

The first horse monument ever raised by public subscription consists of an oblong pile of granite on the top of which are two figures—a life-sized bronze horse and a kneeling soldier offering the animal its food. The figures are beautifully executed. The granite base of the statue serves a utilitarian purpose by forming a fine drinking fountain, both for man and beast, a huge granite block being hollowed out into a trough, into which water flows from three spouts in the form of lions' heads.

On the base of the monument is the significant inscription: "The greatness of a nation consists, not so much in the number of its people, or the extent of its territory, as in the extent and justice of its compassion."

The services of horses in the South African campaigns were quite as essential as those of men. Many of the battles were cavalry engagements, and troops had to be moved rapidly from one part of the country to another. Enormous numbers of horses were requisitioned from all parts of the world, and the mortality among these animals was very great, though there are no definite figures at hand.

The monument to these "gallant steeds" has been raised by small subscriptions from all parts of the British empire; a large portion of the funds coming from various "humane societies" and from officers and men in the army.

## SLATED FOR ATTORNEY GENERAL

G. H. Wickersham of New York Regarded Highly as a Lawyer.

New York.—George W. Wickersham, who is slated for the post of attorney

George W. Wickersham.

general in the Taft cabinet, is a lawyer of this city and a member of the firm of Strong & Cadwallader. In Martindale's American Law Directory he is given the highest rating which it is possible to obtain in that work. Mr. Wickersham is what is known as an "office lawyer," who works out the big problems in litigation while his colleagues carry out the program in court. Ever since work began on the New York subway, eight years ago, he had charge of the legal questions involved. From this post he resigned some months ago. He was also attorney for the receiver of the Knickerbocker Trust Company. Mr. Wickersham graduated from Princeton university in 1880.

## Secret of Dyeing Lost.

Chemistry, one might imagine, is the science which has, perhaps, made the greatest strides during the last five or six decades. Yet modern chemists can not compound such dyes as were commonly used when the great nations of to-day were still unborn. Now and again it happens that searchers after antiquities come across fragments of fabrics which were dyed thousands of years ago, and they are astonished by the wonderful richness of the colors, which, despite their age, are brighter and purer than anything of the modern kind.

## THE CHILD'S SAVING INSTITUTE.

Engaged in the Noble Mission of Protecting and Saving Destitute and Helpless Children.

The chief object of the work of the Child Saving Institute is to save and protect destitute and helpless children. For the most part it is supported by the free gifts of philanthropic men and women of Omaha. Such an institute could not long survive in a small community where the people are as a rule unable to make large contributions. Experience shows that charitable organizations of the magnitude and effectiveness of the Child Saving Institute can subsist only in large population centers, where, of course, there is the greatest need of its kind offices. In the absence of such organization in the small towns dependent children must be taken into the homes of benevolent men and women who thus assume the burden for the community and in some cases these good people can ill afford to do so. In every town and village there are examples of this work of humanity, so that everybody has come to know and to realize the absolute necessity for providing some systematic means of caring for unfortunate children. This is why well-to-do people in the country towns express a willingness to contribute to the support of the Child Saving Institute which has from its origin received destitute children from many places outside of Omaha. In every case of this kind the Institute not only relieved the local community of the burden of caring for such children, but it brought to the relief of the children a systematic, efficient means of protection and care as the result of much study and experience—an equipment impossible to a small town.

The officers of the Institute do not stop to inquire whether the people of any community have done their full duty by the dependent children recommended for admission to the institute; they are taken in and given the best possible care, and later placed into good homes in this or some other community. It is purely a work of humanity, deserving of the sympathy and support of every man and woman in the west. The board of trustees make an appeal to benevolent-minded men in the towns and villages of Nebraska for contributions in support of the Institute and to help erect a new building now contemplated and which is a necessity to the increasing demands of the work.

## BANK GUARANTY IN NEW JERSEY

Bill Based on Bryan's Idea Introduced in Legislature.

Trenton, N. J.—Following the lines of William J. Bryan's bank guaranty deposit idea, a bill was introduced in the New Jersey legislature. It is fathered by State Senator Gebhardt and provides for a tax on banks and trust companies, to be held as an insolvency fund, by means of which losses of institutions which fail can be liquidated.

## STORK GAINS ON FATHER TIME.

Vital Statistics in France Show Excess of Births Over Deaths.

Paris.—The vital statistics for the first six months of 1908 show a gratifying decrease in the proportion of deaths in France, a condition attributed to the more stringent application of laws of hygiene. During this period the births exceeded the deaths by 11,000, against an excess of 55,000 deaths for the corresponding period of 1907.

## TRIPLE TRAGEDY IN SEATTLE.

W. L. Seeley Kills Wife and Daughter and Commits Suicide.

Seattle, Wash.—W. L. Seeley, an attorney and former national bank examiner for Illinois under Comptroller of the Currency Eckles, his wife, Mrs. Kate M. Seeley, a member of the national society of the Daughters of the American Revolution, and his daughter, Miss Rene Seeley, a student at the University of Washington and a member of the Delta Gamma society, were found dead in a bath room of their home in the fashionable Capitol Hill district Sunday.

