### Fireless Cookers

and the art of fireless cooking is old, having been used in Norway and the old world, ages ago—the only difference is that our Cooker is built scientifically for any practical purposes. The Cooker retains the delicate flavor of the food, otherwise lost in constant boiling—it retains the sweetness of cereals, soups, meats—in fact anything that can be boiled, may be involved from the Cooker.

### The Scientific Cooker

is Sanitary—clean. Construction is as follows—case is made of dovetailed, select, kiln dried gumm wood. This is stained a dark mission, it is then waxed, after waxing the case is oiled and rubbed, leaving it with a beautiful dull black mission finish. The kettles are of steel with double coat of acid proof sanitary enamel, patent lock covers. One kettle will hold six quarts, another four quarts.

**THIS COOKER** is tightly packed with about 35 to 40 lbs. of mineral wool and abestos, making it air tight—excluding all outside air and retaining the heat. **THE TOP IS OF SHEET STEEL** which is beautifully enameled and decorated giving the cooker a handsome appearance. Any liquids or foods accidentally spilled on this top can be easily wiped up. **IN OPERATION** this wonderful invention is simplicity itself. You simply prepare the food to be cooked in the regular way—place it on the stove and bring it to boil—then immediately transfer it to the cooker, cover it tightly, add the insulated pillow covering—drop the lid and let the cooker do the rest. After a few hours remove the cover and serve the meal boiling hot—perfectly cooked and with a taste that will prove delightfully surprising. Best results can be had only by following carefully directions given in cook book which is included with each cooker. **FOR CEREALS** that require long cooking, as oatmeal, it will prove a revelation—prepare the oatmeal at night before retiring, bring it to a boil—place it in the Cooker, leave it there all night. In the morning, on arising, your breakfast is ready to be served—deliciously cooked. **INSTEAD OF COOKING BEANS**, etc, barley, peas, and other foodstuffs over a hot fire, which takes hours and hours—and fuel—simply bring your water to a boil, place it in the cooker and that ends it.

#### AN INVITATION.

We request you to honor us with a visit.

We are very proud of our store, our stock and what we believe to be an artistic display of Jewelry, Silverware and Watches.

While we are anxious to have you make your purchases here, no person in our store will ever urge you to buy.

A jewelry store should be a display room—an exhibition parlor, and the wares should themselves cry out "Buy Me."

Honor us with a call—let us show you what you may be interested in. We have a magnificent collection, and one well worth inspection, even though you are not ready to buy.
