The percentage of boys and girls of school age not in school is rapidly increasing with increase of population and in the colleges the

women are outnumbering the men. He declared it was a great evil for college men to marry girls who had never seen the inside of a college and a greater evil for college women to marry men, who had never enjoyed the benefit of a college education.

Men he said were supposed at one time to have superior brain power but now the woman compete with the men in the different studies in mathematics and sciences.

"SHOW ME"

While probably only a small percentage of prospective purchasers of mowing machines are born in the state of Missouri, there seems to be no remark that applies more perfectly to the condition of mind of mower buyers than the one that is nationally associated with the state of Missouri, "Show me." In no other way do the majority of us get so good an idea of an article or proposition as by seeing. Prospective mower buyers come in and see the old reliable Standard Mower. It was the best mower fifty years ago and it is the best today. We carry all sizes of the mower and rake.

Yours for the Mower trade,
