The fable attempt made Friday by a supposed drunken man to frighten the cashier of an Omaha bank into handing him over a thousand dollars, recalls an incident that occurred in this vicinity not so long ago, when a gentleman prominent in business circles received through the mail a "black hand" letter demanding \$5,000 in gold to be placed in a sack and deposited at a stated place on a certain day. The request was complied with in every particular except that iron washers were substituted for the coin. Three men with guns were then stationed nearby to guard the treasure, with instructions to blow the fellow into the next world if he showed up. Perhaps he got a whiff of the powder, anyway he failed to show up and nothing further developed.

Robert Lannin Married.

The Grand Island Independent of yesterday contained this notice of the marriage of a North Platte young man:

A very pretty home wedding occurred at 2 o'clock yesterday afternoon at the home of Mr. and Mrs. Howard Thurber, on East Ninth street, when Miss Ora Baker, a very estimable young lady,

who has been making her home at the Thurber residence, was happily wedded to Mr. Robert Lannin, one of the popular young conductors of the Union Pacific, running between Kearney and North Platte. Rev. Edward Evans, Jr., of the Congregational church, in the absence of Rev. S. H. Buel, read the service with Mrs. Thurber attending as bridesmaid and Mr. Thurber as best man. The ring ceremony was used.

After the ceremony a delicious luncheon was served. At 4:15 the happy couple left for a short honeymoon in the east. They will return to North Platte to reside and will be at home at that place to their friends after July 1.

Many gifts, both useful and ornate were received. Those present were Mr. and Mrs. Thurber, Rev. Edward Evans Jr., Mr. and Mrs. W. G. Partidge, Mrs. William Pegg, Mrs. Sinclair, Miss Agnes Kalal, Miss Velma Kirk and Miss Mable Kirk.

The Independent joins the many friends in wishing the couple a long and prosperous life.

Are You Preparing to go to Utah?

There are new names being added to the list every day!

All going to see the Lands under the Hatchtown Project, 200 miles south of Salt Lake City

ROUND TRIP FARE \$30.00

IRRIGATION

Under the Hatchtown project you are absolutely secured in your water rights. The supply is far in excess of any possible need. The reservoir covers an area approximately of 600 acres, and has a capacity of 16,000 acre feet of water or an equivalent of a body covering one square mile of surface twenty-five feet deep; or sufficient water under normal conditions to irrigate 8,000 acres of land, allowing the lands to be covered six inches deep, four times each season.

The entire tract embraced in the Hatchtown project appears to the naked eye to be perfectly level, yet there is a gentle and regular slope toward the Sevier river, ample for irrigation and sufficient for drainage purposes. There is not even a trace of alkali or rock on the entire segregation. Not \$10 need ever be spent to make the entire tract perfectly level.

MARKET

There is a market right at your door for the products of your farm under the Hatchtown project. The country to the south in Utah and the Arizona strip to the Colorado river is a grazing country and all live stock growers obtain their supplies at Panguitch, the live stock in the regions tributary to Panguitch is: Sheep 400,000; cattle 300,000; goats 10,000. Hence there is a ready market for all farm products right at home.

State Board of Land Commissioners will furnish you the money to buy an Irrigated farm and allow you to pay back the money in installments from the crops.

Prices of Land with Water

First grade,	\$35.00
Second grade,	32.50
Third grade,	30.00

Terms: \$5.00 per acre down; 10 annual payments for balance, 5 per cent interest.

THE SOIL

The proof of the pudding is in the eating. There is one peculiarity about Utah lands, about all sage brush land; it is a great deal better than it looks. Turn water upon it and see. The promises it makes are more than fulfilled. It is naturally adapted for small grain, for alfalfa, for potatoes, for sugar beets and for horticulture. The lands under the Hatchtown project have soil that is from twelve to thirty feet deep. Sage brush and buffalo grass cover the lands, it is free from alkali, and is a sandy loam, the wash, the erosion from the mountain for ages and the deposit of silt from the Sevier river. Wheat yields on lands in the Panguitch valley, where the Hatchtown project lies, 40 bushels to the acre. Oats of a superb quality with a bright plump berry, yields 65 bushels per acre. Barley yields heavy, 400 bushels to the acre. Potatoes yield 900 bushels per acre. Alfalfa four to six tons per acre. Oats and alfalfa sown together produce 40 bushels of grain and four tons of alfalfa per acre.

Farmers in the rain belt cannot believe the stories of the great yield, the great crops that the farmers raise on irrigated farms. But the crops are produced, and there is neither miracle or accident in their production. Irrigated lands contain mineral salts which are highly beneficial.

The lands under the Hatchtown reclamation project are most fertile and the deposit of silt which the waters from the Sevier carry is a fertilizer of the best kind. There is no need of artificial fertilizers, the turning under of leguminous crop occasionally is all the fertilizer needed in addition to the silt from the canal.
