

## BAD CASE OF GRIP

Caused Sore Throat and Tonsillitis. Restored by Peruna.

Mr. W. H. Housley, Stony Point, Tennessee, writes: "Five years ago I took a very severe cold which resulted in la grippe. I never was so bad off. I was in bed several weeks, and when I did get up I had tonsillitis and sore throat. I tried to cure this for eighteen months, but it gradually got worse. A doctor advised me to have my tonsils cut out, but I did not like the idea. Another doctor examined me, and told me the same thing. I finally got a bottle of Peruna, and after I had taken one bottle my throat was better. I bought and used a dozen bottles, and saw I was going to get well, and I did."

Mr. W. H. Housley.

## MEXICO TO HAVE MAGNIFICENT CAPITOL BUILDING

MODEL OF THE CAPITOL

CITY OF MEXICO.—Work is progressing rapidly on the new capitol building for the Republic of Mexico, the corner stone of which was laid during the recent celebrations of the centennial of the republic. The building will be exceedingly handsome and will add greatly to the artistic attractions of the city. It will accommodate both houses of congress and many departments of the government.

Private Leahy Questions Sergeant Donahue Regarding a Point in Military Law.

Private Donahue and Private Leahy were the best of friends, but when Private Donahue became Sergeant Donahue, Private Leahy saw the failings of his former companion with amazing clearness.

"Sergeant," he said one day, after long, fixed gazing at his superior in rank. "If a private stepped up to a sergeant and called him a constipated little monkey, what would happen?"

"He'd be put in the yard-house," said the sergeant.

"He wud?"

"He wud."

"But if the private only knew the sergeant was a constipated little monkey, and said niver a wurd, wud he be put in the yard-house for that?" inquired Private Leahy.

"Av course he wud not," said the sergeant, loftily.

"Well, thin, for the present we'll leave it go at that," said Private Leahy.

**Dog Dies From Grief.**  
A dog's striking attachment to his master is recorded from Villeneuve-Saint-Georges. While attending the funeral of a municipal councillor's wife, M. Constantin, a resident of that village, contracted congestion of the lungs, from which he died suddenly.

He had a dog, a small fox terrier, which never left him. Since the death of M. Constantin the poor animal refused food and passed whole days at the cemetery moaning on the tomb of his dead master. Yesterday the terrier was found dead.—Le Figaro.

**Where Surgery Falls Short.**  
"Surgery," said Simeon Ford at a dinner in New York, "accomplishes wonder nowadays. Hearts are sewed up; the appendix is removed; the large intestine is done away with. But—"

The noted humorist smiled.  
"But will the time ever come when surgery will be able to remove the cheek of a young man or the jaw of an old woman?"—New York Sun.

**A FOOD STORY**  
Makes a Woman of 70 "One in 10,000."  
The widow of one of Ohio's most distinguished newspaper editors and a famous leader in politics in his day, says she is 70 years old and a "stronger woman than you will find in ten thousand," and she credits her fine physical condition to the use of Grape-Nuts:

"Many years ago I had a terrible fall which permanently injured my stomach. For years I lived on a preparation of corn starch and milk, but it grew so repugnant to me that I had to give it up. Then I tried, one after another, a dozen different kinds of cereals, but the process of digestion gave me great pain.

"It was not until I began to use Grape-Nuts food three years ago that I found relief. It has proved, with the dear Lord's blessing, a great boon to me. It brought me health and vigor such as I never expected to again enjoy, and in gratitude I never fail to sound its praises." Name given by Postum Co., Battle Creek, Mich.

"There's a Reason."  
Look for it in the little book, "The Road to Wellville," to be found in pkgs. Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

## BASEBALL IN JAPAN

Trip of University of Chicago Team Described.

Mainichi Denpo Predicts Pastime Will Become National Game in Mikado's Kingdom and Promote Better Feeling.

Chicago.—"Honorably baseball, of all games in the world the most refined, the most highly organized and the most active," is to become the national game of Japan.

Daily newspapers of the island empire, commenting with enthusiasm upon the recent visit of the University of Chicago baseball team, declare this, and then go so far as to predict that the Mikado and Uncle Sam, hands clasped as fellow-fans, will never, never utter a harsh word except, perhaps, at the umpire.

