Clever Crook at Kearney.

The merchants of Kearney were "shylocked" out of a few dollars Tuesday by a young man giving his name as Frank Walker. Mr. Walker first made his appearance at the Farmers bank, where he deposited the sum of \$90 and procured a check book. He then proceeded to the grocery stores, where he bought a small bill of goods and gave a check for \$5, receiving the balance in change. This scheme was worked on every groceryman in town and on three hardware stores. If there was any question he would tell them to call up the bank and see if he did not have an account. After he had made his rounds he went back to the bank and withdrew his account and disappeared. The trickery was not discovered until some of the merchants got uneasy about him not calling for the goods. In several of the places he approached them by saying that he owed them some money for goods that his hired man had bought and wanted to pay it. After the merchant had looked over his books and found no such an account thereon he was ready and willing to fall in.

Swept Over Niagara.

This terrible calamity often happens because a careless boatman ignores the river's warnings—growing ripples and faster current—Nature's warnings are kind. That dull pain or ache in the back warns you the kidneys need attention if you would escape fatal maladies—Dropsy, Diabetes or Bright's disease. Take Electric Bitters at once and see backache fly and all your best feelings return. "After long suffering from weak kidneys and lame back, one \$1.00 bottle wholly cured me," writes J. R. Blankenship, of Belk, Tenn. Only 50c at Stone's drug store.

Trunk owners will particularly enjoy traveling through Iowa in future. They will be able, without fear of law, to square many long-standing accounts with the smashing fraternity.

In the Automatic Refrigerator, the air from the food chamber goes direct to the ice, the impurities are thoroughly cooled and the air passes again to the food chambers.

As the currents of air in food chambers all flow upward and there is no downward movement, here can be no condensation or dampness, or mixing of food odors ABSOLUTELY NONE. There is a solid partition between the food and ice chambers except at extreme top and bottom.

No air can get from the food to the ice chamber without going the entire height of the food chambers, thus assuring proper temperature and perfect circulation in all parts of food chamber, this would not be possible with the open work partition.

The AUTOMATIC REFRIGERATOR contains a WATER COOLER, it is situated between the ice and food chamber. Not at all in the way.

No extra ice, drinking water always nice and cool.

Come in. We will be pleased to show you the most up-to-date refrigerator on the market.

THERE is a difference here between old men's and young men's styles—and it is a mighty sight more than claim-deep.

Edsheimer Stein Clothes

are built by makers who study you—who know what you want—who understand your figures, your ideas and your price-reach. Clothes made with such graceful shapes already in the garments that they'll improve a bad figure and set off a good one. They're real young men's clothes.

The label in the coat means that if you're ever disappointed you won't be disappointed long—if they're wrong, just give back the clothes and get back your money.
