Pages 9 and 10.

Wrecked His Auto.

Sunday night Dr. E. C. Stevenson was called to Mr. Youngs, who lives in Jeffreys canyon. He was accompanied in his auto by Mrs. T. C. Northley. At Jeffreys canyon the bridge across the creck had been moved and no warning put up to keep one off the old road, and as the new road to the bridge had been as the new road to the bridge had been traveled but little, the doctor kept the main traveled road and run into the creek with his auto. He noticed the bridge was gone just before he came to it and reversed the machine but too late and so it plunged down about ten feet into the creek, throwing the Doctor and Mrs.
Northey out. They were not hurt and
walked the balance of the way, a distance of about two miles. The doctor
has put in a claim for the damage to his auto to the board of county com-missioners in Lincoln county.—Gothenburg Independent.

Lemon Precinct News.

Mrs. E. Canright is at home once months. She has recovered from her burns enough so she can do a little house work. We are all glad to see her

in our midst rgain.

B. C. Brewer is building a new frame house for Mr. Carlisle. Sod houses will soon be a thing of the past even in the

sand hills,
George Messelhiser is moving his
house to his claim about one-fourth of
a mile west of his old place.
Mr. Harmon's little child is sick with

the croup.
Mabel Peters, of North Platte, is staying with her sister Mrs. Livingston this week. Mrs. Livington's school is progressing very nicely. Attendance is good for this time of the year.

Fred Bremer took home two fine cows from North Platte Saturday.

Rattlesnakes are about the best crop the sandhills have this spring so far, although the prospects for hay is fine. The Lemon school will close Friday,

The Lemon school will close Friday,
July 1st, with a box supper. Everybody is invited. Ladies bring your boxes
and men your pocket books. A good
time is assured for all.

Several of our people are attending
church and Sunday school in the new
block school house in Dist 86.

Mr. and Mrs. Greeley returned from their visit to the east part of the state Saturday. They report a fine time.

Miss Minnie Carlile is home once more after visiting her sister Mrs. Weeks of McPherson county for several

Mrs. Livingston is preparing a programme for the last day of her school.

Walker Precinct.

Mrs. J. Bauman and son, who had been visiting relatives in this vicinity and other parts of the county, left Friday for their home at Raymond, Minn,

Wm. Peterson and Oscar and Fred Gewecke were fishing on the Platte near Brady last week. The fish they got well paid them for their trip.

Grandma Griffis is visiting with her son Frank for a few days.

Esther Stoner is home from Gothenburg for a short time.

A Children's Day exercise will be given by the Shaw Sunday school, to which all are cordially invited.

Emphord, the infant son of Mr. and Mrs. Leonard Peterson, was accidently drowned in a tank in the forenoon of June 13th. Dr. Charton, of Moorfield was summond at once but found the child past medical aid. The funeral was held the following day from the Shaw school house, Rev. Sinnette officiating, interment at the Farnam cematery.

Rafe Wallingford is back from Haxtun, Colo., for a short time.

Frank Devine, who has been sojourning at Wallace for the past four months, came down to visit his parents.

Mrs. J. Peterson, of Gothenburg, came out last Friday. Mrs. Peterson expects to leave for Pueblo, Colo., in the near future, to visit her daughter, Mrs. J. C. Phares.

Twould save much needless woe. Doan's Kidney Pills cure sick kidneys,

Doan's Kidney Pills cure sick kidneys, North Platte people endorse this; Mrs. J. F. Fillion, Sixth St., West, North Platte, Nebr., says: Doan's Kidney Pills are a remedy of marvelous curative powers and I believe them to be worthy of my highest endorsement. I suffered for three years from a dull, grinding ache through the small of my back and a terrible bearing-down sensation through my loins. The passage of the kidney secretions were also too frequent, causing me considerable annoyance. About a year ago I was advised to give Doan's Kidney Pills a trial and procured a box at McDonald & Graves' Drug Store. This remedy Graves' Drug Store. This remedy helped me from the first, strengthing my back, toning my system and restor-ing me to good health.

HIS STUPID LITTLE WIFE

By ESTELLE MARSH

Copyright, 1910, by American Press Agrectation

They were walking together on the riverside

Both were young, and one was beautiful. The crown of her bat was big enough to fit the head of the colossal statue of Athena on the Acropolis at Athens. They were talking of love and marriage. Most young couples while dawdling talk either of love and marriage or platonic friendship, the man taking the ground that it is impossible, the girl that it is the most desirable form of affection between the

"As for me," he said, "when I marry I prefer a girl whom I can love with my whole heart and soul."

"Then you must get one with a strong personality, good judgment and an excellent mind."

"I wish nothing of the kind. Give me a girl with a pink and white complexion, a pretty pair of rose lips and not too much brain."

"Well, I declare!" "She must not only be stupid, but must prove berself stupid. No; I will not even trust her to do that. I will prove her stupid myself."

"You don't mean what you say. How could you love such a giri?" "I love her already."

She cast a quick glance at him, then bent her eyes to the ground. She had been under the impression that he had been falling in love with her. She was at a loss to know what this meant. Had she a rival?

