WORK! You delude yourself trying to make yourself believe your headaches are only a temporary ailment when you know not what they may lead to. You are not putting your right energy in your work, and are not accomplishing what you should. You may be criticised by your employer for not attending to your work properly, whereas you are trying to do the best you can, but you are not feeling just right. Nine out of ten cases such as yours come from the eyes—why may not yours be one of the nine? Let our graduate optician examine them free of charge, and if it's not your eyes he will truthfully tell you, and you can seek relief elsewhere. Don't delay attending to yourself, you will accomplish so much more.

Commenting on an item which appeared in these columns saying that much building would be done this year if the loans could be secured, a local loan agent says there is no scarcity of money for loaning purposes, and that where the security is ample the money can be secured. The company and the individuals this agent represents have plenty money to place, the only requirement being good security. He does not consider that the money market is tight—not any more so than a year ago.
