TWENTY-SIXTH YEAR.

NORTH PLATTE, NEBRASKA, APRIL 19, 1910.

NO 25.

Residence Lots.

There are more new houses being completed and built in the Trustee's Addition this spring than in any other 10 blocks of the city.

There is a Reason.

The reason is that each lot has

1. Five foot cement sidewalks,
2. Graded streets,
3. Sewer,
4. City water,
5. Free delivery of mail.

When the Waterworks controversy arose and neither the Waterworks Company nor the city would provide water mains, an order was entered in the court having charge of this bankrupt estate, directing the Trustee at its own expense, to lay water mains for all persons needing the same in the Trustee's or Riverdale Additions. These water mains are now being laid. The Trustee laid at its own expense five foot cement crossings.

The Trustee's Addition is being improved with better improvements than elsewhere in the city, because the lots are purchased by those who build their own improvements. It is not a tenement district.

Lot Prices \$250 to \$400.

Five per cent discount for cash. Time payments, one-tenth purchase price down and one-tenth every three months.

For sale by

Wm. E. Shuman.

Unusual interest is being manifested everywhere in the production of "St. Elmo," Neil Twomey's dramatization of Augusta J. Evans' novel of that name, which will be seen in this city at the Keith next Friday evening. The production is on an elaborate scale and the producing company is made up of metropolitan players, in the selection of whom every care was exercised. In this section of the country especially, the play will be received with great curiosity, for the book has been since its first appearance more than two generations ago, the leading literary picture of southern life.

John Crockett, of Evanston, Wyo., is visiting relatives in town.

Dr. Scott Wisner, late of Ft. Collins, Col., a veterinarian and surgeon, has opened an office over McDonell & Graves' drug store.

Irma Huffman Wins.

In the western Nebraska declamatory contest held at Gothenburg last Friday evening Miss Irma Huffman, of this city, won first honors and will represent the district in the state contest. Seven towns were represented in the contest, and we understand Miss Huffman's efforts were so far superior to the other contestants as to make the decision of the judges an easy matter. This is certainly creditable to the young lady.

North Platte Wins Cup.

In the trap shoot at Gothenburg Friday between teams representing the North Platte and Gothenburg gun clubs the former team won by a score of 763 to 748. There were ten men to a team and 100 birds to the man. A. D. McDonell made the highest score for the North Platte team, Henry Rebhause second highest and Ralph Starkey third. The result of this gives the North Platte team the permanent possession of the trophy cup, having won it thrice in succession. For nearly two years the possession of the cup has been in contest between the two teams. The shoot on Friday was held during a high wind which resulted in lower scores than would otherwise have been made.

Wireless for Dispatching Trains.

Train dispatching by wireless telegraph is to solve the telegraphic problems of the storm swept reaches of the west for the Union Pacific.

While the official announcement is yet to be forthcoming, it is known that the management of the system is now planning the installation of wireless stations in several divisions in the western territory where through the winter traffic has been much affected by the winter storms.

This move by the Union Pacific will constitute the first adaptation of the wireless to the purpose of railroad operation in the United States.

The number of stations has not been determined. They are to be placed, according to the present plans, at a distance of about 100 miles apart. Developments in the Omaha experimental station are expected to make these western stations be readily within reach of headquarters at all times.

The purpose, however, for the time being of the installation will be to insure the transmission of train orders regardless of the conditions which affect the wire lines. Ultimate developments are expected to result in an extension of the use of the wireless.

The practicability of the project now determined upon has been demonstrated to the satisfaction of the railroad engineers by the operation of the Telefunken plants by the army signal corps at Fort Leavenworth and Fort Riley.

The necessity for the wireless was pointedly brought to the notice of the Union Pacific in the recent storms which cut off all communications to the westward for two days, during which the operation of trains was rendered slow and dangerous. Snow, sleet and wind cannot mar the efficiency of the other wave on which the wireless message travels.