The Mainichi Denpo, according to a translation sent to President Harry Pratt Judson, of the University of Chicago, by Montgomery Schuyler, charge d'affaires at Tokyo, and published in the current University of Chicago Magazine, had the following to say on the subject:

"The American people's own estimate of baseball may not be quite unreasonable if we take into consideration the fact that of all foreign games adopted by our students baseball is the most popular and attracts the largest number of spectators, and that several international matches have been held. If baseball makes progress at this rate in this country, and if we do not have any new international game, then baseball will become the national game, as it is in America.

"Without reference to warship teams or professional teams, the contract of American and Japanese teams will, besides promoting the game itself, contribute much to a better understanding between the two nations."

"The University of Chicago team now visiting this country consists of students of good moral standing and excellent scholarship. They are real American gentlemen whose amiability is an object lesson to our students. We have been told that in the principal American colleges students of inferior scholarship can not join baseball team no matter how good players they may be. Following this example, our schools have adopted a rule whereby those can not become members of the representative school teams. It will thus be seen that the evils that the enlightened public feared might attend the game of baseball have been prevented.

"If baseball matches can be held by Japanese and American students who cross the ocean, and if thus the students of the two countries cultivate friendship, then international baseball matches between Japanese and American students can no longer be regarded as sport pure and simple.

"We hope that baseball in this country will make sound progress among our students and that we may be able to have more international matches. It is natural to expect in this connection that the graduates of various schools will make it easier to have international matches. America will feel proud if one of her national games becomes an international game, in which the Japanese nation alone can take part. If our people intend to make baseball an international game, the American people will extend to us their most cordial support."

The Japanese newspaper paid a glowing tribute to the exemplary and sportsmanlike behavior of the Chicago students.

"In moments of excitement," it said, "every person is liable to lose control of his temper, and especially is this the case the world over with young men. But in many occasions of thrilling excitement and close contests the Chicago team always maintained calm,

gentlemanly attitudes. Not a word of indecent language came out of their lips.

"In the United States, the east claims almost a monopoly of politeness and refinement. The west is generally considered as rough and unrefined. But from this west we had the pleasure and satisfaction of welcoming here a baseball team most exemplary not only in the skill of the art, but also in their conduct on the field.

"They have given us very useful lessons in many ways, and especially to our youths, who rank behind nobody in their tendency to get excited, the Chicago team and their behavior throughout the seven games on the Waseda field stand out very prominently as a model of conduct, and as we record this fact we are simply echoing the unanimous impressions of the tens of thousands who witnessed every match on the Waseda ground.

"We believe and expect that in Osaka also the same thing will be placed to their record, and such happy impressions left behind will doubtless go a long way in keeping up the traditional friendship now happily existing between the United States and our country. It may be said of the Chicago team that they have done a considerable service in the international relations of the country they represent and the country of their visit."

## SAYS VIVISECTION IS FUTILE

Twenty-Nine Years' Experience Convincing English Doctor That Cancer Research is Moonshine.

New York.—Twenty-nine years' practice as surgeon to the London Cancer hospital so thoroughly convinced Dr. Herbert Snow of London that "what passes with the public for cancer research is utter moonshine," that he stirred the members of the Anti-Vivisection society meeting here the other night with a condemnation of "the whole system of experimentation upon the subhuman animals." It is, he said, both unscientific and futile.

"No inference can be drawn directly," he declared, "from any phenomena in the subhuman animal to mankind. The fundamental differences of structure in every direction are enormous."

As an instance, he pointed out that lemonade, a healthful and refreshing beverage for man, was deadly poison to cats and rabbits.

"Salt," he said, "is fatal to chickens; prussic acid promptly kills men and elephants, but horses and hyenas take it with impunity. Rabbits eat belladonna, goats are fond of the tobacco plant and of conium, the hemlock which killed Socrates. And so in a hundred cases one sees the mischievous character of drug experiments on the lower animals."

The only sure path to scientific instruction was, he contended, by the reverent observation of the actual diseases in the human being, living or dead.

