

HIGH IN INDUSTRY

Greater New York Is First, with Chicago Second.

Clothing Heads Business in Gotham, While Meat-Packing Holds First Place in Illinois Metropolis, as Compiled.

Washington.—The industrial district of Chicago, embracing an area of 500 square miles and a population of 1,815,107 in 1900, is the second industrial district in importance in the country, according to bulletin just issued by the bureau of the census. The figures upon which the comparisons are based are taken from the manufacturing census of 1900 and 1905. New York, of course, ranks first in importance, while Philadelphia, Boston, the iron and steel region around Pittsburgh, St. Louis, Baltimore, Cincinnati, Cleveland, Buffalo, Minneapolis-St. Paul, San Francisco and Providence follow in the order named. The bulletin shows the influence of the large urban populations, with their enormous wealth and transportation facilities, upon the manufacturers of the country.

The bulletin, which is a summary of the conclusions reached in a long report, illustrated with maps showing the cities and townships in the districts, with the steam and electric railways, rivers and canals says:

"Products valued at \$2,144,488,093 were manufactured in the factories of the industrial district of Greater New York during the year 1904. The increase in the value of the output of the entire district in 1904 as compared with 1900 was over half a billion dollars (\$530,220,746, or 23.8 per cent.). The increase in the number of persons engaged in these industries was 140,966, the number of employees in 1904 being 735,460.

"The city of Greater New York was credited with products valued at \$1,526,235,006, or 71.2 per cent. of the total value for the district in 1904. In the 376 square miles that were outside of the corporate limits of the city, but were so closely allied with it industrially that they were included in the industrial district, the manufactured products were valued at \$617,965,087. The increase in value for the city was 30.2 per cent., while for the remainder of the district there was a gain of 40 per cent.

"The manufacture of men's and women's clothing was the foremost industry in this district in 1904, the products being valued at nearly one-third of a billion dollars and constituting 14.5 per cent. of the value of the products of the entire district. The average number of wage-earners employed in the industry was over two per cent. of the entire population of the district. The printing and publishing industry ranked second; the

THE PRINCE OF WALES.

From a recent photograph of the heir to the throne of Great Britain.

refining of sugar and molasses third, the smelting and refining of copper, lead and zinc fourth and the manufacture of textiles fifth, with products aggregating over \$465,000,000 in value.

"The industrial district of Chicago comprised an area of 500 square miles and had a population of 1,815,107 in 1900. The city of Chicago is credited with 25.8 per cent. of the area and 93.6 per cent. of the population of the entire district. The value of products for the district in 1904 was \$970,974,280; the number of wage-earners and salaried persons employed, 288,869; and the number of establishments reported, 8,382. The increase in the value of the products for the district in 1904 as compared with 1900 was \$164,489,639, or 20.4 per cent. The increase for Chicago alone was \$157,157,136, or 19.7 per cent., while the gain for the surrounding places was \$7,332,503, or 85.6 per cent. Thus the rate of gain for the section outside of the central city was much greater than that for the city itself.

"Among the industries, slaughtering and meat-packing was the first in value of products, with \$269,581,456, or 27.8 per cent. of the total value of

the manufactured products of the Chicago district. The steel industry, the manufacture of foundry and machine shop products and the printing and publishing industry were of great importance, with aggregate products valued at \$230,413,938."

FISH TO DESTROY MOSQUITOES

Finny Tribe from Barbadoes Will Be Used for This Purpose on Panama Canal.

Washington.—Uncle Sam is importing fish into the Panama canal zone now to eat up the mosquitoes there before the latter eat up his nice new canal.

According to the Panamanian officials, the fish employed by the government to eat up the pesky little stingers are popularly known as "millions" and less popularly known in the city directory of fishdom as "Girardinus poecilioides," and are natives of Barbadoes West Indies.

These fish belong to the group broadly known as top minnows, so called from always feeding at or near the surface of the water, for which the structure of their mouth and habit of swimming, with a large portion of their back out of water, adapts them. This habit, in connection with their small size, is of especial value, as it enables them to secure their food by pursuing it across plants and masses of algae over which there is only a thin film of water. They derive their name from the great schools in which they are found, are small, never over one and one-half inches long, and are found in stagnant, sluggish and running water, either fresh or brackish.

The group to which they belong is omnivorous, but it has been discovered that if mosquito larvae are accessible the "millions" will eat it in preference to other food, and they are said to eat the adult mosquito also. They ascend streams against a swift current and penetrate into the smallest rivulets. The species is viviparous; that is, their young are born alive and not hatched from eggs. This aids in their rapid multiplication, as the young, rapidly-moving fish are less exposed to enemies than they would be if hatched from eggs. They are hardy and stand transportation well.

