

Beware of Smooth Strangers
YOUR MONEY IS SECURE IN OUR BANK

A banker in Ohio is responsible for the statement, that if all the money taken out of his community by smooth strangers and "Get-Rich-Quick" schemes had remained at home, it would pike every road in the county.

Why do you not put your money safely in your home bank, where it will help you and everybody else in your community, and where you can get it when you want it.

Preserving Eggs.

The following method of preserving eggs is taken from Farmer's Bulletin No. 273, U. S. Dept. of Agriculture: It enables farmers, poultry men and consumers to put away eggs in summer, when they are plentiful and cheap, and preserve them until the winter season, when they are scarce and high in price.

The water glass method is used, a ten per cent solution keeping eggs for eight months in prime condition.

The cost of preserving eggs in a ten per cent water glass solution, exclusive of the containers, is less than one cent per dozen.

Water glass can be obtained of Schiller & Co., Family Druggists, North Platte, Nebraska, at ten cents per pound and a pound of it properly diluted to make a ten per cent solution, will be enough to cover twelve to fifteen dozen eggs.

Stone jars are the best to keep the eggs in, as you can cover it tightly, preventing evaporation and eggs will not absorb any odors from them.

Use only perfectly fresh eggs as stale eggs will not keep by any method of preservation. Clean the stone jars thoroughly by scalding. Prepare the solution, using water that has been first boiled then cooled to ordinary temperature. To each pound of water glass use ten pounds of water. Pack the eggs in the jar and pour the liquid over them, covering the eggs completely. Do not wash the eggs before packing them, as this may injure their keeping qualities by removing a natural protective coating on the outside of the shells.

Keep the eggs packed in this manner in a cool, dry place, such as a dry cool cellar.

Each day's gathering of eggs may be packed immediately after gathering by placing them in the jar and pouring over them just enough of the solution to cover them. This is better than to hold the eggs for several days at the risk of their becoming stale in order to have a sufficient number to fill the entire jar.

DID YOU EVER

Stop to Consider When Buying Dry Goods that Quality Means Durability?

Everything we show you you can rely on their giving you entire satisfaction.

We have made careful selections. Bought only the best merchandise. Have only the best to sell.

Did you know our entire line of spring goods is new? It is?

Our entire stock is new. Can you really afford to buy goods that you don't know whether they are old or not, when you have the opportunity of buying new, clean goods at less money? A great many assortments can only be called such, because they are four or five years left overs. Just a few articles bought each year to freshen up the stock. If you want old goods don't come here. We haven't any. But, if you want new goods, come here, it will save you time and money by doing so.