**Radium Bank Hires Women.**  
Paris.—The Radium bank here has greatly increased its staff of women since it started. This is due to the rapidly increasing use of the marvelous mineral in medical and surgical practice. Women are employed in preference to men as porters of radium, and \$100,000 worth is entrusted to them daily, and their individuality purposely is shrouded in mystery to prevent an attempt to rob them while accomplishing their important missions.

**Owens Scott's Phaeton.**  
London.—A phaeton which once belonged to Sir Walter Scott is now the property of W. J. Sage, Brixton. It was in this coach that Sir Walter rode when he received King George IV. in Edinburgh in 1822 and used when riding in the district of Abbotsford. The carriage bears a brass plate on which is engraved:

"This pony phaeton formerly belonged to Sir Walter Scott, Bart., of Abbotsford."

## FOUR-TOED HORSE DISCOVERED

Philadelphia Scientist Makes What is Believed to Be Important Discovery in Wyoming.

Philadelphia.—Joy over the finding of the skeleton of a four-toed horse believed to represent the very earliest American stage in the evolution of the equine race, pervaded the American Museum of Natural history.

The discovery is the last word in the important researches in which the institution has led the scientific world, and the descent of the horse is now traced down to the hypothetical five-toed animal, from which it is believed that it sprang. If it should be found that there is a rudimentary bone or splint in the feet of the skeleton which has been unearthed, the find will be of still greater importance.

The museum authorities received a letter from their expedition in charge of Walter Granger, telling of the finding of the fossil steed in Watach, or lower Eocene formation of the Big Horn valley, in Wyoming, being the first complete skeleton of a horse which that formation has ever yielded. The bones have been uncovered sufficiently to show the four toes on the forefeet, which are the marks of the species. The animal seems to have been about the size of the fox terrier. He is none the less, in the opinion of the scientists, the progenitor of the breed from which came such marvels as Sysonby, slight of frame and swift of limb, and of the ponderous Percheron.

Instructions have been given to have the precious skeleton prepared as quickly as scientific accuracy will permit, and it is expected that before the close of the winter it will be on public view. The museum began the assembling of its fossil horses under the direction of Prof. Henry F. Osborne, now its president, and has today the largest collection of the kind on the globe.

## HEIGHT TO COMMAND FARE

Conductors on West Penn Trolley Line Must Measure All Children to Fix Charge.

Irwin, Pa.—When a person accompanied by a child boards a street car here the conductor no more asks, "How old is it?" but he takes it to the front end of the car, removes its hat and takes its measure. If the child is under 41 inches tall no fare is charged. This system was adopted recently by the West Penn line because so many children nearly the size of men and women have been represented to be under five years of age. Statistics showed that children five years old average a height of 3½ feet. A mark 41 inches from the floor in each car is used to determine a child's height.

Besides their transportation, passengers, it is said, get a nickel's worth of fun every time a child gets on a car. Little boys can ride to their heart's content if they are under size, and all the excuse they need give is that "mother sent me to the store."

Sleeping children in parents' arms, however, must be wakened and stood against the mark; little girls must have their hats removed, and the child that is "large for its age" must pay like a little man.

## Hood's Sarsaparilla

For All Spring Blood Diseases and Ailments

Possesses medicinal merit Peculiar to Itself and has an unequalled record of cures. Take it this spring, in usual liquid form or tablets known as Sarsatabs.

Spring Humors are due to the impure, impoverished, devitalized condition of the blood brought about by the unhealthful modes of living during the winter, too close confinement, too little outdoor air and exercise, too heavy diet. Hood's Sarsaparilla cures them and builds up the whole system.

Hood's Sarsaparilla has no equal for cleansing the blood and expelling the humors that accumulate during the winter. It effects its wonderful cures because it combines the utmost remedial values of more than twenty different ingredients. Insist on having Hood's. It has no substitute.

SPORN MEDICAL CO., Chemists and Patent Drafters, Coatham, Ind., U. S. A.

**Barnmaids in South Australia.**  
South Australia is suffering from a barnmaid famine. Two years ago barnmaids were abolished in that state by act of parliament. No more could be legally engaged, but those already employed could remain on condition that they registered themselves. There are now only 400 of them left, and the competition for their services is such that their wages have jumped from 25 shillings to £3 a week. The hotels that have had to employ barnmaids report a considerable change for the worse in their receipts.