The absence of malaria in Barbadoes has been attributed to the presence of these fish, by their destruction of the larvae of malaria carrying mosquitoes.

REASON FOR SWINGING ARMS.

is a Reminder of the Days When We Walked on All Fours, Says Scientist.

London.—Sir Victor Horsley, lecturing before a medical society, explained the habit of swinging the arms when walking. He said it was unnecessary and a relic of days when we walked on all fours. He said we still keep on moving all four limbs alternately when we walk upright.

Sir Victor set forth some ideas concerning the functions of the cerebellum. Primarily the cerebellum must be regarded, said the lecturer, as an organ which has an important part in correct performance of many of our automatic actions.

Walking, standing, running are examples of such actions, he said, which cannot be accurately carried out without normal, well-balanced cerebellum. New-born animals, he said, cannot stand. They sprawl, and before they can stand or walk or run there must be a development of the cerebellum.

In proof of this Sir Victor pointed out that the cerebellum of a full-grown cat showed fully developed cells and fibers, whereas in the brains of new-born kittens this portion is not yet organized into active nerve tissues.

SURPRISED AT THE SCHEDULE

Colored Man Felt He Was Being Railroaded into the Class of "High Financiers."

A colored man was tried the other day before a Charlestown court for stealing some clothes from a young white man. A pretty clear case was made out against the colored man and he confessed.

"I reckon I ain't got nothin' to say, white folks," he said with humility, "cep'in' his jes talk it is."

"Well, since you admit your guilt," said the judge, "I will try to make it light for you. But first we will have to get an estimate of the value of the clothing. Mr. Plaintiff, what do you value these articles at?"

"The dress suit cost me \$80, your honor," replied the young man, "the overcoat \$75 and the silk hat \$10."

"Mr. Judge," broke in the accused, "I'd lak ter say des one word befo' you goes any fudder."

"All right; go ahead."

"I submit dat I tuk dem clo'es, boss man, but at no sich prices as dem!"

Laundry work at home would be much more satisfactory if the right starch were used. In order to get the desired stiffness, it is usually necessary to use so much starch that the beauty and fineness of the fabric is hidden behind a paste of varying thickness, which not only destroys the appearance, but also affects the wearing quality of the goods. This trouble can be entirely overcome by using Defiance Starch, as it can be applied much more thinly because of its greater strength than other makes.

New England English. Complaint was made to a local man by one of his employees that boys who were swimming in a pond were causing quite a nuisance. The owner of the property gave the man the privilege of putting up a sign, as he had asked permission to do it. The notice reads as follows:

"No Lolling or Swimming on Theas Grown—Order by —. If Caught Law Will be Forced."—Berkshire Courier.

Important to Mothers.

Examine carefully every bottle of CASTORIA a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Holt* In Use For Over 30 Years. The Kind You Have Always Bought.

Flowers. Flowers have an expression of countenance as much as men or animals; some seem to smile; some have a sad expression; some are pensive and diffident; others, again, are plain, honest and upright like the broad-faced but thesauriferous and soldierlike tulip.—Henry Ward Beecher.

A Rare Good Thing. "Am using ALLEN'S FOOT-EASE, and can truly say I would not have been without it so long, had I known the relief it would give my aching feet. I think it a rare good thing for anyone having sore or tired feet.—Mrs. Matilda Holtwert, Providence, R. I." Sold by all Druggists, 25c. Ask to-day.

Innovation. Stella—Did she have an unusual wedding?

Bella—Yes; the church was decorated with common tropical plants instead of the rare.

Nothing causes a young widow to sit up and take notice quicker than the discovery that another widow is on the trail of the man she has spotted for No. 2.

Smokers also like Lewis' Single Binder cigar for its purity. It is never doped, only tobacco in its natural state.

Let us not seek to alter our destiny, but let us try to make the best of our circumstances.—C. H. Spurgeon.

Mrs. Winslow's Soothing Syrup. For children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

The battle without goes as goes the battle within.

AFTER FOUR YEARS OF MISERY

Cured by Lydia E. Pinkham's Vegetable Compound

Baltimore, Md.—"For four years my life was a misery to me. I suffered from irregularities, terrible dragging sensations, extreme nervousness, and that all gone feeling in my stomach. I had given up hope of ever being well when I began to take Lydia E. Pinkham's Vegetable Compound. Then I felt as though new life had been given me, and I am recommending it to all my friends."—Mrs. W. S. FORD, 1938 Lansdowne St., Baltimore, Md.

The most successful remedy in this country for the cure of all forms of female complaints is Lydia E. Pinkham's Vegetable Compound. It has stood the test of years and today is more widely and successfully used than any other female remedy. It has cured thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, flatulency, indigestion, and nervous prostration, after all other means had failed.