The victims had been dead since the previous Thursday. The women, each of whom was clad in night robes, had been murdered by being struck on the head, evidently with a hammer. There was no mark of violence on Seeley. That Seeley killed his wife's daughter while insane over financial worries and then committed suicide is the theory of the coroner and the police.

## Mr. Bryan Will not Attend.

Tampa, Fla.—Word was received from W. J. Bryan, that he would not attend the inauguration of President Gomez in Cuba, but instead would extend his visit in Tampa until that time.

Chicago.—The wool and fur warehouse of Silberman Brothers, Michigan street and LaSalle avenue, was burned today. The firm declared that the contents, including 2,500,000 pounds of wool were worth several thousand dollars.

One of the many great pieces of engineering which some of us will perhaps live to see is a canal across Florida by which ocean traffic from the Gulf to the Atlantic will be saved the journey through the Strait of Florida. The project, which has long been urged, is now favored by the Gulf Coast Inland Waterway association.

Tenure of office in Hayti is a simple matter. Anyone is president who says he is and can maintain his position with either a gun or a bluff.

## Late Designs

The first costume is a dainty little bodice in silk spotted voile, to match the skirt. The fullness, back and front, is gathered into a band of insertion; an opening is made at the top of the deep armhole, the rucked sleeve coming from underneath it, and being finished at the elbow by a band of insertion. Satin ribbon, the color of spot, forms the waist-band, and is loosely knotted in front with ends left hanging.

Materials required: One and one-half yard voile 42 inches wide, 2 yards insertion, 2 1/2 yards satin ribbon.

For the second, a simple dress, coarse black flannel net is employed, and is worn over pale gold soft satin; the skirt fits plainly round the hips, and is trimmed at the foot by a fold of net headed by a band of gold passementerie. Passementerie heads the prettily shaped top of bodice, to which the net is gathered; the short rucked sleeve is finished by passementerie at the elbow. A soft, black satin ribbon is brought round the waist, and loosely tied at the left side.

Materials required: Nine yards net 42 inches wide, 7 yards passementerie, 6 yards satin 42 inches wide for foundation, 3 1/2 yards satin ribbon.

White muslin-de-soie, with a blue and green sprig printed on it, is chosen for the charming design shown in the third picture; the skirt is high-waisted, and trimmed with strips of insertion, the two center strips being taken to the top flounce, the others only half way; the deep flounce is set to the skirt by a heading, and trimmed

## THE NEW BUTTERFLY COMB.

There are butterfly barettes and butterfly combs and silver butterflies, all to be worn in the hair, but only one at a time.

This comb is worn at the top of a Psyche knot or three puffs. The butterfly is of finely wrought gold bands, with the body made of colored stones, and it is mounted on a shell hairpin.

## Green Cloth and Fur.

Many of the modern gowns take the oldest inhabitant back to another generation with a swing. What girl was there 30 years ago who didn't want or own a tight-fitting green broadcloth gown made with an overskirt, tight, long sleeves and the edges of the gown bordered with brown fur.

This precise costume is back in fashion, overskirt, tight sleeves, fur bands and all.

In addition to this is a round toque of brown fur, with a green silk center and a perky feather standing upright at the side. The wearer carries in her hand a granny's muff of brown fur.

## Dark Colors in Vogue.

In all the gowns and in all dresses for morning wear or simple afternoon wear dark colors are those most in vogue, but there are certain bright tints of old rose and saffron that are exceedingly fashionable.

## Jabot Effects.

Eighteenth century effects are ethereal looking affairs, made from ten-inch wide silk scalloped, closely set triple box-plaited lisse stitched through the center and attached to a wide inner ribbon band which joins at the back beneath a fluffy lisse butterfly bow. Sometimes the ruching is set upon the top edge of an inch and a half wide embroidered band or chiffon lined silver ribbon and closes under a huge, outspreading bow.

## Delicate Scientific Instruments.

The human heat sense can not realize a difference of temperature beyond one-fifth of a degree; but the thermometer, an instrument 200,000 times as sensitive as the skin, notes a difference of a millionth of a degree. A galvanometer flexes its finger at a current generated by simply deforming a drop of mercury so as to press it out of a spherical shape into that of an egg.

## SPHON'S DISTEMPER CURE

will cure any possible case of DISTEMPER, PINK EYE, and the like among horses of all ages, and prevents all others in the same stable from having the disease. Also cures chicken cholera, and dog distemper. Any good druggist can supply you, or send to Mrs. 30 cents and \$1.00 a bottle. Agents wanted. Free book, Sphon Medical Co., Spec. Contagious Diseases, Goshen, Ind.

## Wouldn't Take Him Seriously.
