## Long, Lithe Lines that Express Suppleness and Grace. . . . .

**T**HERE! We have given you the story of Fall Corset styles in one brief sentence. You, madam, who are posted in fashion matters will realize its truth at once. You will likewise see that Gossard Model "F" carries out Fashion's dictum with remarkable faithfulness.

### THE Gossard Corsets

"They Lace in Front."

These are the corsets which are built according to the tenets of the "New School" of corset design. Through "New School" methods every seam and gore is placed with scientific precision—every bone is located with the accuracy that obtains in adjusting the balance wheel of a fine watch. Ever, Gossard Corset is boned with Electrobone, a boning which in resiliency and strength excels whalebone. The basis of Electrobone is high carbon clock-spring steel, which is the only quality considered adequate to mould the figure to the exquisite Gossard line. And the only quality that can be rust-proofed without destroying its flexibility. But in commending the Gossard Corset to you, we particularly call your attention to the fact that in the Gossard we are showing not merely a model for every figure, but a "long model" for women of every height and build. This is an innovation that you will appreciate. The Gossard is the American modification of the original French front-lacing corset. Its constructive principle is: that beauty and hygiene should have their closest union in a corset that essays perfection. The beautiful sculptured back and the adjustable front-lacing features of the Gossard are the product of this principle. It is the only corset that has the unqualified approval of physicians. Instead of injurious pressure, it affords support for the organs, compels a correct standing position and carriage, and imparts that poise which never fails to elicit the admiration of the beholder. The proof of the corset is in the fitting. We extend a cordial invitation to every lady in this vicinity to visit our store this week and meet Miss Ella McLemore the Company's expert corsetiere, who has been trained in accordance with the New School of corset design and construction. She will be pleased to show you the corset which is exactly adapted for your figure.
