#### **Roosevelt** Issues Statement.

Theodore Roosevelt, when asked Saturday regarding the report that he may again be a candidate for president, told a World correspondent that a statement might be made as foilows:

Colonel Roosevelt finds it difficult to understand the comment that has followed upon his article in the Outlook regarding national laws and business interests. He has said exactly the same thing many times before. He cannot see why it should be assumed that this article indicates that he is ready to take any personal part in the coming cam paign.

It can be stated that Colonel Roosvelt has received many letters indicating the willingness of the writers to give him political support if such is desired. It can be stated that Colonel Roosvelt today recived a letter from a certain United States senator offering the full political support of the senator in case Colonel Roosvelt should wish to be a candidate in the national campaign. To this letter Colonel Roosvelt has replied that he earnestly hopes that the senator will not only refrain from any action looking to the nomination of Colonel Roosvelt, but also will prevent his friends from taking taking any such steps.

"No comment would be made by Colonel Roosevelt upon this announcement, which he insisted should be made in the third person. He would not name the senator to whom he referred.

### Proof of Cattle Shortage.

All doubts about the beef cattle shortage have been dispelled by the consus report that the decrease in number in the last ten years has been 6.8 per cent. This announcement is very significant. This is the greatest decrease record in any class of live stock. Horses, mules and dairy cattle increased to much greater extent than any class of meatproducing animals. In fact, the census figures indicate a decrease of about 2 per cont in sneep, although an increase of possibly 10 per cent may have been made in hogs. We cannot escape the conclusion that the production of meat-producing animals, particular beef catte, has not pace with other branches of the live stock industry. When it is considered that the population of the United States has increased 21 per cent, while the decrease in beef production has taken place, it is evident that a wide gap may devolop in duty as stenographer in Attorney the supply.

Not only have beef eattle decreased in numbers, but the average age of marketing has been lowered. So true is evening for Lincoln where he attended this that while market prices have appreciated, the farm value credited per hend has actually declined. The cleanup of large rang herds, resulting in the marketing of thousands of immature steers and females of all ages, has been a factor in the decrease which cannot easily be replaced.