"A man doesn't wish the counterpart of himself in a woman. Her intellectual gifts repel him; her feminine stupidity delights him. If she is strong he looks upon her as he would a man, if she is weak he longs to protect and comfort her."

"This dunce that you love, is she"-"She is not a dunce judged by a proper standard. There must be one standard for men and another for women. A man-a real man-wouldn't know how to take care of a baby-at least he wouldn't do it the right way. When I was a boy my mother left me one afternoon to mind my little sister. eight months old. I wished to go and play. If I could put the baby to sleep I would be free. I blew in the little thing's eyes, forcing her to shut them. I kept up this process till she went to sleep. You see, I didn't know anything about bables."

She thought awhile before saying. "It seems to me that was rather clever "But you couldn't lay it down as a

recipe for putting babies to sleep." "No. I suppose it wouldn't do al-

"Will you kindly tell me," he asked, breaking away from the topic of conversation, "how you women make those big crowned hats stay on the tops of your heads? I don't understand why they don't slip down over your eyes. If I wore one of them I'd have to cut holes to see through."

"Well, you see, we women have a lot of hair and all that to fill them up." "Oh, I supposed there was some patent contrivance for the purpose."

"We have hatpins, you know." "You mean those rapiers with coach-

man's buttons for hilts?" "They must be long to go through

the large crowns." "I see. Would you mind unsheathing yours and letting me see the inside

of your hat?" She removed the hatpins and, taking off her hat, showed him the inner crown.

"Why, the diameter is two or three inches less within than it is without!" "I don't understand you."

"This part inside is smaller than any man's hat. There is a false inner crown."

"There is a difference, isn't there?" "I should say so."

"I didn't know that."

"Better put it on again and the swords through. It might fall down over your eyes." "I dare say," pouting, "you consider

me very stupid." "I have not left it to you to prove yourself so. I have done it myself.

You know I said I would." "In the case of the creature you wished to marry."

"There is a method in my madness." "Will you kindly explain wherein the method lies?"

"I told you I wished a stupid girl for a wife. Could there be anything more stupid than a girl wearing one of these hats on her head and not knowing how it is kept on the top of her head?"

There was a slap with one hand, a caress with the other. She may have been stupid about the hat, but she was bright enough to catch his "method" and, catching it, held her tongue. Indeed, from this point she let him to do all the talking. He took her hand and whispered a number of lovely things in her ear.

They had been married long enough for the problems of life to loom up such as winter coal bills, gas bills, doctor's fees and other items that will always be coming up without being expected. Notwithstanding her stupidity she proved a good manager. But at the end of the first year one day her husband received a bill for a new hat the amount of which aston-

ished him. He remonstrated. "I thought it very cheap," she said. "Cheap! Are you so stupid as to buy a thing merely because it is cheap?" "I thought you loved me for my stu-

you wouldn't whistle at your work. Office Boy-I ain't working, sir; I'm only just whistling. Habit tends to make us permanently pidity," she replied, hanging her head.

Too Cold For the Candle. It is a cold climate in which a flame

cannot keep itself warm. One of the scientists attached to the Peary ex-

pedition has personally told of the ef-

fect of intense cold on a wax candle

that he tried to burn. The tempera-

ture was 35 degrees below zero, and its effects were felt not only by the

members of the expedition, but even

by the candle in question. It gave

forth no cheery light such as might

have been expected from it in other

gircumstances, and when it came to

be examined it was found that the

flame had all it could do to keep itself

warm. The air was so cold that the

flame was not powerful enough to melt

all the wax of the candle, but was

compelled to eat its way down, leaving

a skeleton structure of wax in the

form of a hollow cylinder. Inside this

cylinder the wick burned with a tongue

heat was sufficient to perforate the

shapes which turned the cylinder into

holes in which the light shone with a

strange, weird beauty.-St. Louis Re-

Directions In London.

In London and throughout the tight

little island the words "up" and

"down" have a peculiar significance

In going to London from any part of

England you go "up." In traveling in

any direction from the capital you go

"down," So in London itself every-

thing goes "up" if it goes in the direc

tion of the bank-that is, the Bank of

England-and going from that center

toward any of the points of the com-

The word bank, which is not only

always spelled with a capital "B," but

is always uttered with an impressive-

ness that suggests an initial letter of

the largest type, may be said to be in

a sense interchangeable with city, a

term of equal dignity and value in the

eyes of Englishmen and likewise in-

The city does not mean London by

any means. It means a certain limited

section of London, the part where

business is mainly carried on and

where the great financial institutions

A Poor Fit.

George Graham Vest once won a

case for his client by a neat retort.

To testify against Vest's client there

was brought into court a certain wit-

ness whose ill favored countenance

matched his unsavory reputation in

the community. The man's testimony

was most unfavorable to the defend-

ant, and so, of course, Vest proceeded

to discredit his story. As the witness

was unkempt and poorly clad, his

clothes hanging about him in innumer-

able folds and wrinkles, the counsel

for the opposing side endeavored in

their turn to make it appear that Vest

was making capital of the poor ap-

pearance of the man. Mr. Vest of

course, denied this allegation in the

face fit him as well as his coat he

The jury returned a verdict for the

Close Range Duels.