If you are suffering from any of these ailments, don't give up hope until you have given Lydia E. Pinkham's Vegetable Compound a trial.

If you would like special advice write to Mrs. Pinkham, Lynn, Mass., for it. She has guided thousands to health, free of charge.

A 25c RAZOR WITH A \$5 SHAVE TRY IT

If you don't get the cleanest and easiest shave you've ever had, if for any reason at all you're not better satisfied with the "SHARP-SHAVER" than any razor you've ever had, send it back to us and we'll send your money back to you.

Complete Razor mailer post-paid on receipt of quarter or stamps.

SEEKS DEATH AT SEA

Two Men and Dog Jump Overboard.

Malay and Lascar of the Crew of the British Steamship Kabinga Delay Vessel in Vain Attempt to Commit Suicide.

New York.—When the British steamship Kabinga came into port the other day from Calcutta and other far eastern ports, Capt. J. Arthur Smith, her commander, had a yarn to tell.

Furthermore, every word that Capt. Smith said is corroborated by the ship's log and are not Abdul bin Mohammed, the ship's quartermaster, whose grandfather was a Malay pirate and who looks as if he ought to have been; one Sheikh Monwaralla, a Lascar fireman, whose father once made a pilgrimage to Mecca, and, above all, Blackie, the Japanese dog, on hand to support the captain's testimony, if support were needed? Both men jumped overboard during the voyage in an effort to commit suicide, and so attached was Blackie to the Malay that he followed him into the sea.

"On the morning of the 5th, five days out from Calcutta, as we were coming down the Bay of Bengal," said Capt. Smith, "I was finishing my breakfast at five minutes before eight, when I heard the cry 'Man overboard!' I rushed out upon the bridge and found that Abdul had jumped into the sea. As I came out I was just in time to see Blackie, for whom I wouldn't take a thousand dollars, jump after him.

"A life buoy was thrown out immediately, and I stopped the ship, ordered the lifeboat lowered, and David Ibbister, the chief officer, went out in her and picked up both the dog and the man. Within fifteen minutes from the time the Malay jumped the rescue had been effected and we were on our way again.

"I asked the Malay why he wanted to die, but all I could get out of him was, 'Me tired work.'

"Well, one attempt at suicide is enough for any one voyage. But I'll be blessed if on the night of the next day a Lascar fireman, who goes by the title of Sheikh Monwaralla, did not go and try the same game.

"It was pitch dark at the time, but we carry a new patent life buoy that sends up a flare of light as soon as it is thrown overboard. One was thrown

after Monwaralla, a boat was launched immediately and within twenty-two minutes we had the Lascar on board."

FATHER OF THIRTY CHILDREN.

John Guy, Maryland Farmer, Thrice Married, Still Robust and Hearty.

Beaver Dam, Md.—Col. Roosevelt started for Africa before being acquainted with the fact that one of the best exponents of his anti-race suicide theory is John W. Guy, who has been the father of 30 children, 20 sons and ten daughters, of whom there are 21 living, his eldest child, a son, being 53 years old, his youngest, a daughter, being two years of age.

Guy, who is a farmer, resides about one mile from Melfa station, on the New York, Philadelphia & Norfolk railroad, and was 75 years old on April 6.

In 1855 he was married to Mary Ann Rayfield, a farmer's daughter, and to this union seven children were born. On September 12, 1868, he married Miss Margaret Elizabeth Ayers, after a romantic elopement, who bore him 18 children. His third wife was Miss Lola Crockett, a beautiful girl of 16 years, whom he married when in his sixty-fifth year, in 1898. To this union five children have been born.

Despite the fact that 16 of his children are married, he has only 23 grandchildren and three great-grandchildren. One of Guy's sons, by his first marriage, married a sister of his present wife, and a daughter by his second wife married a brother of his present wife. Although well advanced in years, Guy still is robust and hearty, without a bend in his body or a gray hair, and he may be seen each day working on the farm with his farm hands.

Child is Offered for \$500.

New York.—Harry Beach, 23 years old and out of employment, and his wife, both of whom have been hungry much of late, have offered their two-week-old baby for sale for \$500 cash. When Beach's first wife died, two years ago, she left him with two children and he married his present wife six months later. In discussing their offer of the new baby for sale Beach and his wife said that to keep the child would only inflict their hardships upon him and that by selling the boy they would provide him with a good home and bring prosperity to themselves.

The Sunshine Ginger Wafer

These are called *Yum Yums*—they are made at the "Sunshine Bakeries" too—with the other "Sunshines." Baked in white tile top floor ovens—amid pure air and sunshine. They are the best ginger snaps you ever tasted.