**EASTER POST CARDS FREE.**  
Send 2¢ stamp for five samples of our very best Gold Embossed, Easter, Flower and Motto Post Cards; beautiful colors and loveliest designs. Art Post Card Club, 731 Jackson St., Topeka, Kan.

**The Reason.**  
"I know a woman who never goes gossipy about her neighbors."  
"Get out. You don't."  
"Yes, I do. She's dumb."

**ASK FOR ALLEN'S FOOT-EASE**  
The Antiseptic powder to shake into your shoes. Relieves Corns, Bunions, Ingrowing Nails, Swollen and Sore Feet, Blisters and Callous spots. Sold everywhere. Don't accept any substitute. Sample FREE. Address Allen S. Olmsted, Le Roy, N. Y.

**When He Was Slow.**  
"Swift is the swiftest proposition I ever saw."  
"Is he? Did he ever owe you any money?"

Thousands of Consumptives die every year. Consumption results from a neglected cold on the lungs. Hamlin Wizard Oil will cure these colds. Just rub it into the chest and draw out the inflammation.

Executive ability consists in finding a man who can do the work—and in letting him do it. Lots of men who can do the first, can't do the second.

**FILES CURED IN 6 TO 14 DAYS**  
Your Druggist will refund money if PAIN OINTMENT fails to cure any case of Rheum, Headache, Bleeding or Protruding Nails in 6 to 14 days. 50c.

Nothing under the sun has done more to help the fool killer earn his salary than inordinate self-conceit.

**Mrs. Winslow's Soothing Syrup for Children**  
Teething, soothes the gums, reduces inflammation, allays pain, cures wind colic, etc. a bottle.

**Doat thou love life?** Then do not squander time, for time is the stuff life is made of.—Franklin.

Taking Garfield Tea keeps the system clean, the blood pure and the general health good. Buy from your druggist.

You can often tell what a woman really means by what she doesn't say.

There are imitations, don't be fooled. Ask for Lewis' Single Binder cigar, 5c.

Even a little trial is a big one if you have no others.

## What Ails You?

Do you feel weak, tired, despondent, have frequent headaches, coated tongue, bitter or bad taste in morning, "heart-burns," belching of gas, acid risings in throat after eating, stomach gnaw or burn, foul breath, dizzy spells, poor or variable appetite, nausea at times and kindred symptoms?

If you have any considerable number of the above symptoms you are suffering from biliousness, torpid liver with indigestion, or dyspepsia. Dr. Pierce's Golden Medical Discovery is made up of the most valuable medicinal principles known to medical science for the permanent cure of such abnormal conditions. It is a most efficient liver invigorator, stomach tonic, bowel regulator and nerve strengthener.

The "Golden Medical Discovery" is not a patent medicine or secret nostrum, a full list of its ingredients being printed on its bottles and wrapper and attested under oath. A glance at these will show that it contains no alcohol, or harmful habit-forming drugs. It is a fluid extract made with pure, triple-refined glycerine, of proper strength, from the roots of native American medicinal forest plants. World's Dispensary Medical Association, Prop., Buffalo, N. Y.

**W. L. DOUGLAS**  
ESTABLISHED 1879  
\$2.50 \$3 \$3.50 & \$4 SHOES FOR MEN  
W. L. Douglas shoes cost more to make than ordinary shoes, because higher grade leathers are used and selected with greater care. These are the reasons why W. L. Douglas shoes are guaranteed to hold their shape, look and fit better and wear longer than any other shoes you can buy.

**Beware of Substitutes.**  
The genuine have W. L. Douglas name and the retail price stamped on the bottom, which guarantees full value and protects the wearer against high prices and inferior shoes. REFUSE SUBSTITUTES CLAIMED TO BE "JUST AS GOOD".  
If your dealer cannot supply you with the genuine W. L. Douglas shoes, write for Mail Order Catalogue. Shows sent direct from factory to wearer, all charges prepaid.  
W. L. Douglas, 145 Nassau St., Brooklyn, N. Y. Prices \$2.00, \$2.50 & \$3.00