During the first fifty years of the

old American navy, 1798-1848, the

mortality of naval officers resulting

from duels was two-thirds that result

ing from naval wars. In the eighty-two

duels listed by a recent writer thirty-

six men were killed, all naval officers

except three civilians. The per cent

of mortality was 22, or five times the

mortality of the federal army in the

civil war. One-half of those not killed

in these duels were wounded. The

large number of casualties was un-

doubtedly due to the short distance

between the combatants, which cus-

tomarily was only ten paces, or thirty

feet. In a few duels the distance was

even less. In the Barron-Decatur

duel it was twenty-four feet and only

twelve in the Bainbridge-Cochran

Led by the Nose.

as a skilled witness some years ago

where there were questions of analyt-

ical chemistry. There was one case

where a farmer had bought some arti-

ficial manure, and he was being sued

for the price of it. He resisted pay-

ment on the ground that the material

had none of the qualities of manure

at all. The expert chemist was one

of the witnesses and had stated that,

although the substance had the smell,

it had none of the chemical qualities

of manure. Under cross examination

he was asked, if that was so, how did

he account for bundreds of the best

farmers having taken the manure for

many years. "They must have been

led by the nose," returned the witness,

pass is to go "down."

stand.

It was a month after their marriage. Not a word had been spoken to interrupt that current of romance down which they had been sailing ever since they became conscious that they loved. But there is always a beginning.

"My dear," he said pettishly, "I suppose I must go through another day with a safety pin for a suspender but-

of yellow fire, and here and there the ton?" "Another day, dear! What do you mean?"

outer covering and leave holes of odd "If I remember aright this is the a tube of lacelike wax, through the third time I have asked you to replace the button that came off a week

She made no reply, but went to her workbasket, got out what was needed and sewed on the button.

Romance had given place to reality. From that moment she began the duties of a wife. Her day was all for her husband. When she arose in the morning her first duty was to see that be had what pleased him for breakfast. She poured his coffee with her own hand. Then when he had gone for the day she superintended the household affairs, planning that everything might be in order against his return. In the evening she consulted his pleasure. If he wished to go out she went out with him. If he preferred to stay at home she stayed home with him. It seemed to her that there was scarcely an hour in the day that she was not working for him.

And he? He went down to business in the morning and worked hard all day-for her. When his competitors got ahead of him, when wrangling over disputed business transactions fretted him, when he falled to make money or when he met with success it was all for her. She needed expensive clothing, and he bought them for her. Every spring she must have new apparel, and the next spring, though it was not worn or faded, it was no longer in fashion. One season she must have a hat like an umbrella, and the next it must be replaced by one no larger than a dinner plate. Her winter coat must be short, and the next year it must be long. Since the hat could not be shrunken nor the coat lengthened, they must be cast off and new ones purchased. He wondered why garments never grew smaller, so that those purchased the year before might be reduced.

One day she reproached him. "The day is not long enough," she said, "for me to do all I have to do for my master. I did not know when I married you that I was bringing upon

myself slavery. As a girl I could devote all my time to myself. Then I was light hearted because I was free. I had no one's clothes to mend except my own. I had no household duties I spent my leisure time going to theaters, balls and such other amusements as I preferred. Oh, woe is me that I should have married and become a

slave!" And he replied:

"From morning till night I am downtown making money for you to spend for gowns and hats that won't stay in fashion long enough to get the 'new' off them. I must provide house rent and sustenance for you and the thousand other things that you require. 1 never go fishing or shooting, as I did before I was married, for now, having your necessities to supply. I have nothing left for indulging in those sports of which I used to be so fond. My fowling piece went into a fur coat for you, and you are wearing my fishing tackle on your head. Oh, woe is me, that I married and became a slave!" One day a baby came,

The duties of the wife were changed. The husband returned to the use of safety pins in lieu of buttons. She had no longer time to mend his linen. His clothing remained torn.

The baby needed all her attention, requiring more changes of clothing in a day than her husband needed in a week. She spent much time preparing the child's food, and then after she had got it down him he would throw it up. He had cholic most of the time. during which she must dandle him, walk him and give him medicines. Every day he must have the sun and air in his carriage, and his mother, unwilling to trust him to a nurse, trundled him herself. When she was not trundling him she was making or buying clothes for him, and when she was not doing these she was receiving instructions from the doctor as to what she should put into his stomach and what she should put over it.

And the husband. He was now glad to get downtown in the morning to escape the baby's squalls. He passed most of the night walking his son back and forth when the boy had colic and was tired out with loss of sleep. But in his office there was quiet. Besides, in his office be was master, which he was not at home. One morning the husband, who had taken care of the baby during the night that his wife might get "a little sleep." began the old plaint, "I am your slave." This awakened her own former words, "It is I who am your

Nervous Employer-Thomas, I wish This started the wrangle again. Words were getting high when there

was a diversion. There came a sudden yell from the crib. Both rushed to the baby, "Here is our master," said the father. "We are both his slaves."
